गर्म पानी पीने के फायदे

गर्मी के मौसम में हम ठण्डे पेय पदार्थों को और आकर्षित होते हैं, जो लोग भोजन करने के साथ ठण्डा पानी पीना पसन्द करते हैं यह लेख उनके लिए ही है। भोजन के साथ ठण्डा पानी पीना बहुत ही ज्यादा हानिकारक होता है क्योंकि ठण्डा पानी आपके भोजन के तैलीय पदार्थों को जो आपने अभी-अभी खाये हैं ठोस रूप में बदल देता है। इससे पाचन बहुत धीमी हो जाता है। जब यह अम्ल के साथ क्रिया करता है तो यह टूट जाता है और जल्दी ही यह चर्बी में बदल जाता है। यह कैंसर पैदा होने का कारण बनता है। इसलिये सबसे अच्छा यह कि भोजन के बाद गर्म या गुनगुना पानी पियें। एक गिलास गुनगुना पानी सोने से ठीक पहले पीना चाहिये। इससे खून के थक्के नहीं बनेंगे और आप हृदयघात से बचें रहेंगे।

लिवर व किडनी के लगातार बढ़ रहे मरीज

सहरसा:- जो दवा हमें रोग मुक्त करती है, उसी दवा का उपयोग अब युवा नशे के लिए कर रहे हैं। नशे के रूप में अब तक पान, गुटखा, गांजा, भांग, खैनी, बीड़ी, सिगरेट और शराब लिया जाता था। लेकिन वर्तमान परिदृश्य में दवा की कुछ श्रेणी, ओपीएम युक्त कफ सिरप और कुछ गुणों के इंजेक्शन सस्ते नशे के रूप में धड़ल्ले से उपयोग किये जा रहे हैं। राज्य में शराबबंदी के बाद शहरी और ग्रामीण क्षेत्रों में ऐसी दवाओं की बिक्री काफी बढ़ गयी है। लेकिन इस पर चौकसी नहीं के बराबर है। लिहाजा जिले में लिवर व किडनी के रोगियों की संख्या में लगातार इजाफा होता जा रहा है। सहरसा शहर और आस-पास दवा की दुकानों से दुकानों की परची के बगैर धड़ल्ले से दवाइयाँ बेची जाती हैं। मैडीकल स्टोर वाले अपने थोड़े फायदे के लिए ग्राहकों को बिना कारण समझाये दवा मुहैया करा देते हैं। मालूम हो कि पेंटविन इंजेक्शन, कॉरेक्स सिरप, फोर्टवीन, स्पाजमो प्राक्सीवान कैप्सूल, कंजोज का नशे के लिए उपयोग किया जा रहा है। नशे का यह समान सस्ते दर पर उपलब्ध होने के कारण युवाओं में इसका चलन बढ़ चुका है।

नशीली दवायें लेने से फटने लगी आंते

जिला अस्पताल में उपचाराधीन टाउन निवासी 22 वर्षीय युवक ने बताया कि पहले पोस्त खाने लगा था। पोस्त बन्द हुआ तो दामाडोल की लत लग गई। दिन में 10 से 20 गोलीयाँ खाने लगा। इस कारण आत में ब्लॉकज की समस्या रहने लगी। इसी वजह से आत फट गई। गाँव कमरानी के 30 वर्षीय बागपत सिंह ने बताया कि पोस्त बन्द होने के बाद डॉक्टर ने नशा छुड़ाने के लिए दामाडोल दी। इसके बाद लगातार दामाडोल का सेवन करने लगा। अत्याधिक सेवन के कारण पेट में दिक्कत रहने लगी।

स्वस्थ रहे सबका तन-मन, रहेगा हमेशा हमारा यही जतन

Acidity

Acidity is a term used for a set of symptoms caused by excess production of acid by the gastric glands of the stomach. The stomach normally secretes hydrochloric acid which is required for the breakdown and digestion of food we eat. Acidity causes symptoms like dyspepsia, heartburn, gastric inflammation and ulcers in the stomach. Acidity is generally a consequence of several external factors like eating habits, fad diets, stress, smoking and alcohol consumption, lack of physical activity, irregularity in eating pattern. The incidence of acidity is higher in countries where individuals eat more of non-vegetarian, oily and spicy foods. Certain medications like non steroidal anti-inflammatory drugs (NSAID's) also predisposes individuals to gastric acidity. People suffering from acidity feel a burning sensation after eating a meal. Sour belching is also commonly seen. Sometimes, constipation and indigestion is also seen in people having acidity. Acidity can be treated with antacids and mainly by making changes in eating and lifestyle habits. A new technique called endostomism can also provide relief from acid reflux. This section offers some really good home remedies for acidity which you can try. You can also read the importance of having an alkaline diet to reduce the symptoms of acidity. Our stomach produces gastric acids to aid digestion. But, their corrosive effects are neutralised by the production of natural bicarbonate and prostaglandins secreted in the mucous lining. When the production of these chemicals is interrupted then it leads to damaged stomach lining which causes acidity. ● Stress ● Consumption of spicy and non-vegetarian foods ● Smoking and alcohol ● Stomach ailments like peptic ulcers, gastroesophageal reflux disease, stomach tumors, etc. ● Medications like non-steroidal anti-inflammatory drugs. **SYMPTOMS:-** The common signs and symptoms that you might experience are - ● Burning in the stomach ● Burning in the throat ● Restlessness ● Belching ● Nausea ● Sour taste ● Indigestion ● Constipation Usually, acidity is treated with the help of antacids which contain either magnesium or calcium or aluminium containing compounds. These antacids neutralise the excess acid in the stomach thus providing relief from the symptoms. Read about food dos and don'ts for acidity. Sometimes, histamine blocking agents (H2 receptor blockers) such as cimetidine, ranitidine, famotidine or nizatidine or proton pump inhibitors such as omeprazole and lansoprazole can also be prescribed by your physician. In rare cases, surgery (vagotomy) is performed to reduce the acid sensation. Here's how to relieve indigestion, gas and irritable bowel syndrome with yoga. Here are 10 home remedies for acidity that actually work - ● Bananas ● Tulsi ● Cold milk ● Saunf or aniseed ● Jeera ● Clove ● Elaichi ● Mint leaves or pudina ● Ginger ● Amla **Acidity can be prevented by the following methods:** ● Don't consume spicy food (Read: Pickle with every meal - good or bad?) ● Eat more fruits and vegetables ● Eat small, regular meals ● Consume your last meal at least a few hours before sleeping ● Chew tulsi leaves, Cloves, saunf, etc. ● Avoid medications like NSAIDs (non-steroidal anti-inflammatory drugs) and steroids ● Reduce stress.

What are the Symptoms of Holes in the Heart?

Many babies who are born with atrial septal defects (ASDs) have no signs or symptoms. Heart murmur is the most common among the signs and symptoms that occur during this defect. A heart murmur is an extra or unusual sound heard during a heartbeat. Often, a heart murmur is the only sign of an ASD. However, not all murmurs are signs of congenital heart defects. Many healthy children have heart murmurs. Doctors can listen to heart murmurs and tell whether they're harmless or signs of heart problems. Over time, if a large ASD isn't repaired, the extra blood flow to the right side of the heart can damage the heart and lungs and cause heart failure. This doesn't occur until adulthood. **Signs and symptoms of heart failure include:-** • Fatigue (tiredness). • Tiring easily during physical activity. • Shortness of breath. • A buildup of blood and fluid in the lungs. • A buildup of fluid in the feet, ankles, and legs. **Ventricular Septal Defect:-** A heart murmur usually is present in ventricular septal defect (VSD), and it may be the first and only sign of this defect. Heart murmurs often are present right after birth in many infants. However, the murmurs may not be heard until the babies are 6 to 8 weeks old. Most newborns who have VSDs don't have heart-related symptoms. However, babies who have medium or large VSDs can develop heart failure. Signs and symptoms of heart failure usually occur during the baby's first 2 months of life. The signs and symptoms of heart failure from VSD are similar to those listed above for ASD, but they occur in infancy. A major sign of heart failure in infancy is difficulty while feeding and poor growth. VSD signs and symptoms are rare after infancy because the defect either decreases in size on its own or is repaired.

Bulandshahr-203001 (U.P.) आपके पिता-स्व श्री रामकिशन जी दो पुत्रिया-नोर्थ कैरोलिना में ग्रेजुएशन कर रही हैं. आपका मानना है स्वच्छ मानसिकता ही स्वस्थ समाज का निर्माण कर सकती है. अमीर-गरीब, जात-पात का भेदभाव ई-सानियत को नष्ट कर रहे है. तथा राष्ट्र के निर्माण में भी बाधक है.

मुम्ना कौसा एसोसियेशन और F.D.A. विवाद का पटाक्षेप

मुम्नाई (ठाणे) से प्राप्त जानकारी के अनुसार मुम्ना कौसा कैमिस्ट एसोसियेशन और F.D.A. विवाद सुलझ गया है और एसोसियेशन ने अनिश्चितकालीन हड़ताल का फैसला वापस ले लिया है. ज्ञात रहे कि मुम्ना कौसा में 170 कैमिस्ट शॉप हैं. पिछले 15 दिन से चल रहे इस विवाद में F.D.A. ने मुम्ना कौसा के 8 कैमिस्टों पर **Dust, Inspection Book, Purchase Bill** आदि को बरकरार न रख पाने का आरोप लगाते हुये 8 कैमिस्टों को निलम्बित करने का नोटिस जारी किया जिसका एसोसियेशन के अध्यक्ष **श्री शमी शेख मो. 09029160920** ने पुरजोर विरोध किया. इस प्रकरण में **श्री शमी शेख** ने अपना पक्ष F.D.A. अधिकारियों के समक्ष रखा. इस प्रकरण में **AIOCD अध्यक्ष श्री जगन्नाथ शिन्दे (अप्पा साहेब)** को दखल देना पड़ा. क्योंकि ये 170 कैमिस्टों के जीवन यापन और उपभोक्ताओं को होने वाली हानि का सवाल था. अतः **अप्पा साहेब** के मार्ग निर्देशन में ठाणे कैमिस्ट एसोसियेशन के पूर्व अध्यक्ष **श्री चन्दू भाई शाह** और **श्री शमी शेख** और F.D.A. अधिकारियों की बैठक के बाद मुम्ना एसोसियेशन ने अपनी हड़ताल का फैसला वापस ले लिया, इस प्रकरण के पटाक्षेप के लिये **श्री चन्दू भाई शाह, श्री शमी शेख** व F.D.A. के पदाधिकारियों को हार्दिक बधाई.

अच्छी नींद सेहत के लिये आवश्यक

अच्छी नींद अच्छे स्वास्थ्य के लिये आवश्यक है. नींद पूरी न होने से हमारी दिनचर्या व रचनात्मकता प्रभावित होती है. एक शोध के अनुसार कुछ नया सीखने के लिये अच्छी नींद बहुत आवश्यक है, इस शोध के अनुसार गहरी नींद न लेने से दिमाग का वह हिस्सा प्रभावित होता है, जो नई चीजें सीखने के लिये जिम्मेदार होता है.

राष्ट्रोदय गीत

विश्व गगन पर फिर से गुँजे, भारत माँ की जय जय जय।
 बढ़ते जायें हो निर्भय, बढ़ते जायें हो निर्भय।।
 कालजयी है चिन्तन अपना, सभी सुखी हों एक ही सपना।
 जगता है परिवार हमारा, जगता है परिवार हमारा
 चमकें अपना शील विनय,
 बढ़ते जायें हो निर्भय, बढ़ते जायें हो निर्भय।।
 अपनी शक्ति को प्रकटाएँ, स्नेहामृत पल-पल छलकाएँ।
 भेद अभावों को हरना है, भेद अभावों को हरना है।।
 मंगलमय नव अरूणोदय,
 बढ़ते जायें हो निर्भय, बढ़ते जायें हो निर्भय।।
 सृष्टि की समझें रचनाएँ, सम्यक् विकास पथ अपनाएँ।
 वायु, जल, भूमि, तत्वों को, वायु, जल, भूमि तत्वों को
 सदा रखेंगे तेजोमय,
 बढ़ते जायें हो निर्भय, बढ़ते जायें हो निर्भय।।
 जीवन व्रत यह चले अखण्डित, तन-मन-धन सर्वस्व समर्पित।
 जगत् गुरु सिंहासन सोहे, जगत् गुरु सिंहासन सोहे।।
 गौरव महिमा हो अक्षय,
 बढ़ते जायें हो निर्भय, बढ़ते जायें हो निर्भय।।
 विश्व गगन पर फिर से गुँजे, भारत माँ की जय जय जय।
 बढ़ते जायें हो निर्भय, बढ़ते जायें हो निर्भय।।

जैनेशन गैप

आज के युग में वृद्ध सम्भवतः इस बात से परेशान हैं कि मोबाइल एवं अन्य तकनीकी बदलाव से सम्पर्क नहीं जोड़ पा रहे हैं. वहीं बच्चे फटाफट इस बदलाव से जुड़ते जा रहे हैं. बच्चे भी प्रयास करते रहते हैं कि बुजुर्गों को सिखाएँ. वृद्धों को भी प्रयास करना चाहिए कि वे नए तकनीकों को सीखें. आने वालों को बेहतर उन्नित वाला समाज बनाना है.

Pacemaker Follow-up Guidelines

Pacemaker is implanted if your heart beats slowly or there is a problem with the normal electrical signal which causes your heart to beat. It is implanted by a surgeon in the chest or abdomen in hospital in an operating theatre. After a pacemaker is inserted, regular follow-up visits are required. **The aim of these visits is to:-**

- assure pacemaker is functioning at it's optimal level to meet all your needs and life of the generator in the pacemaker is maximised.
- maximise the life of the device by appropriate programming and changes as needed.
- timely detect any abnormality in the pacemaker system and any complication so that treatment can be modified or started at the earliest.
- detect end-of-life of the pulse generator well in advance so that elective (nonurgent) change of the pulse generator can be done.
- detect any problems in the pacemaker battery.
- provide patient support and education.

Follow-up visit schedule:-

- Your doctor will advise you regarding the next follow-up visit before you are discharged from the hospital after pacemaker implantation. In most cases it is about a week later for a wound check. If you have any doubt regarding your follow-up appointment you can always call your doctor.
- The next follow-up visit is scheduled about 4-6 weeks later to check if the pacemaker is functioning optimally to meet your requirement. Regular follow-up visits will be needed for the rest of your life (about every 6-12 months).
- The pacemaker battery usually needs replacement about every 5-10 years. Your doctor will arrange for elective (nonurgent) change of the battery when necessary. During the follow-up visits you will be connected to a heart monitor and pacemaker programmer to check if the pacemaker is functioning optimally to maximise the longevity of the pacemaker. Your doctor will make changes in the pacemaker settings as needed. You should carry the most current identification card and the most current pacemaker program with you at all times.

Sleeping Less Than 8 Hours a Night Can Lead to Depression

Are you in the habit sleeping less than eight hours a night? Beware, you may be at risk of suffering from depression and anxiety, according to a study. Regular sleep disruptions can increase the difficulty in shifting attention away from negative thoughts. While other people may be able to move on from their negative thoughts, people low on sleep can have trouble ignoring it. This means that inadequate sleep is part of what makes negative intrusive thoughts

stick around and interfere with people's lives, the researchers said. "We found that people have some tendencies to have thoughts get stuck in their heads, and their elevated negative thinking makes it difficult for them to disengage with the negative stimuli that we exposed them to," said Meredith Coles, Professor at the Binghamton University. "These negative thoughts are believed to leave people vulnerable to different types of psychological disorders,

such as anxiety or depression," Coles added. For the study, published in the journal ScienceDirect, the team assessed the timing and duration of sleep in individuals with moderate to high levels of repetitive negative thoughts (e.g., worry and rumination). The participants were exposed to different pictures intended to trigger an emotional response, and researchers tracked their attention through their eye movements. The timing and duration of sleep may also contribute to the development or maintenance of psychological disorders, a finding that could potentially allow psychologists to treat anxiety and depression by shifting patients' sleep cycles to a healthier time or making it more likely a patient will sleep when they get in bed, the researchers said.

हार्ट का ख्याल रखती है राई

सभी घरों में राई का इस्तेमाल खाने में किया जाता है. इसके कई स्वास्थ्य लाभ होते हैं. लेकिन राई को अलग तरीके से यूज किया जाये तो इससे हार्ट अटैक जैसी समस्याएँ भी दूर की जा सकती हैं. राई में कॉपर, आयरन, मैग्नेशियम और सेलेनियम जैसे तत्व होते हैं. जो शरीर को कई तरह की प्रोब्लम्स से बचाने में सहायक होते हैं. 2 चम्मच राई को पीसकर पेस्ट बनायें और उससे हाथों और पैरों पर मालिश करें. दिल की समस्याओं में राहत मिलेगी. राई का पेस्ट रोजाना सिर पर लगाने से सिरदर्द यानी माइग्रेंड में राहत मिलती है. 1 कप गुनगुने पानी में आधा चम्मच राई मिलाकर पीने से दस्त में आराम मिलता है. राई को पीसकर उसमें कपूर मिलाएँ. इस पेस्ट से जोड़ों पर मालिश करने पर आराम मिलेगा. कान दर्द होने पर राई के तेल को गर्म करके 2 या 3 बूँद कान में डालें. इसके कुछ देर बाद साफ कर लें. दर्द में आराम मिलेगा. राई के तेल में बारीक नमक मिलाकर मंजन करने से दाँत दर्द में राहत मिलकर पायरिया से भी मुक्ति मिलती है.

सात रोगों की एक स्वादिष्ट दवा है

जामुन का रस

सुनकर आपको भले ही थोड़ा अलग लगे, लेकिन जामुन का जूस न केवल गजब का स्वादिष्ट होता है, बल्कि इसके कई तरह के फायदे भी होते हैं. सबसे बड़ी बात यह है कि कुछ खास स्थानों पर इसे परोसने का तरीका भी लाजवाब है, जिसमें काले नामक का टिक्स्ट के साथ पेश किया जाता है. आप जब भी इसे ट्राई करेंगे, इसका स्वाद कभी नहीं भूल पायेंगे इसके यह सात लाभ भी जरूर लीजिये. भूख न लगना - अगर आपको भूख कम लगती है या आजकल भूख लग ही नहीं रही, तो एक बार जरूर इस स्वादिष्ट उपाय को आजमा लीजिये कुछ दिनों तक इसका सेवन कीजिये और जादुई लाभ खुद देखिये. • कब्ज - कब्ज के अलावा पेट के अन्य रोगों में भी जामुन का रस बेहद फायदेमंद है. खासतौर से जामुन का सिरका इन रोगों के लिये अमृत के समान असर करता है. • मधुमेह - मधुमेह यानि डायबिटीज के रोगियों के लिये जामुन का रस काफी लाभदायक है जामुन और आम का रस बराबर मात्रा में मिलाकर पीने से भी मधुमेह में लाभ होता है. • उल्टी दस्त - जामुन के एक किलोग्राम ताजे फलों का रस निकालकर ढाई किला. ग्राम चीनी मिलाकर शरबत जैसी चाशनी बना लें इसे एक ढक्कनदार साफ बोतल में भरकर रख लें जब कभी उल्टी - दस्त या हैजा जैसी बीमारी की शिकायत हो, तब दो चम्मच शरबत और एक चम्मच अमृतधारा मिलाकर पिलाने से तुरन्त राहत मिल जाती है.

अमरूद

'अमरूद':- भारत, पाकिस्तान और बंगलादेश में पाया जाता है. इसका स्वभाव प्रथम श्रेणी में सर्द (शीतल) व तर (आद्र) है. इसका फल और इसके पत्ते दवा के रूप में इस्तेमाल किये जाते हैं. अमरूद हृदय व मस्तिष्क को शक्ति देता है, कॉलेस्ट्रॉल को कम करता है और कब्ज को तोड़ता है. इसके पत्तों का जोशांदा (काढ़ा) गले की खराश और नजले में बहुत लाभकारी है.

मसाला के साथ, दवा भी है लौंग, इन रोगों का करें उपचार

लौंग मसाला होने के साथ-साथ बेहतरीन औषधि भी है। यह चटपटी, कड़वी और तासीर में ठंडी होती है। लौंग नेत्र रोगों, दाँतों की समस्या, खाँसी, अजीर्ण, गैस, भोजन में अरुचि, उल्टी और अधिक प्यास लगने की तकलीफ में उपयोगी है। लौंग को मिश्री के साथ पीसकर चाटने से गर्भावस्था में उल्टियाँ, जी घबराना और भोजन में अरुचि दूर होती है। खाने के बाद दो लौंग मुँह में रखकर चूसते रहने से पेट का तनाव कम होता है, आँतों में भोजन की पाचन गति बढ़ती है और आफरा, डकारें व गैस की समस्या दूर होती है। इसका तेल गठिया, सिरदर्द में लाभदायक होता है। कैंबिटी होने पर रूई की फुरेरी बनाकर रखने से दाँत दर्द में आराम मिलता है। लौंग खाने से दाँतों की बदबू, साँस की दुर्गंध और पायरिया रोग में राहत मिलती है। खाँसी, जुकाम, सिरदर्द में लौंग, तुलसी के पत्ते और अदरक वाली चाय फायदा करती है। लौंग को मुँह में रखकर चूसने से खाँसी आनी बंद हो जाती है। **प्रयोग:-** लौंग का इस्तेमाल मंजन, पेस्ट, गोलियाँ, चूर्ण और चटनी आदि रूप से किया जाता है पुलाव, खिचड़ी, केसरिया मीठा भात, कढ़ी, मठरी, गट्टे की सब्जी आदि व्यंजनों में स्वाद और सुगंध बढ़ाने के लिये इसका प्रयोग किया जा सकता है। पान में भी लौंग डाली जाती है। मुँह पर होने वाले कील-मुँहासों के लिये लौंग को साफ जगह पर पानी में घिस लें इस लेप को लगाने से लाभ होगा।

Food Poisoning

Food poisoning is a condition caused by ingesting food contaminated by bacteria. These bacteria produce toxins which are very harmful for the human body. Although we have an inbuilt system within our stomach to inhibit the growth of these bacteria, in some cases we end up ingesting such large quantities of the bacterium that it causes illness. Generally caused by bacteria such as Salmonella, E. coli, Campylobacter or Clostridium perfringens, food poisoning is usually caused by eating food that is prepared under unsanitary conditions. The treatment options available in such a condition is usually very simple. Your doctor will prescribe medicines that will control your vomiting or diarrhea, fever, combined with a round of antibiotics. In case you don't feel better even after taking the medicine, you will be asked to get a few blood tests done like a CBC, and to give a stool sample. The CBC will help identify if there is still an infection in the body and the stool sample will help identify exactly which organism has caused the food poisoning. A common precaution your doctor will take, is to prescribe rehydrating agents, and advice you to drink a lot of water. This not only helps rehydrate your body but will also help flush out the toxins faster. Oral rehydration Therapy or ORS is an essential part of treating food poisoning. This is because when a person suffers from diarrhea and/or vomiting, he/she loses not only water but a number of essential salts and minerals from the body. This rapid loss of nutrients could send the body into shock causing a shut down in the main functions of the body. There are a number of commercial Oral rehydrating agents available in the market. All you need to do is add it to a litre of boiled water and keep sipping the solution throughout the day. Another natural option is to have nimbu pani with salt and sugar or coconut water. Both these substitutes are cheap yet effective methods of rehydration.

PRIDE PHARMA

(An ISO 9001:2008 Certified Co.)

With the Wide Range of:

- * Tablets
- * Capsules
- * Protein Powder
- * Syrup
- * Injection
- * Herbal Products
- * Dry Syrup
- * Ointments

गर्म या ठन्डा कौन सी सिकाई करने पर आपको होगा फायदा?

चोट या जोड़ों के दर्द के लिये ठन्डा या गर्म सेंक करना आसान उपाय माना जाता है। लेकिन यह जानना भी जरूरी है कि कब और किस दर्द में कौन सी सिकाई करनी चाहिये। घुटनों, कंधों, कोहनी व अंगुलियों के जोड़ों में उतकों का घिस जाने पर गर्म पानी से सेंक करने पर जोड़ों व मांसपेशियों की अकड़न दूर होती है। बाँडों में यूरिक एसिड की मात्रा बढ़ने से पैर के अंगूठे, कोहनी व एड़ी में अचानक दर्द उठने पर बर्फ से सेंक करने से अचानक उठे दर्द से छुटकारा पाया जा सकता है। तंत्रिकाओं व रक्त वाहिकाओं से सिर दर्द सा मांसपेशियों में खिंचाव से गले में दर्द होने से बर्फ से सेंक करने से सिरदर्द में राहत मिलती है और गर्म पानी के सेंक से गले के दर्द में आराम।

Health Risks of using Anti-Ageing Products

It's easy to be captivated by alluring promises made by anti-ageing products. After all, who wouldn't want a cream to fight those pesky free radicals and stimulate skin's natural collagen production? According to the American Academy of Dermatology, consumers spend billions of dollars every year on such creams and lotions. **Anti-ageing products can be tricky:** Women need to understand that many creams, lotions and vitamin supplements in the market that claim to reduce wrinkles and slow down premature ageing don't have sufficient evidence to prove their claims. While some active ingredients used in anti-ageing products are safe and effective, the trick is to find a product with the right ingredients that also work well with your skin. Also known as "cosmeceuticals," anti-ageing products modify the physical structure of skin with chemicals so as to lend you a more youthful skin. But, that look comes at the cost of your skin and more so your health. FDA does not recognize a category as cosmeceuticals, which refer to age-defying products. Obviously, this class of topically applied products aren't subjected to the range of rigorous clinical studies that the FDA requires of prescription drugs. In short, there's scant evidence that these so-called age-defying cosmetics actually work. **How anti-ageing products harm you:** Anti-ageing products can actually do more harm than good. They typically contain hydroxyl acids, which work to increase permeability of skin and allow anti-ageing ingredients to pass through. Unfortunately, this translates to robbing the skin of its protective layers. This makes you susceptible to sunburn and malignant melanoma. Bisbolol is another ingredient found in anti-ageing products, which has similar use and effect. Limonene, also commonly found in age-defying products is not just an irritant but also a carcinogen. All these chemicals present in cosmetic products have been found in biopsies from breast tumours. Infamous for disturbing the hormone function, they should especially be avoided by pregnant women. According to Dr Sam Epstein, chairman of the US Cancer Prevention Coalition, the active ingredient alpha-hydroxy acids (AHAs), found in many leading brands of facial creams, are "probably the most dangerous cosmetic products on the market". Dr Epstein, who is Professor emeritus of environmental and occupational health at the University of Illinois, added: "Anything that strips the surface of the skin not only risks sunlight penetrating the exposed layer but also allows other toxic products in. All of the toxic effects are massively increased by AHAs." Dermatologists and experts say that good skincare habits are better than resorting to anti-ageing products. Take the natural route to building your skin's elasticity and overall health. Drink enough water, exfoliate and moisturize properly and apply sunscreen liberally.

Success Rate of Frozen Embryos as Good as Fresh Ones in IVF Pregnancies

The researchers noted that their results are specific to a common freezing method known as Cryotech vitrification, so it may not apply to all embryo freezing techniques currently being used. The process of having babies through a frozen embryo transfer (FET) is swiftly gaining acceptance around the world. FET is a cycle where a frozen embryo from a previous fresh IVF cycle is thawed and transferred back into a woman's uterus. However, many women going in for in vitro fertilization (IVF) are rather wary about the success of frozen embryos in the process as compared to the transfer of fresh embryos. To curb these concerns, researchers on Wednesday said that the success rate of frozen embryo transfers for IVF is almost the same as, or even better than, those using fresh ones. "Frozen embryo techniques are growing in popularity in fertility clinics worldwide," lead author Lan Vuong from the University of Medicine and Pharmacy at Ho Chi Minh City said in a statement. "This is one of the reasons why our research is important for fertility clinicians and researchers, and of course couples who are hoping to have a child," Xinhua quoted

Vuong as saying. The study investigated almost 800 women who had infertility not related to polycystic ovarian syndrome (PCOS), a common health problem caused by an imbalance of reproductive hormones that can lead to infertility. Women in the study were given one cycle of IVF, where either a transfer of fresh embryos occurred, or all embryos were frozen and one cycle of thawed embryos occurred subsequently without the use of IVF drugs. After the first completed cycle of IVF, ongoing pregnancy occurred in 36 per cent of women in the frozen embryo group, and in 35 per cent of the fresh embryo group. Rates of live birth after the first embryo transfer were 34 percent in the frozen embryo group, and 32 percent in the fresh embryo group. Vuong's work, conducted in collaboration with Professor Ben Mol from the University of Adelaide in Australia, was published

Available on PCD/Franchisee distribution in unrepresented areas

All Marketing Aids Like:

The New England Journal of Medicine. "Previous research has shown that women who experience infertility because of PCOS benefit from significantly higher live birth rates from frozen embryos in IVF procedures," said Mol. "This new study shows that infertile women not suffering from PCOS have equivalent live IVF birth rates from frozen embryos, which is important news for infertile women worldwide," he said. "Our key finding is that freezing embryos for IVF is not harming a couple's chances of having a baby. After the first fresh embryo transfer, it will be possible to freeze the remaining embryos and transfer them one by one, which is safe and effective." The researchers noted that their results are specific to a common freezing method known as Cryotech vitrification, so it may not apply to all embryo freezing techniques currently being used. Additionally, couples concerned about unnecessary costs of freezing all embryos do not need to go down that path since fresh embryo transfer will still have the same live birth success rate, they added.
