Zydus Gets Final Nod from USFDA For Antibacterial Drug

Zydus

Zydus Cadila has received the final approval from the USFDA to market Doxycycline Hydrate capsules USP, antibiotic used for treating bacterial infections, Cadila Healthcare said today. "Zydus Cadila has received the final approval from the USFDA to market Doxycycline Hydrate Capsules USP, 50 mg and 100 mg," the company said in a regulatory filing. It is a tetracycline antibiotic used for the treatment of a wide variety of bacterial infections, including those that cause acne. Mob:- 9794865080, 7897000944, 7926868100, 9634005665, 9887223528, 9319727603.

GLENMARK PHARMACEUTICALS RECEIVES ANDA APPROVAL FOR HAILEYTM

MUMBAI:- GLENMARK PHARMACEUTICALS INC., USA (GLENMARK) MOB:- 09899012451, 09999442531, 08010124036, 09811902296, 09719102296, 09833061780G HAS BEEN GRANTED FINAL APPROVAL BY THE UNITED STATES

FOOD & DRUG ADMINISTRATION (U.S. FDA) FOR HAILEYTM 1.5/30 (NORETHINDRONE ACETATE AND ETHINYLMESTRADIOL TABLETS USP, 1.5 MG/30 MCG), THE GENERIC VERSION OF LOESTRIN® 1 21 1.5/30 TABLETS, OF ALLERGAN PHARMACEUTICALS INTERNATIONAL LIMITED (ALLERGAN) AND FOR HAILEYTM FE 1.5/30 (NORETHINDRONE ACETATE AND ETHINYLMESTRADIOL TABLETS, USP AND FERROUS FUMARATE TABLETS, 1.5 MG/30 MCG), THE GENERIC VERSION OF LOESTRIN® FE 1.5/30, ALSO OF ALLERGAN. ACCORDING TO IQVIA SALES DATA FOR THE 12 MONTH PERIOD ENDING APRIL 2018, THE LOESTRIN® 21 1.5/30 TABLETS MARKET2 ACHIEVED ANNUAL SALES OF APPROXIMATELY \$24.2 MILLION* AND THE LOESTRIN® FE 1.5/30 MARKET ACHIEVED ANNUAL SALES OF APPROXIMATELY \$41.3 MILLION. GLENMARK'S CURRENT PORTFOLIO CONSISTS OF 137 PRODUCTS AUTHORIZED FOR DISTRIBUTION IN THE U.S. MARKETPLACE AND 61 ANDAS PENDING APPROVAL WITH THE U.S. FDA. IN ADDITION TO THESE INTERNAL FILINGS, GLENMARK CONTINUES TO IDENTIFY AND EXPLORE EXTERNAL DEVELOPMENT PARTNERSHIPS TO SUPPLEMENT AND ACCELERATE THE GROWTH OF ITS EXISTING PIPELINE AND PORTFOLIO.

Dr Reddy's Expects to Launch Over 15 Products In US in FY'19

Dr Reddy's Laboratories expects to launch over 15 products in the US market in 2018-19, according to a top company official. The Hyderabad-based drug major also remains optimistic for a double digit growth in the domestic market in the ongoing financial year. "Normally every year, based on our portfolio and R&D investments, we prepare for 10 to 15 launches. But this year (2018-19), it could be 15 plus," the company's CFO Saumen Chakraborty told analysts in a call. The company, which launched three products in the US during March Quarter of 2017-18, has over 100 abbreviated new drug applications (ANDAs) lined up for approval with the US Food and Drug Administration (USFDA). "we have over 100 ANDAs pending, many of them first-to-file, many of the complex assets, both at the API Level as well as the finished dosage level," CEO GV Prasad said. When asked about steps being taken by the company regarding regulatory issues at its two sites, Prasad said FDA has asked drug maker for information on Srikakulam (Andhra Pradesh) facility.

Lupin Launches Generic Methylergonovine Maleate Tabs USP in the US

LUPIN

Mumbai:- Pharma major Lupin announced the launch of its Methylergonovine Maleate Tabs USP, 0.2 mg, having received an approval from the United States Food and Drug Administration (FDA) earlier. Lupin's Methylergonovine Maleate Tabs USP, 0.2 mg, is the generic equivalent of Novartis Pharmaceuticals Corporation's Methergine®. It is indicated for the prevention and control of postpartum hemorrhage. Methylergonovine Maleate Tabs USP, 0.2 mg, had annual sales of approximately USD 71.5 million in the US (IQVIA MAT April 2018). About Lupin Limited:- Lupin is an innovation led transnational pharmaceutical company developing and delivering a wide range of branded & generic formulations, biotechnology products and APIs globally. The Company is a significant player in the Cardiovascular, Diabetology, Asthma, Pediatric, CNS, GI, Anti-Infective and NSAID space and holds global leadership position in the Anti-TB segment. Easy Exercises For Back Pain Relief

Back pain problems are amongst the most common medical conditions faced by millions. Fortunately, they are treatable, especially if the causes are diagnosed. Some of the common causes are muscle strain, ruptured disc, constricted spinal canal and osteoporosis. Most people recover without medication or surgery by not straining the spine, using ice packs or hot water bottles to ease the pain. An easy method of relief from back pain is with the help of exercises; some simple examples follow: **Lying on the back:-** Lie with your back on the floor with pillows under your head. Place a chair close enough to enable you to bend your knees and rest them on the seat of the chair. This takes pressure off the back. **Bending from a chair:-** Sit on a chair and lean forward to stretch, placing the palms on the feet, while keeping the head down and the neck relaxed. Hold this position for ten to thirty seconds. Then use your hands to push yourself upright. This exercise is to be repeated thrice at a stretch. **Cat bend:-** Begin this exercise by getting down on the hands and knees. Arch the upper back upwards, put your head down and contract your stomach muscles. This position should be held for five seconds. Continue by raising your head and dropping your back to the original position, taking care that the pelvis is not pushed forward to avoid a swayback. This position should be held for fifteen seconds and repeated three times at one go. **Single knee to chest:-** Lie flat on your back, then raise and pull your right knee forward towards your chest using your hands. Hold this position for ten seconds. This knee should then be put back on to the floor. Next, the left knee should be pulled forward to the chest in the same manner and held in that position; following this the legs are lowered. This exercise should be repeated thrice on each side. **Mid back stretch:-** In this exercise the person should stand upright with hands on the hips, and knees shoulder width apart. Following this, twist from the waist towards the right and turn your neck in the same direction as far as you can manage with comfort. Hold for ten seconds while breathing normally. Next do the exact opposite, this time twisting from the waist towards the left. **Tips for people suffering from back pain:-** When lifting heavy objects, do not lift by bending over, instead, bend the hips and squat. Lift heavy objects by keeping the back straight and holding the object close to the body. Do not twist the body while lifting. Push rather than pull while moving a heavy object. If you go for a long car journey or sit at a desk for extended lengths of time, try and remember to consciously take breaks and stretch. Keep in mind that flat soles with low heels help in avoiding back pain.

Biocon-Mylan Win US Nod For Another Biosimilar Drug

MUMBAI:- Biocon-Mylan Mob: 08040144014, 08028082808 won US approval for their second biosimilar drug on Tuesday, a little over six months after their first such offering was accepted. The US Food and Drug Administration approved pegfilgrastim, a drug used to increase the white blood count of cancer patients, Biocon NSE -0.44 % and Mylan said in a statement on Tuesday. The drug, branded Fulphila, is a follow-on of the medicine developed by Amgen and has a market size of \$4 billion. Biosimilars are emerging as the new class of affordable drugs that are replacing those with expired patents in the US. Unlike generic medicines, the complex molecular structure of biosimilar drugs means pharmaceutical companies have to invest in additional research to prove that the efficacy of their versions is similar to the original. Biosimilars are identical copies of highly complex biologic drugs, which are made through biotechnology, derived from natural sources or produced synthetically.

प्योरमेड लाईफकेयर का नया उत्पाद

त्वचा रोगों के लिए एक क्रीम प्रस्तुत की है-
Pramederm

Plus त्वचा की रक्षा के लिये नं. 1 उत्पाद है प्रेमिडर्म प्लस क्रीम। ● दाद, खांस, जाँघों की खुलाली एवं एलर्जी ठीक करता है। ● चेहरे के दाग, धब्बे एवं झाँझाँ दूर करता है। ● घाव, शेव कट तथा फोड़े-पूंछी में प्रभावी। ● नारुओं के संक्रमण को दूर करता है। बाजार में Pramederm Plus Cream आकर्क फैक में उपलब्ध है जिसका अधिकतम मूल्य ₹ 75.00 है।

दो तरह से वापस भी लौट आता है 'कैंसर'

कैंसर के मरीजों में इलाज के बावजूद बीमारी के फिर से होने का खतरा रहता है। दूसरी बार का कैंसर दो तरह से-पहले वाले दूसरे से भिन्न शरीर में दूसरी जगह या

किसी नए संस्थान पर फैल सकता है। पहली और दूसरी बार की बीमारी से जुड़े कारण:- खरब जीवन शैली:- यदि यह पहली बार कैंसर की वजह थी तो ठीक होने के बाद भी इसे बढ़ा खतरा माना जाता है। विश्व स्वास्थ्य संगठन के अनुसार विश्व में एक तिहाई मरीजों की मौत का यही कारण है। लिंवर, किंडी, पेट का कैंसर फैलने की

Come Associates Let's Build a Strong Nation

Long Hours of Exercise May Pose Arthritis Risk

Are you obsessed with your exercise regime? Do you often complain of joint/muscle pain, headaches, loss of appetite and find yourself vulnerable to common cold and flu? If the answer to the questions is yes then you indeed are susceptible to developing arthritis. **Over Stressing your Muscles Can be Dangerous:-** The logic is that when you exercise you exhaust your muscles but they need time to bounce back with strength. Unfortunately, when you over stress yourself it causes fatigue and your immune system goes for a toss and hence more injuries. Your body practically cannot fight infections and then major health hazard osteoarthritis strikes. In osteoarthritis cartilage prevents bones from rubbing against each other but with increased physical activity it loses elasticity and fails to act as shock absorber. **Symptoms of Osteoarthritis:-** Symptoms of osteoarthritis are: ● Joint pain/ stiff joints – Because of wear and tear of cartilage, the tenderness of joint is lost making your joints stiff and drowns you in pain ● Bone spurs/lumps around joints and in worst cases swollen joints must be immediately taken care of ● Next to zero flexibility – You might feel frustrated with your inability to perform tasks which require flexibility ● Excruciating pain while exercising and damaged tendons and ligaments aggravate pain ● Delhi based gym instructor Sunil Kumar says that "Many compel themselves to do an extra squat, extend cardio sessions or pull heavy weights. It becomes essential for gym instructors to keep a strict vigil on such people and make them understand the side-effects of over training. We give them rigorous training keeping in mind their health. Most importantly warn them against developing arthritis." **Precautionary Steps** Here are a few precautionary steps you must keep in mind: ● Proper warm up before exercise prevents injuries and informs the muscles about the exertion for a couple of minutes. Generally instructors schedule your exercises focusing on one set of muscles every day ● If you're a gym instructor then ensure that you see to it that your client has no history of arthritis. If they do then train them keeping in mind their health issues ● Avoid running and jumping because it causes friction in your bones and obviously cartilage can only absorb shock for sometime. Cycling and swimming guards your cartilage and decreases the risk of joint pain ● Cycling and swimming guards your cartilage and decreases the risk of joint pain ● Listen to your body and don't exert yourself for the hour glass/lean figure.

15 साल से कम उम्र के बच्चों में तेजी से फैल रहा है ब्लड कैंसर, ये हैं लक्षण

कैंसर के मरीज विश्वभर में तेजी से बढ़ रहे हैं. कैंसर लाईफ स्टाइल से जुड़ी बीमारी है यानि ये बीमारी इंसानों में उनके अनियमित रहन-सहन और गलत खान-पान की वजह से बढ़ रही है। मगर धीरे-धीरे ये बीमारी अनुरागिक हो गई है यानि अब छोटे-छोटे बच्चों भी इस खतरनाक और जानलेवा बीमारी का तेजी से शिकार हो रहे हैं। भारत में कैंसर के जितने मरीज आते हैं उनमें से लगभग 5% मामले 15 साल से कम उम्र के बच्चों के होते हैं। आजकल कैंसर ऐसी बीमारी बन गई है जो शरीर के प्रभावित कर सकती है। इसी के अधार पर अलग-अलग सौ से ज्यादा तरह के कैंसर अब तक पहचाने गए हैं। मगर आपको बता दें कि बच्चों में होने वाले ज्यादातर कैंसर रोगी एक ही तरह की बच्चों के शिकारी का शिकार होते हैं और वो है ब्लड कैंसर। यानि दुनियाभर में और भारत में बच्चों में होने वाला ब्लड कैंसर या ल्यूकीमिया तेजी से बढ़ रहा है। बच्चों में इस बीमारी के लक्षण पहचाना थोड़ा मुश्किल है। आमतौर पर कैंसर जब किसी अंग में आधे से ज्यादा फैल चुका होता है, तब व्यक्ति को इसका पता चलता है। क्या है ल्यूकीमिया या ब्लड कैंसर:- ल्यूकीमिया एक तरह के ब्लड कैंसर की शुरुआती स्टेज है। इसका इलाज आसानी से किया जा सकता है मगर तभी जब इस रोग के शुरुआत में ही इसका पता चल जाए, आप ठीक समय से इलाज न किया जाए तो ये एक खतरनाक और जानलेवा रोग है। ल्यूकीमिया की सही समय पर जाँच और चिकित्सा आपको जैसे कैंसर से बचा सकती है। **ल्यूकीमिया या ब्लड कैंसर के लक्षण:-** बच्चों में ल्यूकीमिया यानि ब्लड कैंसर के लक्षणों को पहचानना थोड़ा मुश्किल है। लेकिन इन लक्षणों पर ध्यान देकर आप आप तुरंत चिकित्सक से संपर्क करें, तो शायद इस खतरनाक रोग से आप अपने बच्चों को बचा पाएंगे। ● बार-बार एक ही तरह का संक्रमण होना। ● बहुत तेज बुखार होना। ● रोगी का इम्यून सिस्टम कमजोर होना। ● हर समय थकान और कमजोरी महसूस करना। ● एनीमिया होना। ● नाक-मस्तूड़ इत्यादि से खून बहने की शिकायत होना। ● प्लस्टलेट्स का गिरना। ● शरीर के जोड़ों में दर्द होना। ● हड्डियों में दर्द की शिकायत होना। ● शरीर के विभिन्न हिस्सों में सूजन आना। ● शरीर में जगह-जगह गांठों के होने का महसूस होना। लीवर संबंधी समस्याएँ होना। ● अकसर सिरदर्द की शिकायत होना। या फिर माइग्रेन की शिकायत होना। ● पक्षाधात यानि स्ट्रोक होना। ● दौरा पड़ना या किसी चीज के होने का बार-बार भ्रम होना। ● यानी कई बार रोगी मानसिक रूप से परेशान रहने लगता है। ● उल्टियाँ आने का अहसास होना या असमय उल्टियाँ होना। ● त्वचा में जगह-जगह रेशेज की शिकायत होना। ● ग्रॉथिंग्स/लैंड्रेस का सूज जाना। ● अचानक से बिना कारणों के असामान्य रूप से बजन का कम होना। ● जबड़ों में सूजन आना या फिर रक्त का बहना। ● भूख ना लगने की समस्या होना। ● यदि चोट लगी है तो चोट का निशान पड़ जाना। ● किसी घाव या जख्म के भरने में अधिक समय लगना।

Dr. Ganga Prasad Gupta & Sons

सुख-सूत्र

यदि हम चाहते हैं कि हमारी जिंदगी हँसी-खुशी एवं आसानी से कटे तो निम्न वातों का अनुसरण करें:- भगवान हमें जिस हाल में रखें तो उसका शुक्राना करना सीखें। शुक्राना करने से कट्ट भी हँसते हैं। जिसे बढ़ती ही है लेकिन डॉक्टरों का मानना है कि कई बार की जीवनकाल के बढ़तों ही जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो डॉक्टर के बताए अन्य जारी अथवा व्यवस, अनियमित व्यवस, खरबार खाननपान, शारीरिक श्रृंगार की कमी व प्रदूषण, बढ़ती उम्र- हमरे शरीर में कैंसर को नियंत्रित करने वाले जीन्स बढ़ती उम्र के साथ धीरे-धीरे कमजोर भड़ने लगते हैं। जिससे इसकी आशंका भी बढ़ जाती है। खतरा क्या:- इलाज से बढ़ती जीवनकाल के बढ़तों ही है लेकिन डॉक्टरों का मानना है कि कई ग्रीष्मीयों, रेडिएशन व अन्य तरीकों से इलाज के बढ़तों जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो आपको अन्य जारी अथवा व्यवस, अनियमित व्यवस, खरबार खाननपान, शारीरिक श्रृंगार की कमी व प्रदूषण, बढ़ती उम्र- हमरे शरीर में कैंसर को नियंत्रित करने वाले जीन्स बढ़ती उम्र के साथ धीरे-धीरे कमजोर भड़ने लगते हैं। जिससे इसकी आशंका भी बढ़ जाती है। खतरा क्या:- इलाज से बढ़ती जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो आपको अन्य जारी अथवा व्यवस, अनियमित व्यवस, खरबार खाननपान, शारीरिक श्रृंगार की कमी व प्रदूषण, बढ़ती उम्र- हमरे शरीर में कैंसर को नियंत्रित करने वाले जीन्स बढ़ती उम्र के साथ धीरे-धीरे कमजोर भड़ने लगते हैं। जिससे इसकी आशंका भी बढ़ जाती है। खतरा क्या:- इलाज से बढ़ती जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो आपको अन्य जारी अथवा व्यवस, अनियमित व्यवस, खरबार खाननपान, शारीरिक श्रृंगार की कमी व प्रदूषण, बढ़ती उम्र- हमरे शरीर में कैंसर को नियंत्रित करने वाले जीन्स बढ़ती उम्र के साथ धीरे-धीरे कमजोर भड़ने लगते हैं। जिससे इसकी आशंका भी बढ़ जाती है। खतरा क्या:- इलाज से बढ़ती जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो आपको अन्य जारी अथवा व्यवस, अनियमित व्यवस, खरबार खाननपान, शारीरिक श्रृंगार की कमी व प्रदूषण, बढ़ती उम्र- हमरे शरीर में कैंसर को नियंत्रित करने वाले जीन्स बढ़ती उम्र के साथ धीरे-धीरे कमजोर भड़ने लगते हैं। जिससे इसकी आशंका भी बढ़ जाती है। खतरा क्या:- इलाज से बढ़ती जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो आपको अन्य जारी अथवा व्यवस, अनियमित व्यवस, खरबार खाननपान, शारीरिक श्रृंगार की कमी व प्रदूषण, बढ़ती उम्र- हमरे शरीर में कैंसर को नियंत्रित करने वाले जीन्स बढ़ती उम्र के साथ धीरे-धीरे कमजोर भड़ने लगते हैं। जिससे इसकी आशंका भी बढ़ जाती है। खतरा क्या:- इलाज से बढ़ती जीवन शैली- यदि यह पहले इलाज से ठीक हो चुके हैं तो आपको अन्य जारी अथवा व्यवस, अनियमित व्यव

ब्रेन ट्यूमर क्या है? एक्सपर्ट से जानें इसके कारण, लक्षण और उपचार

घातक बीमारी माना जाने वाला मरिटिक का ट्यूमर अब भी चिंता का मुद्दा बना हुआ है। इस चिंता का मुख्य कारण काफी हद तक इसके रोगियों के जीवित रहने की संभावना का कम होना है। ऐसा इसलिए व्हायोंकि ब्रेन ट्यूमर के बहुत कम मरीज लंबी जिंदगी जी पाते हैं। हालांकि समय-समय पर मैटीकल साइंस में इस संबंध में कई अभूतपूर्व प्रगति हुई हैं, जिनसे इस मर्ज का समय पर जल्द निदान करना और इसका सफलतापूर्वक इलाज करना आसान हो गया है। **ब्रेन ट्यूमर क्या है:-** ब्रेन ट्यूमर मरिटिक में असामान्य कोशिकाओं का एक संग्रह या पिंड है। खोपड़ी (स्कल) के अंदर असामान्य कोशिकाओं की वृद्धि समस्या पैदा कर सकती है। ब्रेन ट्यूमर कैंसरजन्य (मैलिनेट) या कैंसर रहित (बिनाइन) हो सकता है। जब मैलिनेट ट्यूमर बढ़ते हैं, तो वे आपकी खोपड़ी के अंदर दबाव बढ़ा सकते हैं, ये मरिटिक को नुकसान पहुंचा सकते हैं और ये जीवन को खतरे में डाल सकते हैं। ब्रेन ट्यूमर व्यस्कों और बच्चों दोनों में हो सकता है। **ब्रेन ट्यूमर के लक्षण:-** ब्रेन ट्यूमर के सबसे आम लक्षणों में से एक सिरदर्द का बढ़ा होता है। यह सिरदर्द सुबह के समय अधिक तेज़ होता है। ● जो मिचलाना और उल्ली की समस्या हो सकती है। ● हाथों और पैरों में कमज़ोरी महसूस होता है। ● शरीर का संतुलन साधने में दिक्कत। ● देखने या सुनने में कठिनाई होता है। ● मर्ज का पाता:- ब्रेन ट्यूमर के निदान के लिए सबसे पहले शारीरिक परीक्षण किया जाता है जिसके तहत ताँकिका तंत्र का विस्तृत परीक्षण किया जाता है। आपके डॉक्टर यह देखने के लिए एक परीक्षण करते हैं कि आपके क्रैनियल तंत्र सही हैं या नहीं। यहीं वे नर्व हैं जो आपके मरिटिक से उत्पन्न होती हैं। शारीरिक परीक्षण के बाद रोग का पता चलता है। सीटी स्कैन, एम-आर-आई, एंजियोग्राफी या सिर की बॉयोप्सी की जा सकती है। **बात उपचार की:-** ब्रेन ट्यूमर का इलाज सर्जरी, रेडिएशन, कीमोथेरेपी जैसे पारंपरिक तरीकों का उपयोग करके किया जाता रहा है, लेकिन आपन ब्रेन सर्जरी से मरिटिक में अंदरूनी रक्तस्राव, याहात में कमी या संक्रमण जैसे कई खतरे भी सामने आते थे, यहाँ तक कि थोड़ी सी ट्रिटी के भी गंभीर परिणाम हो सकते हैं और स्थायी समस्याएँ पैदा हो सकती हैं। **न्यूरोनेविगेशन से सर्जरी:-** इन दिनों डायग्नोसिस और इलाज के अल्ट्याधुनिक तरीकों की बांदौलत ब्रेन ट्यूमर को हटाना और रोगी के जीवन काल को बढ़ाना संभव हो चुका है। न्यूरोनेविगेशन तकनीक सर्जन को मरिटिक में ट्यूमर को हटाने में कहीं ज्यादा सक्षम बनाती है। यह तकनीक जीपीएस के समान है। यह एक कंप्यूटर आधारित प्रोग्राम है जो कंप्यूटर सिस्टम पर एम-आर-आई। और सीटी स्कैन की छवियों को दर्ज करता है। एक बार जब सूचना को एक विशेष वर्क-स्टेशन में फीड कर दिया जाता है, तब सिस्टम एम-आर-आई छवियों के साथ-साथ ऑपरेटिंग रूम में रोगी के नाक और भौंह जैसे बाहरी क्षेत्रों को विकराने का काम करता है और अंकड़ों को दो सेरे में मिलान करता है। इस तकनीक से सर्जरी को स्टीकी चीरा लगान में मदद मिलती है, जिससे सर्जरी तरह से बाल हटाने की जरूरत नहीं पड़ती है। न्यूरोनेविगेशन का मरिटिक और रीढ़ की सर्जरी के दोनों धीरे-धीरे बढ़े पैमाने पर उपयोग किया जा रहा है। सही समय पर हो रोग का निदान:- सीनियर न्यूरो स्पेशलिस्ट डॉ. मनीष वैश के मुताबिक, कैंसरयुक्त ट्यूमर को उपर किंवित होने के तरीके के आधार पर दो श्रेणियों में बाटा जाता है। जो ट्यूमर सीधे मरिटिक में विकसित होते हैं, उन्हें प्राइम। रो ब्रेन ट्यूमर कहते हैं और जो शरीर के दूसरे भाग से मरिटिक में फैल जाते हैं उन्हें सेंकंडरी या मेटास्टैटिक ब्रेन ट्यूमर कहा जाता है। प्राइमरी ब्रेन ट्यूमर आम तौर पर युवाओं का ज्यादा प्रभावित करता है। अन्य ट्यूमर की तरह प्रत्येक स्टेज पर इसके अलग-अलग प्रभाव देखने को मिलते हैं। इस मैलिनेट ट्यूमर (कैंसर सेल्स से निर्भित) के मामले में रोगी का एडवांस कीमोथेरेपी और सर्जिकल तकनीकों की मदद से इलाज किया जाता है। इससे रोगी की तीन साल तक उम्र बढ़ सकती है, इसके अलावा बिनाइन ट्यूमर होते हैं, जो आमतौर पर बुजुर्गों में पाए जाते हैं और इसका इलाज ट्यूमर के आकार को देखकर किया जाता है। इसके इलाज में सर्जरी या फिर गामानाइफ का सहारा लिया जाता है। अगर रोगी के ब्रेन ट्यूमर का जल्द पता चल जाता है, तो दवाओं व आधुनिक थेरेपी जैसे माइक्रोसर्जरी, इमेज गाइडेड सर्जरी, एंडोस्कोपिक सर्जरी और रेडियोथेरेपी से भी बीमारी को ठाक करने की कोशिश की जाती है।

लेसिक आई सर्जरी के फायदे और नुकसान

जो लोग चश्मा पहनते हैं, लेकिन चश्मा नहीं पहनना चाहते हैं वह लेसिक आई सर्जरी के बारे में सोच सकते हैं। लेसिक सर्जरी दूर की दृष्टि के लिए किया जाता है। लेकिन हर किसी को लेसिक सर्जरी नहीं करवानी चाहिए। लेसिक सर्जरी 30 मिनट या उससे कम समय में हो जाती है। साथ ही यह सर्जरी आँखों के लिए काफी प्रभावी और कारगार मानी गई है, जिस कारण अधिकतर लोग आँखों के लिए लेसिक सर्जरी करने की हिदायत देते हैं। ज्यादातर लोग आँखों की समस्या से निजात पाने के लिए लेसिक सर्जरी का ही सहारा लेते हैं, व्हायोंकि ये आँखों की दृष्टि के लिए काफी फायदेमंद होती है और किसी भी अन्य सर्जरी की तुलना में असान और किफायती होती है। लेसिक सर्जरी दृष्टि से जुड़ी सभी समस्याओं और खतरों को काफी हद तक दूर कर देती है। लेसिक कहते हैं न हर चीज के फायदे के साथ नुकसान भी होता है। हालांकि खतरे बहुत कम होते हैं। लेसिक सर्जरी आँखों के सबसे संवेदनशील हिस्से में की जाती है और इसे दोबारा नहीं किया जा सकता है। इसे करवाने से आँखों में ड्राइनेस आ जाती है। बहुत कम मामलों में आँखों में इफेक्शन भी हो सकता है।

संस्कार

वे अपनी बड़ी सी कार में अपने बेटे को समझा रहे थे, “बेटे, संस्कारों का ध्यान रखो। अपने परिवार की इज्जत की सोचो। ये अपशब्द की भाषा मत बोला करो।” “इनमें कार के सामने एक पागल आ गया। जोरों का ब्रेक लगा, गाड़ी के काँच नीचे हुए और आदानी पर गालियों की बौछार कर दी।

डॉ. नरेन्द्र नाथ लाहा, ग्वालियर (मङ्ग.)

Smoking And Diabetes Linked To Brain Calcifications

People who smoke or have diabetes may be at increased risk of calcifications in a region of the brain crucial to memory. Dementia is a major public health problem that affects tens of millions of people worldwide. One focus of dementia research has been the hippocampus, a brain structure important for both short- and long-term memory storage. Alzheimer's disease, the most common type of dementia, is associated with atrophy of the hippocampus. Researchers have hypothesized that abnormal buildups of calcium, or calcifications, in the hippocampus may be related to vascular problems that could contribute to hippocampal atrophy and subsequent cognitive deterioration. However, published research on the association between hippocampal calcification and cognitive impairment is limited. "We know that calcifications in the hippocampus are common, especially with increasing age," said the study's lead author, Esther J.M. de Brouwer, M.D., a geriatrician at the University Medical Center in Utrecht, the Netherlands. "However, we did not know if calcifications in the hippocampus related to cognitive function." Advances in imaging have provided opportunities to explore the role of hippocampal calcifications in dementia. The development of multiplanar brain CT scans has enabled better distinction between hippocampal calcifications and calcifications in nearby brain structures like the choroid plexus. "A multiplanar CT scan makes it possible to see the hippocampus in different anatomical planes; for example, from top to bottom, right to left and front to back," Dr. de Brouwer said. "Before multiplanar CT scans, hippocampal calcifications were often mistaken for choroid plexus calcifications. So with multiplanar CT scans, hippocampal calcifications are better distinguished from calcifications in other areas." Dr. de Brouwer and colleagues studied the association between vascular risk factors like high blood pressure, diabetes and smoking, and hippocampal calcifications. They also assessed the effects of calcifications on cognitive function. The study group included 1,991 patients, average age 78 years, who had visited a memory clinic at a Dutch hospital between 2009 and 2015. The patients had a standard diagnostic workup including cognitive tests and brain CT scans. The researchers analyzed the CT scans for the presence and severity of hippocampal calcifications. Of the 1,991 patients, 380, or 19.1 percent, had hippocampal calcifications. Older age, diabetes and smoking were associated with an increased risk of hippocampal calcifications on CT scans. While the study was not designed to conclusively determine if smoking and diabetes increase the risk of hippocampal calcifications, the results strongly suggest a link. "We do think that smoking and diabetes are risk factors," Dr. de Brouwer said. "In a recent histopathology study, hippocampal calcifications were found to be a manifestation of vascular disease. It is well known that smoking and diabetes are risk factors for cardiovascular disease. It is, therefore, likely that smoking and diabetes are risk factors for hippocampal calcifications." There was no link between the presence and severity of hippocampal calcifications and cognitive function; a surprising finding, according to Dr. de Brouwer, with several possible explanations. "The hippocampus is made up of different layers, and it is possible that the calcifications did not damage the hippocampal structure that is important for memory storage," she said. "Another explanation could be the selection of our study participants, who all came from a memory clinic." The researchers plan to carry out additional studies in different groups of people to better understand possible links between these calcifications and cognitive problems.

ब्रेन स्ट्रोक का कारण बनता है हाई ब्लड प्रेशर, ऐसे करें बचाव

आम तौर पर लोग अचानक होने वाले तेज सिरदर्द को हल्के में लेते हैं। वे सोचते हैं कि यह अपने-आप ठीक हो जाएगा। ज्यादातर लोग ऐसे अनुभवों से गुजर भी चुके होंगे, लेकिन कई बार सिरदर्द का कारण आपके उच्च रक्तचाप (हाई ब्लडप्रेशर) से भी हो सकता है। इस कारण स्ट्रोक या ब्रेन अटैक होने की आशंका बढ़ सकती है। हो सकता है कि कई वर्षों पहले आपका रक्तचाप अनियमित रहा हो और अब यह सिरदर्द के लक्षण के तौर पर सामने आया हो। यही नहीं, अगर कोई व्यक्ति उच्च रक्तचाप, डाइबिटीज या हाई कोलेस्ट्रोल की समस्या से ग्रस्त है, तो उसे स्ट्रोक होने का खतरा कहीं ज्यादा बढ़ जाता है।

स्ट्रोक के प्रमुख लक्षण:- सिरदर्द के अलावा एक तरफ के हाथ-पैर में कमजोरी महसूस करना। ● बालने में या देखने में दिक्कत महसूस करना। ● चलने में संतुलन स्थापित न कर पाना। **खतरनाक स्थिति:-** उच्च रक्तचाप और स्ट्रोक के बीच गहरा संबंध है। जिस व्यक्ति का रक्तचाप जितना अधिक होगा, उसमें स्ट्रोक होने की आशंका भी उतनी ही अधिक हो सकती है। उच्च रक्तचाप के कारण मरीज की रक्त नालिकाओं में सूजन आ सकती है, जिसे एन्युरिज्म कहा जाता है। इस बजह से ब्रेन हेमरेज का खतरा बढ़ जाता है।

स्ट्रोक का कारण:- जब आपके मस्तिष्क तक पहुँचने वाले रक्त की आपूर्ति बढ़ित हो जाती है या मस्तिष्क की कोई रक्त नालिका अवरुद्ध हो जाती है, तो स्ट्रोक की आशंकाएं बढ़ जाती हैं। रक्त के जरिये मस्तिष्क में आवश्यक पोषक तत्व और आंक्सीजन की आपूर्ति होती है, जिससे हमारा मस्तिष्क सुचारू रूप से काम करता है, लेकिन उच्च रक्तचाप के कारण किसी जगह रक्त की आपूर्ति बढ़ित होने से वहाँ की कोशिकाएँ क्षतिग्रस्त होने लगती हैं और यही स्थिति स्ट्रोक का भी कारण बनती है। स्ट्रोक के लिए उच्च रक्तचाप एकमात्र सबसे बड़ा रिस्क फैक्टर माना जाता है और ब्लॉकेज (इस्कीमिक स्ट्रोक) के कारण लगभग 50 प्रतिशत स्ट्रोक के मामले सामने आते हैं। इससे मस्तिष्क में रक्तस्राव का खतरा भी बढ़ जाता है, जिसे हेमरेजिक स्ट्रोक (मस्तिष्क में रक्तस्राव) कहा जाता है। हालांकि उच्च रक्तचाप के कारण हाई अटैक और अन्य अंगों के क्षतिग्रस्त होने का भी खतरा बढ़ सकता है। उच्च रक्तचाप का असर मस्तिष्क सहित शरीर की सभी रक्त नालिकाओं पर पड़ता है। यही बजह है कि इस दौरान रक्त संचार को सुचारू रखने के लिए आपके दिल को ज्यादा कड़ी मेहनत करनी पड़ जाती है। रक्त कोशिकाएँ अंगों की इस तनावपूर्ण स्थिति में कछु कोशिकाएँ क्षतिग्रस्त होकर सख्त और संकीर्ण हो जाती हैं। ऐसी स्थिति को एथरेस्कलीरेसिस कहा जाता है। इससे ब्लॉकेज की आशंका बढ़ जाती है और फिर इससे स्ट्रोक या ट्रान्सिएंट इस्कीमिक अटैक संक्षेप में टीआईए (जिसे मिनी स्ट्रोक भी कहा जाता है) भी हो सकता है। **कैसे करें बचाव:-** अगर उच्च रक्तचाप (हाई ब्लडप्रेशर) से ग्रस्त व्यक्ति अपने ब्लडप्रेशर को दबाओं और जीवन-शैली में सकारात्मक परिवर्तन कर नियंत्रित रखते हैं, तो वे मस्तिष्क आघात (स्ट्रोक या ब्रेन अटैक) के खतरे से बच सकते हैं।

प्रोफेसर डॉ. राजकुमार 'सैफई' के नये कुलपति नियुक्त किये गए

उज्ग्र आयुर्विज्ञान विश्वविद्यालय, सैफई के विद्या परिषद (एकेडमिक काउन्सिल) की न्यूरो-सर्जी प्रोफेसर डॉ. ग्रिगो. टी. प्रभाकर ने संजय गांधी आयुर्विज्ञान संस्थान (एसजीपीजीआई) लखनऊ के न्यूरो-सर्जी विभाग प्रोफेसर डॉ. राजकुमार को डॉक्टर ऑफ साइंस (डीएससी) की उपाधि प्रदान की। विश्वविद्यालय द्वारा न्यूरोसर्जन डॉ. राज. कुमार को चिकित्सा विज्ञान संकाय के अन्तर्गत तत्त्विक-विज्ञान शाखा में इवेलुएशन ऑफ विल्निकल रिसर्च इन पिडियाट्रिक न्यूरोसाइंस विषय पर शोध कार्य हेतु डॉक्टर ऑफ साइंस (डीएससी) की उपाधि प्रदान की गयी है। डॉ. राजकुमार को डॉक्टर ऑफ साइंस (डीसीएस) की उपाधि प्रदान किये जाने पर विश्वविद्यालय के कुलसभा, चब एवं कम्युनिटी मैडीसिन के विभाग अध्यक्ष डॉ. पंकज कुमार जैन, प्रतिकुलपति डॉ. रमाकान्त यादव, संकाय अध्यक्ष छात्र कल्याण प्रकोष्ठ डॉ. कल्पे यादव, चिकित्सा अधीक्षक डॉ. आरेश कुमार, वित्त निदेशक पीएन सिंह, फैकलेटी मेम्बर, चिकित्सा अधिकारी के अलावा वरिष्ठ प्रशासनिक केबी अग्रवाल, प्रशासनिक अधिकारी उमाशंकर एवं जनसम्पर्क अधिकारी अनिल कुमार पाण्डे ने बधाई दी। विश्वविद्यालय के कुलसचिव डॉ. पंकज कुमार जैन ने बताया कि संजय गांधी आयुर्विज्ञान संस्थान (एसजीपीजीआई), लखनऊ के न्यूरोसर्जी में उनके शोध पत्र इवेलुएशन ऑफ विल्निकल रिसर्च इन पिडियाट्रिक न्यूरोसाइंस पर डॉक्टर ऑफ साइंस (डीएससी) की उपाधि दी गयी है। उन्होंने बताया कि यह उपाधि विद्या परिषद (एकेडमिक काउन्सिल) की अनुशंसा पर दी गयी है।

गिर्द

सड़क पर नौजवान की लाश पड़ी थी। उसे एक चार पहिया वाहन ने कुचल दिया था। लोगों की भीड़ उसे धेरे खड़ी थी। तरह-तरह के बेतुके कमेन्ट हो रहे थे। पर कोई आगे नहीं बढ़ रहा था। एक ने यहाँ तक कह दिया, “पीकर गाड़ी के नीचे आ गया होगा।” ऐसा लग रहा था कि गिर्द इंसान बन गए थे।

फिल्मी ज्ञान

‘किसमत’ (1943) अपने जमाने की सुपरहिट मूर्ची थी जो कोलकाता के एक थियेटर में तीन साल तक चली। यह रिकार्ड ‘शोले’ ने तोड़ा था। इस फिल्म में अशोक कुमार व मुमताज शांति ने काम किया था।

फिल्मी ज्ञान

पिंचू कपूर ने बतौर अभिनेता 1970 व 1980 के समय काम किया। उनकी प्रसिद्ध फिल्में डॉ. नरेन्द्र नाथ लाहा, ग्वालियर (मध्य.), मो. 09753698240।

आंधी भरे मौसम में बिगड़ सकता है

अस्थमा मरीजों का स्वास्थ्य, ऐसे बरतें सावधानी

दमा (अस्थमा) ऐसा मर्ज है, जो बच्चों से लेकर किसी भी आयुर्वर्ग के व्यक्ति को अपनी गिरफ्त में ले सकता है। आज आंधी भरे मौसम चल रहा है साथ ही प्रदूषण भी अपने चरम पर है। इस रोग में रोगी को सास नलियों में कुछ कारणों के प्रभाव से सूजन आ जाती है। इस कारणों को एलर्जीस कहते हैं। ऐसे कारणों में धूल (चार या बाहर की) या पेपर की डस्ट, रसोई की धुआँ, नमी, सीलन, परिवर्तन, सर्दी-जुकाम, धूम्रपान, फूलपूर, मानसिक चिंता, व्यायाम, पालतू जानवर और फूलों के प्राप्तकरण आदि प्रमुख होते हैं। एक रिपोर्ट के अनुसार विश्व में लगभग 30 करोड़ लोग दमा से पीड़ित हैं। भारत में वह संख्या लगभग 3 करोड़ है। दो तिहाई से लगभग लोगों में दमा बचपन से ही प्रारम्भ होते हैं। इन बातों पर दृष्टि दें। सिगरेट और सिगर के धूएँ से बचें और प्रमुख एल

Bhawani Ayurvedic Pharmacy

Rhumani Oil

Get rid of the pain, Swelling and Stiffness With Our Highly Effective Rhumani Oil. Regular Uses of Rhumani Oil Strengthens the Muscles And Bones.

Lukor Utterine Tonic

Irregular Menstrual Cycles Dysmenorrhoea, Moorrhagia, Leuvorrhoea Oligomenorrhoea, loss Of appetite Headache & infertility.

Liv-32 Syrup

Protects The Liver Against Various Hepatotoxins Promotes Appetite And Growth

Fever Fit-B Syrup

Fever Reducer Anti Fever, Herbal Remedy For all Type Of Fever

Kesh Nirog Hair Oil

- Moisturises your scalp.
- Prevents From Any Hair Damage.
- Controls Pre-Mature Greying of Hair.
- Gives your Glowing & Healthy Tresses.
- Enhances Healthy Hair Growth.

Kesh Nirog Hair Wash Powder

- 100% Natural Herbs Powder.
- Premium quality with no added chemicals.
- Ideal for all type of Hair.
- Ammonia free.
- Provides natural Pigment to Hairs.
- Makes Hair smooth and shiny.
- Gives Natural Strength and Shine to the Hair.

AstraZeneca Cancer Drug Hits Second Goal By Extending Survival

Imfinzi is the first immunotherapy to be approved in this setting, giving AstraZeneca a chance to intervene relatively early in lung cancer. AstraZeneca's immunotherapy drug Imfinzi has hit a second important goal by improving overall survival in lung cancer patients, boosting prospects for a medicine that has already got off to a promising commercial launch. Its success in extending lives, announced by the company recently, follows data announced last year showing patients on Imfinzi lived on average 16.8 months without their disease worsening, against just 5.6 months for those on placebo. That so-called progression-free survival (PFS) benefit led to US regulatory approval in February, allowing Imfinzi to be used in non-small cell lung cancer patients with inoperable mid-stage disease that has not spread widely around the body. Imfinzi is the first immunotherapy to be approved in this setting, giving AstraZeneca a chance to intervene relatively early in lung cancer. That distinguishes it from rivals Merck, Bristol-Myers Squibb and Roche that beat the British drugmaker in winning approval for similar immunotherapies in advanced or metastatic disease. Analysts believe using Imfinzi in stage III lung cancer, where cancer has only spread locally, opens up a multibillion-dollar sales opportunity and the latest overall survival (OS) data should underline the drug's potential. "Consensus has peak Imfinzi sales at \$2.8 billion by 2023 and the achievement of an OS benefit may not result in much of a change in sales expectations," Berenberg analysts said in a note. "Nevertheless ... the OS data will help Astra in its physician education and ensure the peak sales can be achieved." AstraZeneca said it planned to publish full details of the statistically significant OS result at an upcoming medical conference. Imfinzi, chemically known as durvalumab, belongs to a new class of immuno-oncology drugs that block a mechanism tumours use to evade detection from the immune system. Lung cancer is the biggest opportunity for all companies seeking to exploit the power of such medicines, since it is the leading cause of cancer deaths.

This type of Arthritis is Often Confused with Spondylitis or Slip disc and Affects 15-30 Year Olds

The month of May every year is considered to be World Arthritis Month. General perception is that arthritis affects old people. However, contrary to that belief, arthritis affects a number of young people, particularly from a condition called Ankylosing Spondylitis which is a type of Arthritis. The disease is more common in younger age groups between 15-30 years of age and especially more common in males. The disease adversely impacts the level of efficiency in the most productive years of life. The signs may include chronic back pain and stiffness from the neck down to the lower back which are common symptoms brushed away untreated. The ankylosing spondylitis treatment prevalence of ankylosing spondylitis and rising awareness about initiatives and improving healthcare infrastructure are driving the market. The high cost of treatment and lack of skilled surgeons and physiotherapists restrain the market from growing. Speaking to DNA, Dr Shashank Akerkar, Rheumatologist and member of the Indian Society of Rheumatology, addressed the issue and answered a few questions. • **What is Ankylosing Spondylitis? How is it caused?** - It is an autoimmune disease in which a person's 'foreign bodies' or 'intruders' and starts attacking them. This attack continues unabated for years, it leads to thickening of the ligaments on spinal movements. • **What are early symptoms?** - pain:- AS starts with pain in the back and the buttocks. Unlike regular arthritis, it may awaken a patient from sleep. Mornings are also horrible swelling in the knees, ankles or feet. Generally, the back pain does not cause redness and pain. • **Can people confuse this or mix it with other conditions?** - It is often overlooked as a muscle sprain or a slipped disc. 6 years. • **Given the increase in urban workforce, who mostly need it?** - Ankylosing spondylitis is not a lifestyle disease nor is it caused by physical activity. They should talk to their rheumatologist about the kind of exercise most suited to them. • **What is the physiotherapy recommended? How different is it from regular spondylitis?** - There is specific treatment available. The earlier the diagnosis, the better is the outcome of the treatment. Medicines called DMARDs and biologics have changed the lives of many. Physiotherapy has a very important role in maintaining flexibility of the spine and preventing deformities.

market is growing at a significant rate due to the increasing diagnostics and treatments for the disease. In addition, government set aside for ankylosing spondylitis treatment. However, factors such as therapists restrain the market from growing. Speaking to DNA, Dr Shashank Akerkar, Rheumatologist and member of the Indian Society of Rheumatology, addressed the issue and answered a few questions. • **What is Ankylosing Spondylitis? New Method Can Quickly And Accurately Detect Infections
A new study by Waldemar Gorski, professor and chair of the UTSA Department of Chemistry, and Stanton McHardy, associate professor of research in chemistry and director of the UTSA Center for Innovative Drug Discovery, describes a method that could show quickly and accurately whether a person has been infected with harmful bacteria or other pathogens. Additionally, this new method shows the exact severity of infection in a person. The most common method of testing for infection in medical facilities is currently a strip that turns a certain color when infected fluids come into contact with it. "The problem with this method is that it's imprecise," Gorski said. "The human eye is forced to judge the level of infection based on the hue and deepness of a color. It's difficult to make an accurate call based on that." Furthermore, roughly a third of samples cannot be tested because the fluids contain blood or are too opaque. Other methods include microbiology or examining body fluid samples under a microscope and counting white blood cells, also known as leukocytes, which are an indicator of an infection. However, these can be slow processes and require more highly trained personnel. Gorski, seeing a need for an easier and more rapid method of testing for infection, resolved to test an electrochemical approach, and sought out McHardy, a medicinal chemist. Together, they created molecules that bind to leukocyte enzymes and produce an electrical current to signal the presence of an infection. Their new molecules are housed on a testing strip. After being contacted with infected bodily fluids, the strip is connected to a computer monitor that displays a clear range of electrochemical responses demonstrating the severity of an infection. "The signs and symptoms people demonstrate aren't always reflective of the level of the infection they have," McHardy said. "This device could very easily show just how serious an infection is and make diagnosis a much quicker process, possibly preventing a more serious illness." Gorski believes the method could be especially useful to people who have just undergone surgery, as it could determine definitively whether they have an infection from the procedure before it worsens. To date, Gorski and McHardy have filed a patent for their invention, published two papers and plan to work with an engineer in the future to streamline its design.

Malaria: Cooperating Antibodies Enhance Immune Response

Malaria is one of the most inflicting infectious diseases worldwide. Scientists from the German Cancer Research Center (DKFZ) in Heidelberg, Germany, and from The Hospital for Sick Children (SickKids) in Toronto, Canada, have studied how the human immune system combats malaria infections. In this study, the researchers discovered a previously unnoticed characteristic of antibodies against the malaria parasite: They can cooperate with each other, thus binding even stronger to the pathogens and improving the immune response. The results, now published in Science, are expected to help develop a more effective vaccine against the disease. Each year, an estimated 200 million people contract malaria and approximately 440,000 people succumb to the infectious disease. Although regarded as a tropical disease, malaria can occur in both tropical and subtropical regions. There are malaria cases in Germany as well, with 500 to 600 patients annually. Most of these cases are travelers returning from malaria-endemic regions in Africa or Asia. "How severe the course of malaria gets, depends on the body's immune response," explains Hedda Wardemann from the German Cancer Research Center (Deutsches Krebsforschungszentrum, DKFZ). "Immune cells can destroy the pathogens that have invaded the body after a mosquito bite." In regions where malaria is widespread, people often exhibit a certain immunity that prevents a severe course of the disease. As a result of repeated exposure to the malaria parasite, their bodies have been able to improve their immune responses to the disease. A vaccine is supposed to provide the same kind of immunity but without having to go through an infection. "Studying the immune response of people who have been exposed to malaria parasites can provide clues about how we can make a malaria vaccine," explains Jean-Philippe Julien, Scientist from SickKids, with whom Wardemann and her team investigated antibodies against the malaria pathogen. The antibodies were obtained from study participants who have had repeated contact with the parasite in the past. Antibodies are actors of the immune system. They attach to specific targets on the surface of pathogens so they can block their development and tag them for destruction. For an antibody to prevent infection effectively, its affinity (the strength of its interaction with the pathogen) is pivotal. The immune system specifically multiplies antibodies with high affinity to ensure they are present if the body gets infected with the same pathogen again. Among the antibodies studied, the DKFZ and the SickKids scientists found a group that displayed a previously unnoticed characteristic that appears to be valuable for the immune system: They interact directly with each other. The antibodies can do so because the target structure where the antibodies attach on the malaria pathogen's surface has a special feature. "The protein contains a short sequence of four motifs that repeats itself many times," explained Wardemann, an immunologist. An antibody can attach to each of the sequence repeats. Neighbouring antibodies can then interact directly among each other. "This type of cooperation between antibodies has been unknown so far in humans," Julien said. "In an indirect way, it enhances the affinity of the antibodies to the pathogen, explaining why our immune system selects for these antibodies." The human immune system stores these protective antibodies in order to mount a better response in case of a new infection with the same pathogen. Subsequent diseases may then take a milder course -- or be prevented altogether. This mimics the immunization effect from vaccines. Next, the scientists plan to investigate how their results may be used to improve immunization protection against malaria and bring them one step closer to a malaria vaccine. In addition, they will explore whether these observations can be transferred to other repetitive molecules that are present on other pathogens.

AB ALLCARE BIOTECH PVT. LTD. कम्पनी E-mail ID : aballcarebiotech@gmail.com मो. 08847202205 अपने नये उत्पाद MOXCARE 500 (Amoxicillin Trihydrate 500mg Capsule) के साथ ONE DINNER SET (ONE PLATE, BOWL, GLASS, SPOON) का गिफ्ट दे रही है. इस के साथ-साथ एक अन्य उत्पाद ALLXIME - O (Cefixime 200mg, Ofloxacin IP 200mg) के साथ भी SIX STEEL GLASSES का गिफ्ट दे रही है.

Lupin Receives FDA Approval For Generic Nystatin and Triamcinolone Acetonide Cream

Mumbai:- Pharma major Lupin Mob.: 09045986800, 08923453232, 09719210455, 09412518122, 09548783720, 09654697576 announced that it has received final approval for its Nystatin and Triamcinolone Acetonide Cream USP, 100,000 units/gram and 1mg/gram, from the United States Food and Drug Administration (FDA) to market a generic version of Delcor Asset Corporations (Delcor) Mycolog®-II Cream. Lupins Nystatin and Triamcinolone Acetonide Cream USP, 100,000 units/gram and 1mg/gram, is the generic equivalent of Delcors Mycolog®-II Cream. It is indicated for the treatment of cutaneous candidiasis. Nystatin and Triamcinolone Acetonide Cream USP, 100,000 units/gram and 1mg/gram, had annual sales of approximately USD 62.2 million in the US (IQVIA MAT April 2018).

AJANTA PHARMA LTD.

Ajanta Pharma Limited. Ph:- 022&66061000 ने अपने उत्पाद Volga R 0.5 / 0.3 / 1 / 0.3 (Voglibose 0.3mg + Repaglinide 0.5 / 1mg Tablets) को मार्किट में प्रस्तुत किया है कम्पनी ने अपने Product की कुछ निम्न विशेषताएं भी दी हैं: significantly reduces Glycosylated Haemoglobin level better than Glimepiride5, Post Prandial Glucose and Fast Plasma Glucose • Lowers glycaemic fluctuation and Post Prandial Glucose excursion by early phase insulin secretion • Offers cardio safety and less adverse effect to Kidney and Liver to Diabetes patients • Offers compliance and safety.

SAMARTH LIFE SCIENCES PVT. LTD.

Samarth Life Sciences Pvt. Ltd. E-mail : info@samarthlife.com, Ph:- 022-6695185 ने अपने उत्पाद MUCOMIX-ET (Acetylcysteine 600mg Effervescent Tablet) को मार्किट में प्रस्तुत किया है कम्पनी ने अपने Product की कुछ निम्न विशेषताएं भी दी हैं: Same Retention Time • Similar Height & Smoothness of Peak • Antioxidant & Mucolytic action • Reduces rate of COPD Exacerbation • Significant improvement in small airway function.

Understanding The Causes Of Parkinson's Disease

A specific class of virus can drive Parkinson's disease, a new research has claimed. According to the study conducted by the American Society for Microbiology, bacteriophages play a certain role in the onset of Parkinson's disease (PD). The researchers, led by George Tetz, showed that the abundance of lytic Lactococcus phages was higher in PD patients when compared to healthy individuals. This abundance led to a 10-fold reduction in neurotransmitter-producing Lactococcus, suggesting the possible role of phages in neurodegeneration. Comparative analysis of the bacterial component also revealed significant decreases in Streptococcus spp. and Lactobacillus spp. in PD. Lactococcus are regulators of gut permeability and are enteric dopamine producers, which plays a primary role in PD. "The depletion of lactococcus due to high numbers of strictly lytic phages in PD patients might be associated with PD development and directly linked to dopamine decrease as well as the development of gastrointestinal symptoms of PD," said Tetz. To explore bacterial and bacteriophage community compositions associated with PD, the researchers used shotgun metagenomics sequencing data of fecal microbiome from 32 patients with PD and 28 controls. The results indicated that the decrease in Lactococci in the PD patients was due to the appearance of strictly lytic, virulent lactococcal phages belonging to the c2-like and 936 groups that are frequently isolated from dairy products. These results opened a discussion on the role of environmental phages and phagobiota composition in health and disease. "Bacteriophages have previously been overlooked as pathogenic factors, and the study points out their pivotal role in pathogenesis," said Tetz. Future research is needed to explore bacterial viruses as a diagnostic and treatment target for therapeutic intervention. The study research is presented at ASM Microbe, the annual meeting of the American Society for Microbiology, held from June 7th to June 11 in Atlanta, Georgia.

ROPOZ LIFESCIENCES PVT. LTD.

(AN ISO 9001:2015 CERTIFIED CO.)

More Than 150 Products

Tablets & Capsules
Softgel Capsules
Injections
Syrup/Suspension
Sachets & Protein Powder
Cream, Gel & Eye Drops
Ayurvedic And Herbal

We provide all kinds of Promotional Input i.e.

Visual Aid Folder	Visiting Cards	Leave Behind Card
Detailed Story	Reminder Cards	Sample Catch Cover
Product Scientific Detail	Gifts Articles	Order Book

Trade enquiries welcome from pharma selling experience may contact for monopoly basis Franchise/Business Associates for unrepresented areas

Face Transplantation: An Established Option to Improve Quality of Life in Patients With Severe Facial Trauma

Thirteen years after the first successful face transplant, US trauma surgeons should be aware of the current role of facial transplantation for patients with severe facial disfigurement -- including evidence that the final appearance and functioning are superior to that provided by conventional reconstructive surgery. Eduardo D. Rodriguez, MD, DDS, and colleagues of the Hansjörg Wyss Department of Plastic Surgery at NYU Langone Health, New York, summarize the world experience with facial transplantation to date, along with a new study showing better aesthetic outcomes with facial transplant, compared to conventional reconstruction. The researchers write, "It is therefore important for trauma surgeons who deal with these injuries regularly to be familiar with the literature on face transplantation following traumatic injuries." Face Transplant Should Be an Option for Patients with Severe Facial Trauma:- The researchers provide an update on all full or partial facial transplant procedures performed to date -emphasizing the risks and benefits, surgical indications, and aesthetic and functional outcomes. They write, "Face transplantation has evolved...into a safe and feasible reconstructive solution, with good aesthetic and functional outcomes for patients with severe facial defects are not amenable to reconstruction through conventional and autologous [using the patient's own tissues] approaches." Face transplantation may be considered for patients with defects involving at least 60 percent of the facial surface area, with irreparable damage or loss of the "aesthetic units" of the central face (eyelids, nose, lips). While such severe facial injuries are rare, the trauma mechanisms causing them are not. Dr. Rodriguez and colleagues note that most facial transplants performed to date have been in patients who suffered ballistic (firearms) trauma or burns. In such severe cases, skin grafts and other conventional reconstructive techniques fall short of providing adequate aesthetic and functional outcomes. Trauma surgeons need to be aware of the potential benefits and limitations of facial transplantation. "This can potentially expedite the reconstructive process for patients who may benefit from face transplant," the researchers write. Yet there are still important gaps in research on the full benefits of facial transplantation. In a new survey study, Dr. Rodriguez's group asked members of the general public to rate before-and-after pictures of patients with severe facial deformities, treated by either conventional reconstruction or facial transplantation. Ratings were performed using a validated nine-point scale, from minimal (1 point) to severe (9 points) disfigurement. The average perceived disfigurement scores were 4.9 points for the facial transplant recipients versus 8.5 points for those who underwent conventional reconstruction (compared to 1.2 points for a group of individuals with no apparent facial disfigurement). That supports the impression, communicated to patients considering facial transplantation, that while they may not appear completely normal after the procedure, their appearance "will likely improve dramatically" compared to conventional reconstructive surgery. Recipients have also reported becoming more active in their communities after facial transplantation, due to feeling less conspicuous when out in public. Further research is needed, including assessment of the impact on quality of life and other patient-reported outcomes. Dr. Rodriguez and coauthors hope their studies will help to make the trauma community more aware of the option of facial transplantation in appropriate cases, and provide a step toward comparing its outcomes to those of conventional reconstruction. With ongoing advances -- including the development of less toxic, more effective immunosuppressive therapies to prevent rejection -- facial transplantation may become a more widely available alternative for patients with severe disfiguring facial trauma.
