Number of Years Spent in Obesity May Up Heart Damage Risk

New York:- The longer a person spends being obese, the higher is the risk of a "silent" heart damage, finds a study, which says "the number of overweight or obese years may "add up" to the risk. The findings showed that for each 10 years that a person spends being obese, the risk of having high levels of troponin -- a protein linked with heart damage -- increased 1.25 times, even when accounting for heart disease risk due to high blood pressure, diabetes and kidney disease. Troponin is released when the heart muscle has been damaged. The more damage there is to the heart, the greater will be the amount of troponin in the blood. Thus, maintaining a healthy weight across the lifespan is important for keeping the heart healthy and minimising damage as people age, the researchers said. "We're finding that people's weight from age 25 onwards is linked to the risk of more or less heart damage, as measured by levels of the protein troponin, later in life, which underscores the likely importance of long-term weight control for reducing heart disease risk," said Chiadi Ndumele, Assistant Professor at the Johns Hopkins University. "The study suggests that even in the absence of such heart disease risk factors as high blood pressure, diabetes or kidney disease, the number of years spent obese or overweight contributes to the higher likelihood of heart damage," Ndumele added. For the study, appearing in the journal Clinical Chemistry, the team examined 9,062 participants, four times over a period of 10-11 years. Those who increased their body mass index (BMI) to the overweight and obesity range at the fourth visit were 1.5 times more likely to have increased troponin levels of at least 14 nanograms per litre, indicating heart damage. On average, each 100 extra BMI-years increased the likelihood, or risk, of increased troponin by 21 per cent, Ndumele said.

एन० दत्ता

इस प्रसिद्ध संगीतकार का मूल नाम दत्ताराम बाबुराव नाईक था. इनका जन्म 12 दिसम्बर 1927 का हुआ था. ये सड़कों पर गायन कार्यक्रमों में भाग लेते थे. यहाँ एस्- डी- बर्मन ने इनके क्षमता को पहचाना व अपना सहायक बना लिया. स्वतंत्र संगीतकार के रूप में एन० दत्ता ने शानदार काम किया. इनके लोकप्रिय गीत, "तू मेरे प्यार का फूल है" व "तेरे प्यार का आसरा चाहता हूँ" थे. 30 दिसम्बर 1987 को इनका देहान्त हो गया. इनको प्रणाम.
-डॉ० नरेन्द्र नाथ लाहा, ज्वालियर मो० 09753698240.

प्राथमिकता

डॉक्टर कुमार के नर्सिंग होम पर दो युवक अपने रोगी पिता को दिखाने पहुँचे. आते ही जल्दबाजी करने लगे. बोले, "जल्दी से पिता जी को भरती कर इलाज प्रारम्भ कर दें." फिर तनिक रुक कर बोले, "हमें एक मित्र के पार्टी में जाना है. देरी हो रही है."
-डॉ० नरेन्द्र नाथ लाहा, 27 ललितपुर कॉलोनी, ज्वालियर (म०प्र०) मो० 09753698240.

राई के फायदे

अचार या सब्जी में प्रयोग की जाने वाली राई स्वाद और गुणवत्ता भी बढ़ाती है. हृदय की धड़कनें सामान्य करने के लिए राई को पीसकर हाथों व पैरों पर मलने से आराम होता है. बुखार के साथ कई बार जीभ पर सफेद परत जम जाती है भूख व प्यास भी कम होती है. इसके लिए राई के 4-5 ग्राम राई के चूर्ण को शहद के साथ लें. जोड़ों में दर्द के लिए राई को पीसकर उसमें थोड़ा कपूर मिलाकर जोड़ों पर मालिश करने से आराम मिलता है. त्वचा रोगों के लिए राई को रातभर पानी में भिगोकर रखें व सुबह को इस पानी को त्वचा पर लगायें, लाभ होगा.

Vegetarian diet Just as Effective as Mediterranean diet in Reducing Heart Disease Risk, Claims Study

New Delhi:- Researchers have claimed that a vegetarian diet which includes eggs and dairy products but is devoid of meat and fish, can be as effective as the Mediterranean diet when it comes to reducing the risk of heart diseases and stroke. While a lacto-ovo-vegetarian diet includes animal products such as eggs and dairy products but excludes the intake of meat and fish, the Mediterranean diet includes the consumption of poultry, fish and some red meat as well as fruits, vegetables, beans and whole grains. "The take-home message of our study is that a low-calorie lacto-ovo-vegetarian diet can help patients reduce cardiovascular risk about the same as a low-calorie Mediterranean diet," said lead author Francesco Sofi, Professor at the University of Florence in Italy. "People have more than one choice for a heart-healthy diet," Sofi added. The study found that a vegetarian diet was more effective at reducing LDL (the "bad") cholesterol, while the Mediterranean diet resulted in greater reductions in triglycerides, high levels of which increase the risk for heart attack and stroke. The research included 107 healthy but overweight participants, between 18 and 75 years of age, who were randomly assigned to follow for three months either a low-calorie vegetarian diet, which included dairy and eggs, or a low-calorie Mediterranean diet for three months. The results showed that people on either diet had lost about four pounds of their weight overall, along with a three-pound loss of body fat. They also experienced about the same change in body mass index, a measure of weight in relationship to height. The study was published in the journal Circulation.

Crossing healthcare boundaries

कैंसर के उपचार के कारण होने वाले बाँझपन की दवा की खोज
न्यूयॉर्क:- प्राप्त जानकारी के अनुसार कैंसर के इलाज के दौरान महिलाओं में होने वाले बाँझपन से सुरक्षित रखने के लिये वैज्ञानिकों ने दवा की खोज कर ली है, महिलाओं में कैंसर का इलाज रेडिएशन व कीमोथेरेपी की दवाओं के द्वारा किया जाता है इन दवाओं से बाँझपन की समस्या होती है. एक शोध के मुताबिक स्तन कैंसर से निजात पा चुकी महिलाओं में समय से पहले अण्डाशय को खराब होते हुये देखा गया इस कारण गर्भाशय की सामान्य क्रियायें बन्द हो जाती हैं व बाँझपन की स्थिति निर्मित हो जाती है. यह अण्डाणु शरीर की सबसे संवेदनशील कोशिकाएँ होती हैं व कैंसर के उपचार के कारण खत्म हो जाती हैं. इस शोध का आधार पूर्व में किया गया एक शोध है, इसके अनुसार एक चूँकवाइंट प्रोटीन(सीएचके2) का पता लगाया गया था जो रेडिएशन से अण्डाणुओं के क्षतिग्रस्त होने पर सक्रिय हो जाते हैं.

नींबू पानी से दाँतों को खतरा, हड्डियाँ सही रखती है ग्वार की फली

भले ही वजन कम करने के लिए गुनगुने पानी में नींबू का रस मिलाकर पीना लाभकारी हो लेकिन दाँतों की सेहत के लिए यह सही नहीं। ब्रिटिश डेंटल एसोसिएशन के वैज्ञानिकों के अनुसार इसमें मौजूद एसिड की मात्रा दाँतों की इनेमल परत को नुकसान पहुँचाती है। इससे सबसे ज्यादा नुकसान तब होता है जब नींबू पानी गर्म होता है। इससे बचने के लिए वैज्ञानिकों का कहना है कि नींबू पानी को स्ट्रॉ से पीया जाए या एक ही बार में गटक लिया जाए ताकि यह कम समय के लिए ही दाँतों के सम्पर्क में आए और किसी भी प्रकार का नुकसान भी न हो। इन दिनों बाजार में आसानी से उपलब्ध ग्वार की फली, जिसे क्लस्टर बींस भी कहते हैं बेहद पोष्टिक एवं सेहतमंद सब्जी है। **वेट लॉस:-** इसे खाने से कम मात्रा में ही पेट भर जाता है जिससे वजन नियंत्रण में रहता है। **डायबिटीज:-** इसका ग्लाइसीमिक इंडेक्स कम होता है इसलिए यह डायबिटीज में फायदेमंद है। **कब्ज:-** फाइबर की मौजूदगी से यह कब्ज दूर करती है। **मजबूत हड्डियाँ:-** आर्थराइटिस, ऑस्टियोपोरोसिस व हड्डियों की अन्य तकलीफों में ग्वारफली नियमित खानी चाहिए क्योंकि इनमें कैल्शियम और फॉस्फोरस पर्याप्त मात्रा में होता है।

10 Natural Beauty Tips For Face You Must Try

Skin care may take back seat in everyday hustle-bustle. This provides an opportunity to chemical-laden cosmetics, stress and improper eating habits to attack and snatch off skin's natural radiance and glow. Since lifestyle and skin care contributes greatly not only to your looks but also on how you feel about yourself, you must take care of it. There are endless beauty magazines that lure you into cosmetics, but then you are never sure of cosmetics. Left in a state of confusion, natural remedies and practices seem like a last resort. Natural remedies are very effective and can give you glowing and beautiful face. Here's a natural beauty guide (natural beauty tips for face) for you to bring that glow back on your face. **Beauty tips for fresh & glowing face 1: Cleanse, tone and moisturise daily** The rule of thumb for flawless glowing facial skin still remains a regular cleansing, toning and moisturising routine. When it comes to cleansing, rose water is the best cleansing agent. Take cotton wool, dab it with rose water and apply it on the face to feel fresh and clean immediately. Cleansing your face twice a day will prevent breakout of pimples. Always make it a point to follow your cleansing routine by toning. Tulsi water is a great nourishing toner and you can use it with a piece of cotton wool. Now, make a mixture of onion juice, multani mitti and honey. Use this as a natural moisturiser to bring back freshness and glow on your face. Use this for achieving a glowing face. **Natural beauty tips 2: Use lime juice as a scrub** Mix lime juice with sweet almond oil and sea salt. Use your fingers or a cotton wool and apply it on your face in a circular motion. This natural scrub will remove dead cells from your face giving a radiant glow. Lime peel also aids in fading scars and pimple marks from face. **Beauty tips for face 3: Use besan (gram flour) to get rid of tan** To treat sunburns, you may apply a mixture of one spoon of besan (Gram Flour) and two tablespoon of curd on your face. Let it dry for half an hour and rinse off with cold water. This face mask is a great aid in making your skin clear, soft and glowing naturally. For sensitive skin, mix curd with this mixture and cleanse the sun tanned skin with the paste. **Beauty tips for soft skin 4: Cucumber - A wonderful beauty aid** If you want a happy skin, then cucumber is the answer. You may improve your complexion by applying a paste of cucumber mixed with raw milk. It will take 15 minutes for cucumber juice to seep into your skin then wash off with fresh water. It also helps in soothing and softening your skin. **Beauty tips for brighter complexion 5: Tomato- An antioxidant power blast** Tomatoes are great anti-oxidants. For wrinkle-free skin, mash two large tomatoes and apply it evenly on your face. Rinse off after 20 minutes with cold water. To make a paste, use one day old curd and mix with a tomato pulp. Apply this face pack daily in the morning to reveal a brighter and sparkling fresh complexion for beautiful face. **Beauty tips 6: Treat oily skin with tomatoes** Tomatoes are great for the skin as they have cooling and astringent properties. Its naturally acidic, so it helps balance the skin and get rid of excessive oil. Evenly apply tomato pulp on your face. Let it dry for 15 minutes and wash your face with warm water for naturally glowing face. **Beauty tip for removing blackheads 7: Use cucumber and lemon for removing blemishes** To naturally remove blackheads and have a fairer skin, prepare a paste with equal amounts of cucumber juice and lemon juice. Apply this paste on your face and neck before taking bath. Let your skin absorb it for at least ten minutes. With regular use you will notice lesser blackheads and a fairer skin tone. **Beauty tip for fresh vibrant face 8: Natural face pack for dry skin** If you have dry and rough facial skin, prepare a paste of equal amount of mashed muskmelon, pumpkin, cucumber and watermelon. Blend the mixture with milk cream and apply it on your face. Leave the paste to dry for one hour and rinse it using plain water. It lifts away the dry skin, giving a fresh vibrant look to your skin. **Natural beauty tip for glowing face 9: How to close pores naturally** Slice an apple into thin slices. Place these on the face and leave for 15 minutes. These soak up the extra oil and helps to close pores. You may even make paste of apple peel, honey, vinegar, and a dash of multani mitti. Apply for 30 minutes and rinse off with rose water. Your skin will visibly tighten and will develop a healthy, radiant glow. **Natural beauty tip for skin problem 10: Pamper yourself with the basics** Water and good sleep are natural facial beauty enhancers. 10-12 glasses of water per day and six to eight hours of sleep every day is essential for your skin to revitalize and repair damaged tissue. Set reasonable limits, scale back your to-do list and make time to do the things you enjoy. It will help in curing acne breakouts, acne scars and other skin problems. Restricting your consumption of oily and fatty food besides taking help of above mentioned beauty tips would further ensure naturally gorgeous complexion and spotless facial skin.

अच्छी नींद सेहत के लिये आवश्यक

अच्छी नींद अच्छे स्वास्थ्य के लिये आवश्यक है। नींद पूरी न होने से हमारी दिनचर्या व रचनात्मकता प्रभावित होती है। एक शोध के अनुसार कुछ नया सीखने के लिये अच्छी नींद बहुत आवश्यक है, इस शोध के अनुसार गहरी नींद न लेने से दिमाग का वह हिस्सा प्रभावित होता है, जो नई चीजें सीखने के लिये जिम्मेदार होता है।

Hearing loss May indicate Memory Impairment For Some

Los Angeles:- Elderly people with a certain type of hearing loss may be more likely to also have memory loss and thinking problems called mild cognitive impairment, says a study. The study, presented at the American Academy of Neurology's 70th Annual Meeting in Los Angeles, looked at people with peripheral age-related hearing loss, which is caused by problems in how the inner ear and hearing nerves function and leads to people not being able to hear. It also looked at central age-related hearing loss, which is caused by problems in the brain's ability to process sound and leads people to say, "I can hear, but I can't understand." The researchers found that people with central hearing loss were twice as likely to have mild cognitive impairment as people who had no hearing loss. "These preliminary results suggest that central hearing loss may share the same progressive loss of functioning in brain cells that occurs in cognitive decline, rather than the sensory deprivation that happens with peripheral hearing loss," said study author Rodolfo Sardone from the University of Bari in Italy. "It's a problem with perception. Tests of hearing perception should be given to people who are older than 65 and also to people with cognitive impairment," Sardone added. Hearing loss is one of the most common disabilities in elderly people, affecting about one-third of people over age 65. The study involved 1,604 participants of the Great Age Study, a population-based study conducted in the south of Italy, with an average age of 75, whose hearing and thinking and memory skills were tested. Of the participants, 26 per cent had peripheral hearing loss and 12 per cent had central hearing loss, 33 per cent were diagnosed with mild cognitive

टाइफाइड बुखार से बचाव के लिए घरेलू इलाज

टाइफाइड एक खतरनाक बीमारी है, इस बीमारी में तेज बुखार आता है, जो कई दिनों तक बना रहता है. यह बुखार कम-ज्यादा होता रहता है, लेकिन कभी सामान्य नहीं होता. टाइफाइड का इन्फेक्शन होने के एक सप्ताह बाद रोग के लक्षण नजर आने लगते हैं. कई बार दो-दो माह बाद तक इसके लक्षण दिखते हैं. टाइफाइड और बुखार का घरेलू इलाज से बचाव किया जा सकता है. **बुखार से बचाव के घरेलू इलाज-**

- पान का रस, अदरक का रस और शहद को बराबर मात्रा में मिलाकर सुबह-शाम पीने से आराम मिलता है.
- यदि जुकाम या सर्दी-गर्मी में बुखार हो तो तुलसी, मुलेठी, गाजवाँ, शहद और मिश्री को पानी में मिलाकर काढ़ा बनाएँ और पीएँ. इससे जुकाम सही हो जाता है और बुखार भी जल्द ही उतर जाता है.
- तुलसी और सूर्यमुखी के पत्तों का रस पीने से पर लू लगने के कारण बुखार होने का खतरा रहता है. ऐसे में आप कच्चे आम को आग या पानी में पकाकर इसका रस पानी के साथ मिलाकर पीएँ.
- जलवायु परिवर्तन की वजह से बुखार होने तुलसी की चाय पीने से आराम मिलता है. इसके लिए 20 तुलसी की पत्तियाँ, 20 काली मिर्च, थोड़ी सी अदरक, जरा सी दालचीनी को पानी में डालकर खूब खौलाईएँ. अब इस मिश्रण को आँच से उतारकर छानें और इसमें मिश्री या चीनी मिलाकर गर्म-गर्म पीएँ.
- तुलसी और सूर्यमुखी के पत्तों का रस पीने से भी टायफायड बुखार ठीक होते हैं. करीब तीन दिन तक सुबह-सुबह इसका प्रयोग करें.
- बुखार में रोगी को अधिक से अधिक आराम की जरूरत होती है. भोजन का खास ख्याल रखें. बुखार होने पर दूध, साबुदाना, चाय, मिश्री आदि हल्की चीजें खाएँ. मिश्री का शर्बत, मौसमी का रस, सोडा वाटर और कच्चे नारियल का पानी जरूर पीये.
- पानी खूब पीएँ और पीने के पानी को पहले गर्म करें और उसे ठंडा होने के बाद पीये. अधिक पानी पीने से शरीर का जहर पेशाब और पसीने के रूप में शरीर से बाहर निकल जाता है.
- लहसुन की कली पाँच से दस ग्राम तक काटकर तिल के तेल में या घी में तलकर संधा नमक डालकर खाने से सभी प्रकार का बुखार ठीक होता है.
- तेज बुखार आने पर माथे पर ठंडे पानी का कपड़ा रखें तो बुखार उतर जाता है, और बुखार की गर्मी सिर पर नहीं चढ़ती है.
- फूल में प्याज का रस बार-बार पीने से बुखार उतर जाता है, और कब्ज में भी आराम मिलता है.
- पुदीना और अदरक का काढ़ा पीने से बुखार उतर जाता है. काढ़ा पीकर घंटे भर आराम करें, बाहर हवा में न जाएँ. घरेलू दवाओं से यदि आपको आराम न मिले, तो तुरंत डॉक्टर से संपर्क करें और उसके निर्देशानुसार इलाज करवाएँ.

US Drug Makers Want Greater Emphasis on IP Protection in India

US based drug makers lobby group Pharmaceutical Research and Manufacturers of America (PhRMA) has complained that the positive signals given by India in terms of greater intellectual property protection and market access opportunities are yet to translate into real policy actions and practical changes. In its annual submission to the United States Trade Representative (USTR), PhRMA highlighted unpredictable patent environment, regulatory data protection failures, high tariffs and taxes on medicines, discriminatory and non-transparent market access policies, and unpredictable environment for clinical research as the key challenges before US companies that operate or wish to tap the Indian market. The lobby group wants India to remain on the Priority Watch List in the 2018 Special 301 Report of USTR until India addresses their concerns. While acknowledging India's new National IPR (intellectual property rights) policy, PhRMA wanted the country to lay greater stress on effective and meaningful IP protection and enforcement mechanisms. "Implementation of the National IPR Policy should include a consultative process with relevant stakeholders and meaningful reforms to India's IP policies that lead to improvements in IP protection and enforcement for medicines", it states. On tariff barriers, PhRMA states that its member companies operating in India face high effective import duties for active ingredients and finished products. "Though the basic import duties for pharmaceutical products average 10 ten percent, due to the Integrated Goods and Service Tax imposed on imports, the effective import duty can exceed 20 per cent. Moreover, excessive duties on the reagents and equipment imported for use in research and development and manufacture of biotech products make biotech operations difficult to sustain. Compared to other Asian countries in similar stages of development, import duties in India are very high. And while certain essential and life-saving medicines may be granted exemptions from some of the taxes, the eligibility criteria are vague and subject to constant revision and debate", they point out. The submission also refers to the WTO Pharmaceutical Agreement because of which the United States and 33 other signatory countries do not impose any import duties on a wide range of medicines and other health products. "However, biopharmaceutical innovators in the United States do not benefit from the same access to China, India and other emerging economies that are leading producers and net exporters of drugs and active pharmaceutical ingredients but are not parties to the WTO Pharmaceutical Agreement," it notes. Stating that United States is by far the largest market for Indian generic drug exports, it said that India's basic import duties on biopharmaceutical products and active ingredients average about ten percent. Additional duties and assessments can raise the effective import duty to as high as 20 per cent or more, it adds. The Special 301 review is an annual exercise of the USTR to address market access and intellectual property barriers that harm US trade interests. Countries with significant IP concerns for US companies are placed in the Priority Watch List.

गर्मी में दवा का काम करता है पुदीना

गर्मी में आप ऐसी चीजों का सेवन किया जा सकता है जिससे आपको ना सिर्फ गर्मी से राहत मिलेगी. बल्कि यह सेहत के लिये भी फायदेमन्द रहेंगे. गर्मी ने अपना असर दिखाना शुरू कर दिया है और गर्मी में सेहत का खयाल रखना बहुत जरूरी है और यह बहुत मुश्किल भी है. लेकिन गर्मियों में कई ऐसी चीजों का सेवन किया जा सकता है, जिससे आप ना सिर्फ गर्मी से बचेंगे बल्कि यह आपकी सेहत के लिये भी लाभदायक रहेंगे. इन चीजों में पुदीने का नाम भी शामिल है, जो कि गर्मियों में ना सिर्फ स्वाद बढ़ाता है बल्कि आपकी सेहत के लिये दवा का काम करता है. गर्मियों में पुदीने का सेवन करने से क्या-2 लाभ होते हैं. आप कई तरह से पुदीने का सेवन करते हैं, इसका इस्तेमाल चटनी, जूस, छाछ आदि में डालकर किया जा सकता है. पुदीना पेट के लिये बहुत फायदेमन्द होता है और पेट में तुरन्त प्रभाव से ठंडक पहुंचाता है. इसमें मौजूद एन्टी-ऑक्सिडेंट्स, फाइटोन्यूट्रिंट्स और मेंथल आपके खाने को पचाने में मदद करता है, जिससे गर्मियों में होने वाली पेट की दिक्कतों होने की सम्भावना कम हो जाती है. साथ ही यह पेट के मरोड़े और एसिडिटी आदि में भी फायदा करता है. कई जानकारों का कहना है कि खाना खाने के बाद पुदीने की चाय पीना भी आपकी सेहत के लिये लाभदायक हो सकता है. पुदीना में मौजूद एन्टी-इंफ्लेमेट्री और एन्टी-बैक्टीरियल तत्व आपकी त्वचा को दानों और फुंसियों से मुक्त करता है. इसलिये बाजार में मिलने वाले क्लींजर, टॉनर आदि में पुदीना इस्तेमाल किया जाता है. पुदीने की पत्तियों से त्वचा का निखार वापस आता है, पुदीने की पत्तियों में कैल्शियम, फास्फोरस, विटामिन सी, विटामिन डी और विटामिन ई होता है, जो कि शरीर का इम्यून सिस्टम ठीक करते हैं और आपके शरीर को इन्फेक्शन आदि से भी बचाते हैं. इसलिये गर्मी में सेहत की देखभाल के लिये नियमित रूप से पुदीने का इस्तेमाल जरूर करें, जिससे आपकी सेहत स्वस्थ रह सके.

दोपहर की भोजन योजना

आमतौर पर वकिंग लोग अपने लंच को ज्यादा तरजीह नहीं देते हैं. समय की कमी के चलते वे भूख लगने पर चाय या कुछ स्नैक्स खा लेते हैं। यह सब खाने से आपकी भूख तो मिट जाती है लेकिन आपके शरीर को जरूरी पोषण नहीं मिलता है। लंच को नजरअंदाज करने के घातक परिणाम आपको भविष्य में देखने को मिल सकते हैं। इसलिए सचेत हो जाइए और अपने लंच को तरजीह देना शुरू करें। अक्सर लोग सुबह-सुबह जल्दी में बिना नाश्ता किए घर से निकल जाते हैं, और ऑफिस में उन्हें काम के प्रेशर व मीटिंग्स के चलते कुछ खाने का समय नहीं मिलता है इसलिए लोग जल्दी में चाय ही पीकर काम चला लेते हैं जो कि शरीर के लिए सही नहीं है. लंच करने से आपके शरीर को जरूरी पोषण मिलता है और आपको ज्यादा काम करने की शक्ति मिलती है. लेकिन ध्यान रहे आपका भोजन बहुत हल्का व सुपाच्य होना चाहिए कैसा हो आपके दोपहर का खाना • स्पाउटस या सलाद, सफेद और काले चने, दाल, पनीर आदि को अपने ऑफिस लंच में शामिल कर सकते हैं. • चावल को अपने लंच का हिस्सा न बनाएं क्योंकि इससे आपको नौद आ सकती है. • चाय-कॉफी का कम से कम सेवन करें। इससे एसिडिटी और गैस की समस्या हो सकती है। बहुत ठंडी चीजें जैसे कोल्ड ड्रिंक या आइसक्रीम आदि से दूर ही रहें. • अगर आप ऑफिस की कैंटीन या रेस्टोरेंट में लंच करते हैं तो साफ-सफाई का खास खयाल रखें. • अगर आप बाहर लंच कर रहे हैं तो पेट में जलन की शिकायत हो सकती है, ऐसे में सोडा डालकर पकाए गए चावल या पुराने तेल में पकाए गए खाने से बचें. • अगर ऑफिस में साफ-सुथरा खाना मिलना संभव नहीं हो पा रहा है, तो आप फ्रूट सलाद या साधारण सलाद के साथ लस्सी आदि भी लंच में ले सकते हैं.

Happy Birthday

• लंच के साथ-साथ पानी भी पर्याप्त मात्र में पीएँ.
• टोफू व सब्जियों से बने सैंडविच अपने लंच बॉक्स में रख सकते हैं. • ब्रेड, फल, सब्जियों और दही का सेवन करें. • लंच हमेशा नाश्ते से हल्का करे. एक बाउल सलाद और सूप भी ले सकती है. • लंच में सलाद,सब्जी, दही, रोटी को शामिल करें. • दोपहर के खाने में आप फल व सब्जियों से बने पास्ता सलाद भी ले सकते हैं. यह हल्का व पोषणयुक्त होगा.

मुस्कराता चिकित्सक

किसी भी रोगी के इलाज में चिकित्सक का मनोभाव बहुत महत्व रखता है. यदि चिकित्सक मुस्कराता हुआ मिलेगा, पॉजिटिव बातें करेगा, रोगी को हिम्मत देगा तो निश्चित रूप से रोगी जल्दी अच्छा होगा. आज न तो रोगी पर समय है, न ही चिकित्सक पर. चिकित्सक व रोगी, दोनों को रोग भगाने हेतु समय देना ही होगा. तब बात अधिक अच्छी बन पाएगी.

विटामिन डी की कमी पड़ सकती है भारी

विटामिन डी शरीर के कई महत्वपूर्ण अंगों को ठीक तरह से संचालित करने में मदद करता है. इसकी कमी से कई गम्भीर रोग जैसे डायबिटीज, कोलोन, ब्रेस्ट व प्रोस्टेट कैंसर भी हो सकता है. शरीर को रोजाना कम से कम 75 प्रतिशत विटामिन डी पूरा करने के लिये सूरज की सीधी रोशनी की जरूरत होती है. धूप कम लेने, अस्वस्थ खानपान की वजह से विटामिन डी की कमी हो जाती है. विटामिन डी की कमी को मापने के लिये 25 हाइड्रॉक्सी विटामिन डी ब्लड टेस्ट किया जाता है. यह टेस्ट 40 की उम्र के बाद साल में एक बार कराना चाहिये. लेकिन अगर आपको ऑस्टियोपोरोसिस का खतरा हो तो 21 साल के बाद ही कराते रहें. जब सूरज की अल्ट्रावायलेट किरणें त्वचा के सम्पर्क में आती हैं, तो ये शरीर में एक्जोर्ब होकर विटामिन डी का निर्माण करती है. अगर सप्ताह में दो बार 10-15 मिनट तक शरीर की खुली त्वचा पर सूर्य की अल्ट्रा वायलेट किरणें पड़ती है तो शरीर की विटामिन डी की 80-90 प्रतिशत तक आवश्यकता पूरी हो जाती है. विटामिन डी के सप्लीमेंट भी लिये जा सकते हैं. लेकिन इन्हें लेने से पहले विशेषज्ञ की सलाह जरूर लें.

Our Brain May Navigate using Just Smells: Study

Washington:- The mammalian brain can form a map of its surroundings based solely on smells, a study has found. Researchers at Northwestern University in the US have developed a new "smell virtual landscape" that enables the study of how smells engage the brain's navigation system. The olfactory-based virtual reality system could lead to a fuller understanding of odour-guided navigation and explain why mammals have an aversion to unpleasant odours, an attraction to pheromones and an innate preference to one odour over another, researchers said. The system could also help tech developers incorporate smell into current virtual reality systems to give users a more multi-sensory experience, they said. "We have invented what we jokingly call a 'smellovision,'" said Daniel A Dombeck from Northwestern University. "It is the world's first method to control odourant concentrations rapidly in space for mammals as they move around," said Dombeck, who led the study published in the journal Nature Communications. Researchers have long known that odours can guide animals' behaviours. However, studying this phenomenon has been difficult because odours are nearly impossible to control as they naturally travel and diffuse in the air. By using a virtual reality system made of smells instead of audio and visuals, Dombeck and grad-

Staircase:- There is probably an elevator at the office entrance, but you must try to move up and down through the staircase. Take this opportunity when you can burn extra calories by making multiple trips up and down the steps. **Use the Farther Restroom:-** You should start using the restroom that is the farthest from your desk. Going the distance can help you expend a few calories. Taking a trip to the other side of the office also gives you a chance to meet other colleagues. **Keep Snacks Handy:-** Nuts are known to be excellent belly-slimming mono-unsaturated fats. Pack a small box of nuts for work. You will need them when hunger strikes or just-for-snacking purposes. A handful of nuts can energise you, making you feel full and thus, keeping your blood sugar levels under control. **Watch out for Carbohydrates:-** Carbohydrates give you plenty of energy but you need to keep your portions in check (especially when you're eating out). Halve your carbohydrate serving (when eating foods such as pasta, pizza, bread, or rice). **Hold the Sauces:-** Skipping the ketchup, mayo or other sauces could save up to 100 calories per day. Make the change, today. When it comes to weight loss, we often overlook little things but focus on lifestyle overhaul. Adopt the aforementioned steps to inch closer to your weight loss goal.

रख सकते हैं। व्हीट ग्रास टेबलेट एक नही सौ रोगों की दवा है। यह एक आदर्श खाना है। जिसमे आयरन कैल्सीयम, एन्जाईम, एमीनो एसिड क्लोरोफिल तथा प्रोटीन भरपूर मात्रा में उपलब्ध है। इसके प्रयोग से हाजमा ठीक होता है तथा विजातीय द्रव्य (टॉक्सिनस) शरीर से बाहर निकलते हैं। यह कोलेस्ट्रॉल को नियंत्रित करने के साथ शरीर की रोग प्रतिरोधक शक्ति को बढ़ाता है। यह ब्लड प्रेशर तथा मधुमेह को भी नियंत्रित करता है। यह शरीर को एनर्जी प्रदान करता है अर्थात शक्ति का स्रोत है। आर्युमेड व्हीट ग्रास प्लस टेब 30 टेब की पैक में मार्केट में उपलब्ध है जिसका अधिकतम मूल्य 125 रूपये है। कम्पनी सम्पूर्ण देश में अपने विक्रेता बनाना चाहती है। व्यापार को इच्छुक पार्टियों कम्पनी के मार्केटिंग मैनेजर प्रशांत मोहन से मो० 09736701313, 09882011313 पर सम्पर्क कर सकती है।

uate student Brad Radvansky created a landscape in which smells can be controlled and maintained. "Imagine a room in which each position is defined by a unique smell profile," Radvansky said. "And imagine that this profile is maintained no matter how much time elapses or how fast you move through the room," he said. That is exactly what Dombeck's team developed, using mice in their study. Aided by a predictive algorithm that determined precise timing and distributions, the airflow system pumped scents - such as bubblegum, pine, and a sour smell - past the mouse's nose to create a virtual room. Mice first explored the virtual environment through both visual and olfactory cues. Researchers then shut off the visual virtual reality system, forcing the mice to navigate the room in total darkness based on olfactory cues alone. The mice did not show a decrease in performance. Instead, the study indicated that moving through a smell landscape engages the brain's spatial mapping mechanisms. Not only can the platform help researchers learn more about how the brain processes and uses smells, it could also lay the groundwork for human applications. "Development of virtual reality technology has mainly focused on vision and sound," Dombeck said.

All You Need to Know About Alzheimer's Disease

Do you forget your appointments, name of a person, what were you going to do? This can be normal as a person can forget certain things at a certain time, but if it is becoming very frequent or troublesome then it could be Alzheimer's disease. People with Alzheimer's disease (AD) have problems with memory, thinking and behaviour. Increasing forgetfulness is one of the initial symptoms of Alzheimer's disease (AD). They tend to forget (such as names, places and things) which develops slowly and worsen as the disease progresses and can become severe enough to interfere with their daily life and tasks.

● **Memory loss that affects day-to-day function:-** Anyone can occasionally forget appointments, a known person's name or a friend's phone number--but the person usually remember it sometime later. But a person with AD may forget about conversations, appointments or events, and not remember them even later. This is more with recent events as the recent memory is affected initially. However, as the disease progresses memory loss worsens gradually and the person can have difficulty in remembering things that happened recently or in the past, names of people they know (even family and friends), recognizing family members and friends, trouble while speaking, reading or writing.

● **Difficulty performing familiar tasks:-** All of us have occasional memory lapses like you may prepare vegetable and only remember to serve them at the end of a meal. However, a person with AD may have trouble with an everyday task like operating the washing or grinder or cooking a meal and in the later stage of disease doing everyday tasks like brushing teeth or combing hair.

● **Problems with language:-** Anyone can occasionally have trouble finding the right word. But people with AD may forget simple words or substitute words, which may make their sentences difficult to understand or totally meaningless. As the disease progresses they may find it difficult to express thoughts or take part in conversations. Slowly the reading and writing skills are affected as well.

● **Disorientation of time and place:-** You may forget the date or day of the week or where you were going (for a moment) occasionally. But AD may cause memory loss and forgetfulness to progress to a stage where the person can get lost in familiar places and may have no idea where is he or what day and month it is.

● **Misplacing things:-** It is normal to misplace the keys or wallet occasionally. But people with AD may put things in inappropriate places like clothes in the freezer or keys in the sugar bowl and then forget it. As the disease progresses the person's ability to interpret things, organize thoughts and remember things becomes difficult. A person with AD may initially notice that he has difficulty in remembering things and organizing thoughts. But mostly the person may not notice anything and it is the people around him (like family members, friends or co-workers) who feel the change or feel that something is wrong. If any of your family and friends show inappropriate forgetfulness or other symptoms of AD consult a doctor. There is no cure for AD but treatment may possibly slow down the progression of the disease, improve symptoms and improve the quality of life for those with Alzheimer's and their caregivers.

डिप्रेशन से कैसे निपटें?

डिप्रेशन यानी अवसाद का अर्थ है कि आप अपने अंदर जीवन के उल्लास को कायम नहीं रख पाते. इसका असर आपके शरीर पर भी पड़ता है. अगर आप अवसाद में हैं, तो भौतिक शरीर भी परेशानी झेलता है. आपके अंदर का जीवन उल्लासमय नहीं है, उसने अपना उल्लास खो दिया है क्योंकि आप उसके साथ सही बर्ताव नहीं कर रहे हैं. दरअसल आप कुछ बाहरी बेकार चीजों को अपने भीतर बहुत ज्यादा थोप रहे हैं. आपने अपनी जीवन-ऊर्जा के स्तर को ऊँचा रखने के लिए कुछ नहीं किया है. **डिप्रेशन का स्रोत:-** अवसाद एक प्रकार का कष्ट है. अगर आप आनंद नहीं, कष्ट बन गए हैं तो इसकी वजह यह है कि आपकी जीवन-ऊर्जा का एक बड़ा हिस्सा विवशता में घटित हो रहा है, चेतना में नहीं. वह एक तरह से बाहरी हालात की प्रतिक्रिया के तौर पर घटित हो रहा है. जब आपका जीवन विवशता से चलता है, तो डिप्रेशन बहुत स्वाभाविक है क्योंकि बाहरी हालात कभी भी सौ फीसदी आपके काबू में नहीं होते. दुनिया में बहुत सारी चीजें घटित हो रही हैं, अगर आप विवशता में प्रतिक्रिया करते हैं, तो उसमें खो जाना और दुखी होना स्वाभाविक है. आप जीवन के जितने संपर्क में होंगे, उतने ही दुखी होंगे. जब लोग अपने बाहरी जीवन को संभाल नहीं पाते, तो वे अपने जीवन के अलग-अलग पहलुओं से भागने लगते हैं. मगर वह भी काबू से बाहर हो जाता है. आपका एक हिस्सा लगातार विस्तार की खोज में रहता है- आप लगातार सीमाओं और अपने क्रियाकलाप के क्षेत्र को बढ़ाना चाहते हैं. आपका एक दूसरा हिस्सा भी है, जो हर बार निराश हो जाता है, जब कोई चीज आपके हिसाब से नहीं चलती. डिप्रेशन अपनी उम्मीदों के पूरा नहीं होने पर होता है. अगर आज स्टॉक मार्केट मंदा हो जाए, तो बहुत सारे लोग डिप्रेशन में चले जाएंगे. हो सकता है कि उनमें से बहुतों ने उस पैसे को कभी छुआ भी न हो, मगर हर दिन जब वे ग्राफ को ऊपर जाते देवते हैं, तो उनका मूड भी ऊपर जाता है. अगर जब वे ग्राफ को गिरता देवते हैं, तो उनका मूड भी गिर जाता है. इसकी वजह सिर्फ यह है कि उन्होंने जैसी उम्मीद की थी, वैसा नहीं हुआ.

Use of Antibiotics Can influence Efficacy of Cancer Treatment

Turns out, antibiotics may impact cancer treatment efficacy. Any negative impact of antibiotics on cancer treatment appears to go back to the gut and to whether the microbiota is needed to help activate the T cells driving treatment response, said Dr Gang Zhou, in a study conducted at Augusta University. Antibiotic use is known to have a near-immediate impact on our gut microbiota and long-term use may leave us drug-resistant and vulnerable to infection. "It likely depends on what types of therapy physicians are giving to patients and how often they also are giving them antibiotics," said Zhou, corresponding author of the study. They have some of the first evidence that in some of the newest therapies, the effect of antibiotics is definitely mixed. Infections are typically the biggest complication of chemotherapy, and antibiotics are commonly prescribed to prevent and treat them. "We give a lot of medications to prevent infections," said Dr Locke Bryan, a study co-author. "White blood cell counts can go so low that you have no defence against bacteria, and that overwhelming infection can be lethal," said Bryan. In this high-stakes arena, where chemotherapy is increasingly packaged with newer immunotherapies, Bryan, Zhou and their colleagues have more evidence that antibiotics' impact on the microbiota can mean that T cells, key players of the immune response, are less effective and consequently, some therapies might be too. They reported that antibiotic use appears to have a mixed impact on an emerging immunotherapy called adoptive T-cell therapy, in which a patient's T cells are altered in a variety of ways to better fight cancer. They found that one of the newest of these - CAR T-cell therapy - is not affected by antibiotics, likely because it is not so reliant on the innate immune system. "These infused T cells can pretty much act on their own to kill cancer cells", Zhou said. With this approach, physicians retrieve T cells from a patient's blood, engineer them to express a tumour-finding receptor - called chimeric antigen receptor, or CAR - and give them back to the patient. These patients typically will receive a conditioning chemotherapy regimen, which often includes the common agent cyclophosphamide, or CTX, to intentionally wipe out some of their normal T cells and make room for the engineered super-fighters. This emerging treatment is often used in patients, who have failed multiple other treatments, including chemotherapy. Even long-term antibiotic use does not seem to hinder the efficacy of CAR T-cell therapy against systemic lymphoma in their animal model. While they could see the impact of antibiotics on the microbiota, mice with CAR T-cell therapy continued to respond well to cancer treatment. But the efficacy of another mode of adoptive T-cell therapy was impacted. This model mimicked therapy in which receptors that target the patient's tumour are put into their T cells. In this case, the researchers transferred tumour-specific CD4+T cells to treat mice with colorectal cancer. "One key difference here is that, unlike the CAR T-cell therapy, these engineered T cells still need help from the innate immune system to fight a tumour, now that they can better target it", Zhou said. Their studies also confirmed that antibiotic use impacts the efficacy of the widely used CTX when it's used alone, in this case, to treat B-cell lymphoma. In addition to directly killing rapidly dividing cancer cells, CTX gets the attention and help of endogenous T cells, and antibiotics reduced that T-cell response, the scientists reported. Their findings in lab animals confirmed the recent work of others that the altered intestinal microbiota impacts CTX's ability to fight sarcoma, a rare cancer of our connective tissue. Bigger picture, it suggested that some chemotherapy regimens rely on the gut bacteria to stir the immune system to fight cancer, the scientists wrote. "It is clear in animal models that if you wipe out the intestinal microbiota like you do with antibiotics, it will attenuate the chemotherapy efficacy," said Zhou. "There is also emerging clinical evidence showing that for CTX-based chemotherapy, some patients who also get antibiotics for a longer period of time seem to have less optimal outcomes." Human studies are needed to see whether antibiotics affect the outcomes of adoptive T-cell therapy and to give clinicians and their patients' better information about how best to manoeuvre treatment, Zhou noted. The study is published in the journal Oncotarget.

डिस्क स्लिप होने पर करें ये उपचार

हमारी रीढ़ करीब 34 छोटी-छोटी हड्डियों (वर्टिब्रा) से मिलकर बनती है. दो वर्टिब्रा के बीच एक गद्देदार उतक होता है. जिसे इन्टरवर्टिब्रल डिस्क कहते हैं. डिस्क दो वर्टिब्रा को आपस में गड़ खाने से रोकती है. बढ़ती उम्र और गलत तरीके से उठने-बैठने से डिस्क में बदलाव आते हैं, उसे स्लिप डिस्क कहा जाता है. डिस्क के खिसक जाने से आस-पास निकलने वाली नब्ज पर दबाव पड़ता है, इससे कुछ परिस्थितियाँ पैदा हो सकती हैं. कमर से लेकर एक पंजे तक करंट जैसा दर्द, पैर में सुनपन, पंजे या पैर के अँगूठे में कमजोरी आना, गम्भीर परिस्थितियों में पेशाब में रूकावट. स्लिप डिस्क का दर्द, आराम करने, व्यायाम और दर्द निवारक दवा से ठीक हो जाता है. 6 हफ्ते में दर्द ठीक न हो तो कमर में एक छोटे से चीरे से डिस्क के नस को दबाने वाले हिस्से को निकाल दिया जाता है. ध्यान रखें समय पर ऑपरेशन से पैरों में कमजोरी या पैरालिसिस नहीं होती.

How Can I Lower My Insulin levels?

Insulin is a hormone the body uses to gain energy from carbohydrates in food. Without insulin, a person's blood sugar levels can build up too high and cause damage to the body, especially to the kidneys, nerves of the hands and feet, and eyes. Ideally, there is a balance between blood sugar and insulin in the body. Some instances exist, however, where insulin does not work as well as it should, forcing the body to produce an excessive amount of insulin. This is known as insulin resistance, which is a risk factor for developing diabetes, as well as a primary feature of type 2 diabetes. A person who is insulin resistant and wants to maintain a healthy weight and body may need to control their insulin levels. Many of the steps associated with improved insulin resistance are already considered to be healthful habits that many people would do well to adopt anyway. We take a look at some of them in this article. **Three diet tips:-** **1. Eating foods that keep blood sugar levels low:-** Often, the foods that keep blood sugar levels low are also foods that will help keep insulin levels low. Some foods are known to maintain a slower, steady need for insulin instead of causing sudden spikes. These are known as low glycemic index foods and are preferred sources of carbohydrates. The Diabetes Council recommend eating the following foods to keep insulin and blood sugar levels low: ● avocado ● banana ● blueberry ● cinnamon ● garlic ● honey ● peanut butter ● slow-cooked oatmeal ● vinegar ● yogurt without added sugars **2. Avoiding foods that cause insulin spikes ●** Just as there are foods that are beneficial to lowering insulin levels, there are some that cause spikes. These include high-sugar foods, such as candies and chocolates. ● Dried fruits and energy drinks can also be sources of sugar that lead to insulin spikes. Avoiding these foods can help keep insulin levels down. **3. Following a low-carbohydrate diet ●** According to an article in the journal *Diabetesity*, eating a low-carbohydrate diet can help reduce a person's insulin levels as well as promote weight loss and lower blood pressure. ● There are several types of low-carbohydrate diets a person can choose from, depending on how many carbs they are allowed to consume. Examples include the Atkins, South Beach, and the Mediterranean diet, which favors carbohydrates that come from healthful, fiber-rich sources, such as wheat and beans. It also includes fruits, vegetables, nuts, olive oil, and fish. **Four lifestyle changes** **1. Losing weight:-** If a person is overweight, weight loss can likely help them decrease their insulin levels, according to the International Federation of Gynecology and Obstetrics. This is because excess weight and body fat is associated with insulin resistance, and therefore an increased level of insulin. The link between body fat and having too much insulin is why many doctors recommend that women with polycystic ovary syndrome (PCOS) lose weight. This syndrome causes a woman to produce excess amounts of "male" hormones known as androgens, as well as excess amounts of insulin. Losing weight is not easy for women with PCOS, nor is it easy for anyone who has a hormone-related condition. However, some lifestyle changes can make weight loss possible. Losing weight can result in lower insulin levels. **2. Exercising regularly:-** Fitting in 60 minutes of exercise on a daily basis or several 15- or 30-minute sessions can be very helpful. The exercise can include walking, taking an exercise class, riding a bicycle, or taking part in another physical activity that gets the heart beating faster. **3. Engaging in resistance training:-** According to another article in the journal *Diabetesity*, resistance training improves muscle mass, which increases the amount of glucose a person uses and makes their insulin work more efficiently. **4. Taking steps to reduce stress:-** Stress can lead to excess insulin production because the body is attempting to release more insulin to use with carbohydrates for energy. Measures to reduce stress include: ● getting enough sleep at night ● taking 15 to 30 minutes each day to do something enjoyable ● journaling ● meditating **Supplements:-** Chromium supplements may help to enhance insulin's effectiveness, which might help to lower insulin levels. Some studies have supported the use of supplements in reducing insulin levels. One study, published in the *Annals of Nutrition & Metabolism*, found that overweight women taking a dietary supplement that consisted of 125 milligrams (mg) of green tea,

Community And Vegetables Grow Side-By-Side In Syrian Refugee Camp Gardens

Fig and pomegranate trees, grapes, carrots, and narcissus flowers are some of the plants that Aveen Ismail like to grow in the Domiz refugee camp in Northern Iraq where they live. That's because these plants remind her of Syria and home. At first, Ismail did not find the dry land welcoming. But she values greenery and gardening, so she cultivated a small patch of land next to the house her family built in the camp. In 2015, after seeing her garden, members of a U.K.-based nonprofit called The Lemon Tree Trust asked Ismail to help them encourage others to garden in the camp. Now she has a formal role with the group. "I hope to give a beautiful view for my neighbors and support for others, to encourage agriculture, and provide myself with a few fresh vegetables every day," Ismail says. Ismail, her husband, and three children fled the Syrian Civil War in 2011. They left their home in Damascus after several family members were killed in their neighborhood. More than 11 million Syrians have been displaced and more than 250,000 have died in the ongoing war. Ismail's family is among about 26,500 refugees in the Domiz camp, which covers approximately 710 square miles. The Lemon Tree Trust is an international branch of Citizen D, a Texas-based nonprofit that focuses on developing urban agriculture projects with marginalized communities, including refugees. Trust Founder Stephanie Hunt says the Kurdish Regional Government that manages the Domiz camp is unique because it is "particularly open to ideas around tree planting, gardening, agriculture and landscape improvement." The Trust team approached the camp community and got to know the population by surveying established green spaces, talking to local gardeners, and connecting community members. They funded a small nursery in the camp and hired refugees like Ismail to disseminate seeds, trees, and knowledge. But what really got refugee gardeners engaged was a Trust-sponsored home garden competition - now an annual event - with cash prizes. The number of participants rose from 50 to 150 between 2016 and 2017, says Hunt. After the first contest, the Trust brought the community together to hear its priorities for greening the space. "A training and demonstration garden for food growing and small livestock, space for individual garden plots and recreation areas for children," were the strongest desires, project director Carrie Perkins says. The Trust hired refugees to handle the mapping, construction and maintenance of a demonstration garden in an unused plot, which is now a flourishing enterprise and community hub called Azadi Garden. Azadi means "liberation" in Kurdish. It contains greenhouses, tree and plant nurseries, and raised beds for personal, communal, and commercial use. There are also areas for men, women, and children to socialize. A repaired well and gray water - recycled household waste water, excluding toilet sewage - are used to irrigate the arid soil. One of the obstacles refugee camp gardening initiatives like these face is that cultivating the land can feel permanent. While many refugees do end up staying in camps for decades, accepting them as a new home can be difficult. Perkins and her colleagues emphasize the immediate rewards of camp greening with residents - farming skills, keeping memories of home alive, building community, and accessing fruits and vegetables they would not otherwise have. At Domiz, people access prepackaged and canned goods from a United Nations World Food Programme-run grocery and frozen meat from butchers, but rarely any fresh food. Now the gardening and livestock programs have introduced olive and fruit trees, tomatoes, potatoes, onions, lettuce, herbs, garlic, rabbits and chickens to the camp, among other products. Shaza Moghraby, a WFP communications officer who previously worked in a Syrian refugee camp, says gardening also gives refugees "a feeling of accomplishment and productivity ... For Syrians who are used to working and producing at a relatively young age, it was pretty traumatic for them to spend their day doing nothing." There is a lack of employment in the Domiz camp

DYSNEC Pharma

WE HAVE OUR OWN 2 MANF. UNITS

WITH LATEST FORMULATIONS LIKE

25 mg of capsaicin, and 50 mg of ginger extract twice daily resulted in a greater decrease in body weight and insulin levels than those who took a placebo. Another supplement that has been widely studied for its insulin-lowering benefits is chromium, which is a trace mineral found in the human body. Supplements of chromium may help enhance insulin's effectiveness, which ideally, would help with lowering insulin levels overall. Chromium supplements are available to buy online. Studies have not definitively proven chromium's benefits in lowering insulin, yet. However, one study published in *The Journal of Nutrition* found that taking chromium supplements lowered the risk of having type 2 diabetes by helping reduce blood glucose and insulin levels.

Medication:- Sometimes, doctors will prescribe a medication known as Metformin. This medicine makes the body more sensitive to insulin, which can help to lower insulin levels because the body uses it more. According to the Center for Young

Women's Health, women with PCOS who were overweight, practiced a healthful lifestyle, and took metformin were more likely to lose weight than those women who adopted a healthful lifestyle alone. However, side effects of taking metformin exist, so it is not always the best solution for women with PCOS or those with similar medical conditions. **Outlook:-** Excess insulin in the body is known to affect how the body works. For example, excess insulin triggers the body to store extra fat, which can be broken down and used for energy at a later date. Insulin promotes hunger and weight gain. According to a research article in *Current Obesity Reports*, high insulin levels are associated with a greater risk for obesity. A healthful diet, physical exercise, and stress moderation can all help a person struggling with excess insulin to lower their levels. A person should always talk to their doctor before beginning a new diet or any new supplements to ensure they will not interfere with their medication plan or overall health.

for workers of all levels of expertise and education. Ismail's husband was unable to take construction work, which was the main type available, due to a back injury. Instead, he joined the Peshmerga, a Kurdish force fighting the Islamic State. He sends his earnings home and comes back to his family every 10 days. It is not uncommon for women to stay in the camp when men leave to find work, and there are many women who must become independent or bring up families on their own. To support its camp gardeners, the Trust pays wages that are reduced annually with the intention that over time, the gardeners will be able to make money selling some produce. The refugee gardeners even made a deal to sell produce to a local supermarket. The Trust also helped launch a workers' cooperative to design and build Crisis Response Garden Kits, which provide new refugees with tools and seeds to begin growing food as soon as they arrive. The Trust hopes the project will become a "self-contained business" for Domiz families when they obtain orders from other relief organizations in crisis regions. Daily, Hunt and Perkins fight public perceptions that refugees are somehow responsible for their plight or helpless, or that camps are hopeless environments. "They want to be a productive part of humanity, just like us all," Hunt says. The Trust is also currently working in Jordan and Uganda and plans to branch out into other regions in Iraq, as well as potentially in Greece and Bangladesh. Ismail, along with about half of the camps' population, wants to stay in Domiz. She is ready to drop the refugee label and hopes to see the area become a regular village. She sees the effect of the community's greening and growth on her neighbors faces; "I see their smiling looks to their plants, full of love and longing. It brings me peace."

कभी अपने दिल की भी सुनो, इस तरह रखें धड़कन पर काबू

प्राप्त जानकारी के अनुसार:- सर्दी का प्रकोप जारी है. सर्दी के कारण तमाम समस्याओं का तो सामना करना पड़ता ही है, साथ ही ठंड का मौसम दिल के मरीजों के लिए बहुत नुकसानदायक साबित होता है, खासतौर से दिल्ली का सर्द मौसम दिल का दुश्मन माना जाता है. इन दिनों दिल के दौर, अरहाइथमाइस, अचानक कार्डिएक अरेस्ट यानी दिल फेल हो जाने के मामले ज्यादा देखे जाते हैं. इसलिए इन दिनों दिल की धड़कन का खास ख्याल रखना चाहिए. समय-समय पर डॉक्टर की सलाह लेने के साथ ही उनके बताए सुझाव पर अमल करें. इससे आप का दिल और सेहत दोनों फिट बने रहेंगे. ठंड का मौसम बच्चों और बड़े-बूढ़ों के लिए ज्यादा नुकसानदायक होता है. इनके अलावा हाई ब्लड प्रेशर के मरीजों को भी इन दिनों अपनी सेहत का ध्यान रखना चाहिए. वजह ये है कि सर्दी होने के कारण शरीर से पसीना बाहर नहीं आ पाता, जिस कारण शरीर में नमक की मात्रा बढ़ जाती है. इसके अलावा तेजी से बदलती जीवनशैली ने सेहत के सामने नए-नए खतरे खड़े कर दिए हैं. हमें अन्य बातों की तरह ही सेहत के ध्यान को भी डैली रूटीन में शामिल कर लेना चाहिए. आप चाहें घर में हों या दफ्तर में, थोड़ा समय शरीर के लिए जरूर निकालें- ध्यान रखें अगर आपकी लापरवाही से आपका दिल रूठ गया तो फिर उसे मनाने की सारी कवायद बेकार साबित हो जाएगी. सर्दी का मौसम होने के साथ-साथ ये दिन ब्याह-शादी और त्योहारों के भी होते हैं. सर्दी में आदमी का पाचन भी अच्छा रहता है और इन दिनों दावतों का खूब आनंद उठाया जाता है. लोग खूब तली-भुनी चीजें खाते हैं. चूँकि इन दिनों शारीरिक श्रम बहुत कम होता है, इसलिए शरीर में कोलेस्ट्रॉल की मात्रा बढ़ जाती है. इसलिए इन दिनों दिल का विशेष ध्यान रखने की जरूरत होती है.

www.legencyremedies.com

जैसा कि हमें बताया है, सर्दी के कारण तमाम समस्याओं का तो सामना करना पड़ता ही है, साथ ही ठंड का मौसम दिल के मरीजों के लिए बहुत नुकसानदायक साबित होता है, खासतौर से दिल्ली का सर्द मौसम दिल का दुश्मन माना जाता है. इन दिनों दिल के दौर, अरहाइथमाइस, अचानक कार्डिएक अरेस्ट यानी दिल फेल हो जाने के मामले ज्यादा देखे जाते हैं. इसलिए इन दिनों दिल की धड़कन का खास ख्याल रखना चाहिए. समय-समय पर डॉक्टर की सलाह लेने के साथ ही उनके बताए सुझाव पर अमल करें. इससे आप का दिल और सेहत दोनों फिट बने रहेंगे. ठंड का मौसम बच्चों और बड़े-बूढ़ों के लिए ज्यादा नुकसानदायक होता है. इनके अलावा हाई ब्लड प्रेशर के मरीजों को भी इन दिनों अपनी सेहत का ध्यान रखना चाहिए. वजह ये है कि सर्दी होने के कारण शरीर से पसीना बाहर नहीं आ पाता, जिस कारण शरीर में नमक की मात्रा बढ़ जाती है. इसके अलावा तेजी से बदलती जीवनशैली ने सेहत के सामने नए-नए खतरे खड़े कर दिए हैं. हमें अन्य बातों की तरह ही सेहत के ध्यान को भी डैली रूटीन में शामिल कर लेना चाहिए. आप चाहें घर में हों या दफ्तर में, थोड़ा समय शरीर के लिए जरूर निकालें- ध्यान रखें अगर आपकी लापरवाही से आपका दिल रूठ गया तो फिर उसे मनाने की सारी कवायद बेकार साबित हो जाएगी. सर्दी का मौसम होने के साथ-साथ ये दिन ब्याह-शादी और त्योहारों के भी होते हैं. सर्दी में आदमी का पाचन भी अच्छा रहता है और इन दिनों दावतों का खूब आनंद उठाया जाता है. लोग खूब तली-भुनी चीजें खाते हैं. चूँकि इन दिनों शारीरिक श्रम बहुत कम होता है, इसलिए शरीर में कोलेस्ट्रॉल की मात्रा बढ़ जाती है. इसलिए इन दिनों दिल का विशेष ध्यान रखने की जरूरत होती है.

- ज्यादा सर्दी से खुद को बचा कर रखें. कोहरे या धुंध में निकलने से परहेज करें.
- सुबह या शाम को समय निकालकर थोड़ी बहुत एक्सरसाइज जरूर करें, ताकि शरीर से पसीना बाहर आए.
- सर्दी में चाय और पकोड़ों की बार-बार याद आती है. इसलिए खान-पान के मामले में खुद पर कंट्रोल रखें.
- ज्यादा तला-धुना या मसालेदार खाने से परहेज करें. खाने में फलों को जरूर शामिल करें.
- सीने में किसी भी तरह की कोई परेशानी हो तो फोन डॉक्टर को दिखाएं, लापरवाही ना करें.
- नियमित व्यायाम करने से हृदय की धड़कन प्रक्रिया बेहतर काम करती है. शरीर को भरपूर मात्रा में ऑक्सीजन मिलती है.
- भरपूर नींद लें और अधिक थकान होने पर शरीर को आराम करने दें.
- सात घंटे से कम सोने वाले लोगों को दिल की बीमारी होने का खतरा ज्यादा रहता है.
- अधिक तनाव ब्लड प्रेशर को बढ़ाता और दिल की मांसपेशियों को प्रभावित करता है. इसलिए कोशिश करें कि तनाव से दूर रहें.
- आपका वजन अधिक है तो आपके हृदय पर दबाव पड़ता है, दिल तेजी से धड़कता है. इसलिए वजन पर कंट्रोल रखें.
- विटामिन-बी का नियमित उपयोग करने से होमोसिस्टेन का स्तर कम होता है. होमोसिस्टेन का बढ़ना दिल के लिए खतरनाक है.
- धूपपान और शराब के सेवन से दूर रहें. अगर ये आदत में शुमार हैं तो कम मात्रा में सेवन करें, हो सके तो बिल्कुल छोड़ दें.
- सर्दी में हम कम पानी पीते हैं, जोकि सेहत के लिए खराब है. इसलिए प्यास ना भी लगे फिर भी पानी पीते रहें.

सात रोगों की एक स्वादिष्ट दवा है जामुन का रस

सुनकर आपको भले ही थोड़ा अलग लगे, लेकिन जामुन का जूस न केवल गजब का स्वादिष्ट होता है, बल्कि इसका कई तरह के फायदे भी होते हैं. सबसे बड़ी बात यह है कि कुछ खास स्थानों पर इसे परोसने का तरीका भी लाजवाब है, जिसमें काले नमक का टिक्सट के साथ पेश किया जाता है. आप जब भी इसे ट्राई करेंगे, इसका स्वाद कभी नहीं भूल पायेंगे इसके यह सात लाभ भी जरूर लीजिये. भूख न लगना - अगर आपको भूख कम लगती है या आजकल भूख लग ही नहीं रही, तो एक बार जरूर इस स्वादिष्ट उपाय को आजमा लीजिये कुछ दिनों तक इसका सेवन कीजिये और जादुई लाभ खुद देखिये. ● कब्ज - कब्ज के अलावा पेट के अन्य रोगों में भी जामुन का रस बेहद फायदेमंद है. खासतौर से जामुन का सिरका इन रोगों के लिये अमृत के समान असर करता है. ● मधुमेह - मधुमेह यानि डायबिटीज के रोगियों के लिये जामुन का रस काफी लाभदायक है जामुन और आम का रस बराबर मात्रा में मिलाकर पीने से भी मधुमेह में लाभ होता है. ● उल्टी दस्त - जामुन के एक किलोग्राम ताजे फलों का रस निकालकर ढाई किलोग्राम चीनी मिलाकर शरबत जैसी चाशनी बना लें इसे एक ढक्कनदार साफ बोतल में भरकर रख लें जब कभी उल्टी - दस्त या हैजा जैसी बीमारी की शिकायत हो, तब दो चम्मच शरबत और एक चम्मच अमृतधारा मिलाकर पिलाने से तुरन्त राहत मिल जाती है.

Pfizer ने किया कमाल

देश की बड़ी कम्पनी Pfizer भी अब अंधी होकर अपना प्रॉडक्ट Pedialyte को बाजार में उतार रही है. **Pfizer मो० 09936411228, 09313174447, 09313174447**

कम्पनी की सीलबंद बोतल में फंगस अलग ही दिख रही है. जब इतनी बड़ी कम्पनी का यह हाल है तो छोटी-मोटी कम्पनियाँ अपने प्रॉडक्ट में क्या भर कर दे दें कौन सोच सकता है.

Abott की लापरवाही

देश की बहुत बड़ी व नामी गिरामी कम्पनी **Abott** लापरवाही में लोकल दवा कम्पनी को भी मात दे रही है. जी हाँ **Abott मो० 09369318541, 09761234041, 09893183539, 08953005824, 09412857136, 09555930220, 07417707779** कम्पनी की **Carbimazole Tablets IP- Neo Mecazole 10** की सील बन्द शीशी में दवा के नाम पर फंगस पायी गयी है. अब **Abott** जैसी नामी गिरामी कम्पनी का यह हाल है तो शेष बची लोकल कम्पनियों का क्या होगा?

DM Pharma

We have our own 2 manf. units
