Govt. Plans Centralised Digital Entity For 'Ayushman Bharat' Scheme

The Indian government is in discussions to set up a new digital entity called the National Digital Health Mission that will act as a central digital repository for all the data coming under its flagship health insurance scheme Ayushman Bharat. A report filed by a committee set up by the Ministry of Health and Family Welfare has identified the need to establish a specialized body called National Digital Health Mission (NDHM) which is to be based on similar models as seen in the likes of UIDAI and GSTN. The report is open for public comments till August 4. Some of the proposed provisions under the NDHM are – • Citizens should be able to access their electronic health records in a convenient manner, preferably within 5 clicks; • Citizens should get integrated health services at a single point, though multiple agencies, departments or services providers are involved; • NDHM shall assure continuum of care to citizens, across primary, secondary and tertiary care and across public and private service providers; • A framework for unified communication centre will be prepared to facilitate voice-based services and outreach; • NDHM shall support national portability for healthcare services **National Digital Health Mission Objectives:-** The report also recommends that the NDHM will be an open API-based ecosystem where security and privacy will be built into the design and development of the APIs, which will be audited for security and privacy before deployment. The 14-member committee recommended that consultations should be held with Unique Identification Authority of India (UIDAI), the Aadhaar regulatory authority, and the Ministry of Electronics and Information Technology (MEITY) in the design of the Personal Health Identifier (PHI). "Aadhaar cannot be used in every health context as per the applicable regulations. The design of PHI, therefore, must allow multiple identifiers (chosen from the specified types of identifiers) for designing the structure and processes relating to PHI," said a National Digital Health Blueprint (NDHB) created by a committee under former MeitY Secretary and UIDAI ex-chairman J Satyanarayana. The PHI will maintain a personal health record of patients and will have details about their immediate family, date of birth, gender, mobile number, email address, location, family ID and photograph. **India's Ayushman Bharat Plan:-** Under the Ayushman Bharat, India is expected to have 40,000 Ayushman Bharat Health

and Wellness Centres (AB-HWC), meant for primary health scheme called Pradhan Mantri Jan Arogya Yojana (PM-JAY) on Google Play Store. At the Union Budget 2019, the government of Ayushman Bharat. The allocation has increased by allocated to implement AB until 2020. Overall, the Indian health-expected to touch \$280 Bn by 2020, growing at a CAGR of

EuroLife Healthcare launches innovative Intravenous IV products in the Indian Drugmarket

Mumbai:- EuroLife Healthcare Ph.:- 022-42374200 / 022-42374201 Manufacturing and Distribution Company of Specialty Infusion & pharmaceuticals, todaylaunched the high quality Intravenous IV productsname Discport and Lifeport inthe Indiandrug market. Positioned as Smart Intravenous Infusion, both

products encompass the best of the latest technology that reduce the chances of any infections apart from ease of use. Discport- Does not require any venting which ensures safety. It can be sterilized at 121* C & has lowest endotoxin levels. There is nil chance of any microbiological contamination and No DEHP Exposure. Lifeport, known as Closed System Infusion (C I V Infusion),is a premium product with twoports one for the infusion delivery and another one for the extra medication. Lifeport does not require venting. It is self-collapsible bottle ensuring Zero wastage of expensive medication. No DEHP exposure, no drug incompatibility and no medication error. These products are the replacement to the presently used PE bottles (FFS bottles) the new PP bottles have better quality with additional features and are available at affordable prices to the patients. Mr. Sandeep Toshniwal, CEO of EuroLife Healthcare said, "We are dedicated to save lives of patients with our reliable and quality conscious manufacturing of premium healthcare products. We have more than 24 years of uninterrupted manufacturing expertise with state of art manufacturing facilities." EuroLife Healthcare aims to serve high quality innovation products to save lives.

care, by the end of 2019-20. The mega public health insurance and popularly known as the Ayushman Bharat, also has an appment announced that it will allocate INR 6,400 Cr for the imple- INR 4K Cr from 2017-18, while overall INR 10K crore has been care market stands at \$100 Bn, according to IBEF and is 22.9%.

ग्रीष्म ऋतु में पेय पदार्थ

चरक संहिता के अनुसार ग्रीष्म ऋतु में प्रातः काल में उषापान में सबसे उत्तम नींबू पानी का सेवन करने को सलाह दी गई है. एक चम्मच नींबू का रस, एक गिलास गर्म पानी में एक चुटकी सादा नमक का सेवन करना अति उत्तम है. स्फूर्ति बनी रहती है. नींबू पानी में नमक के स्थान पर शहद का प्रयोग भी उत्तम होता है. ग्रीष्म ऋतु में शरीर में पानी की ज्यादा आवश्यकता होती है. नींबू पानी से शरीर में पसीना ज्यादा आता है, जो उत्तम स्वास्थ्य का परिचायक है. चरक संहिता के अनुसार नींबू का प्रयोग दिन में प्रत्येक आहार के उपरान्त भी लेना चाहिए जिससे उदर में अम्लीय वातावरण न बनें.

InvaGen (A Cipla Subsidiary) Receives Final Approval For Generic Version Of Pfizer's Lyrica® (Pregabalin Capsules, 25mg, 50mg, 75mg, 100mg, 150mg, 200mg, 225mg, 300mg)

InvaGen Pharmaceuticals, Inc. ("InvaGen"), a wholly-owned subsidiary of the leading global pharmaceutical company Cipla Limited (BSE: 500087; NSE: CIPLA EQ; hereafter referred to as "Cipla") announced the receipt of final approval for its Abbreviated New Drug Application (ANDA) for Pregabalin Capsules, 25mg, 50mg, 75mg, 100mg, 150mg, 200mg, 225mg and 300mg from the United States Food and Drug Administration (US FDA). InvaGen's Pregabalin Capsules, 25mg, 50mg, 75mg, 100mg, 150mg, 200mg, 225mg and 300mg is AB-rated generic therapeutic equivalent version of Pfizer's Lyrica®. Pregabalin capsules are indicated for: • Management of neuropathic pain associated with diabetic peripheral neuropathy. • Management of postherpetic neuralgia • Adjuvantive therapy for the treatment of partial onset seizures in patients 17 years of age and older. • Management of fibromyalgia. • Management of neuropathic pain associated with spinal cord injury. According to IQVIA (IMS Health), Lyrica® had US sales of approximately \$5.4 Billion for the 12-month period ending March 2019. The product is available for shipping immediately.

गायन का प्रभाव
 आज टेंशन का जमाना है आपस के रिश्तों का प्यार समाप्त होता जा रहा है. संगीत एक ऐसा माध्यम है जो आपस का प्यार बढ़ा सकता है, रिश्तों को सुधार सकता है. मित्रता की नींव रख सकता है. अच्छे प्रसन्न समाज के लिए जहाँ खुशियाँ वहाँ संगीत का आधार चाहिए.

अभिलषा
 हिल स्टेशन पर होटल के कॉरिडर से देख रहे थे. सौन्दर्य की प्रति थी. नीचे झुगरी झोपड़िया दिख रही थी. गरीबी की अति थी. काश कि इस ढलती आयु में भी मैं दोनों जगह पहुँच पाता.

जल संचयन
 जल को बचाना बहुत आवश्यक है. इस पीढ़ी को ही परेशानी आ रही है, अगली पीढ़ी को शायद जल ही न मिले. इस दिशा में गंभीर चिन्तन आवश्यक है. हमें जल का सही उपयोग करना है, बचत करने का पूरा प्रयास करना है. यदि ऐसा करेंगे तो आने वाली पीढ़ियों का भला ही करेंगे.

मन का जोर
 किसी भी रोग को ठीक करने में दवाएँ काम करती हैं. पर मन का जोर भी चाहिए. यदि रोगी के मन में ठीक होने का विचार बना रहे तो बीमारी जल्दी ठीक हो जाती है. ऐसा देखा गया है कि असंभव रोग भी ठीक हो जाते हैं. इसलिए मन का जोर बनाए रखना चाहिए. इसी को पॉजिटिविटी कहते हैं.

न्याय
 रास्ते चलते व्यक्ति से कार वाला हलके से टकरा गया. भीड़ इकट्ठी हो गई. कार वाला पिट गया. पैदल धीरे-धीरे निकल गया. मजे की बात यह थी कि दोनों रॉन्ग साईड से जा रहे हैं.

Herbs And Shrubs: The Hidden Medicines Of Ayurveda

Indian herbs are generally used as ayurvedic remedies for various day to day life issues. Most of us have heard of them since childhood as our grandma's medicine. They can be grown in our kitchen garden and can be used anytime we want to as they are easier to take care of them. Haven't you seen TULSI plant at almost every home? Let us look at some of the most common herbs and their benefits.

नारी की खूबसूरती बढ़ाएँ

growth and deep hair cleaning • Tulsi helps in curing malaria, indigestion, headache, hysteria, insomnia and is very effective against cholera's **ALOE VERA:-** The aloe vera is cultivated only under the sun with a well-drained dry or moist type of soil. Although the Aloe Vera plant tastes like a turd, it is edible. The aloe vera sap is remarkably useful to speed up the healing & reducing the risk of infections for • wounds • cuts • burns • reducing inflammation • tanning • uneven skin tone Besides, its external use on the skin, aloe vera is also taken internally as the remedy of • ulcerative colitis • chronic constipation • poor appetite • digestive problems. Aloe Vera has enormous remedial properties inside it. It's green surface covering the jelly portion inside is it's a unique feature. Drinking aloe vera water daily will act as detox water. **CORIANDER:-** Coriander is packed with fiber, magnesium, manganese, protein, and iron. It is full of vitamin C and essential oils. It can be grown in a flowerpot with little efforts. It is used both as a garnishing as well as a cooking herb. Its aroma and taste are well known all over the world. **Main benefits of this herb contain:** • Coriander is helpful in lowering down the cholesterol level in the blood • This power-packed herb helps in nausea, vomiting, and stomach disorders • It is helpful for hypertension patient as it lowers down the blood pressure level in the body • It is believed to cure small-pox • Coriander also helps in proper hormone secretion, it is very helpful in preventing menstruation disorder **PEPPERMINT:-** Peppermint is regarded as 'the world's oldest medicine' often, with archaeological evidence placing its existence and use at least as far back as ten thousand years ago. Peppermint is high in manganese, vitamin A and vitamin C. Crushed leaves of peppermint rubbed on the skin helps soothe and relax the muscles. Infused peppermint leaves are used in many home remedies. **Some of them are:** • It reduces irritable bowel syndrome • It can fight against upset stomachs • Peppermint inhibits bacterial growth • It can also treat fevers • flatulence can be cured by using peppermint • It can be useful in the spastic colon. These easy-to-grow herbs bring a lot of health benefits to your garden as well as your family. Many of them attract insects, including bees, and help in removing harmful pests from more sensitive plants nearby. Locate these plants with their preferred conditions for light, water, and temperature in mind.

BIA Separations Selected For Manufacturing Process Development Support For Gene Therapy Pipeline

BIA Separations, a leading biochromatography development and manufacturing company, today announced it is collaborating with AveXis, a Novartis company, to enhance the commercial purification process for its gene therapy pipeline, beginning with Zolgensma® (onasemnogene abeparvovec-xioi), the first U.S. Food and Drug Administration-approved gene therapy indicated for the treatment of pediatric patients with spinal muscular atrophy (SMA) who are less than two years of age. Zolgensma is a one-time infusion that provides a functional copy of the human SMN gene to halt disease progression through sustained SMN protein expression. BIA was selected as a result of its expertise in viral and DNA purification, particularly adeno-associated virus (AAV), and chromatographic technology for the purification and analysis of biomolecules.

Prediabetes: 5 Easy Tips To Reduce The Risk Of Diabetes And Stroke

Prediabetes is the condition when your blood sugar is higher than normal but not as much as a diabetic patient. Usually, you do not see symptoms, and the disease attacks your body without any sign or symptom. You can find this by making a simple blood test. If you are overweight or if your age is more than 45 and you do not even exercise, then you have a high risk of prediabetes. Due to non-treatment, you are more at risk for type 2 diabetes and heart-related diseases but with the help of a few steps, you can change this situation. **Lose Weight:-** You may find a terrible task to lose weight, but there is no big deal in this. If you reduce your body weight by just 7 percent, then it can make a huge difference. However, It is more important to eat a healthy low-calorie diet daily. Perhaps, it's time to pay attention to the following things: • weight • eating habits • physical activities **Eat Healthy:-** Filling your half plate with non-starchy vegetables is a very good start towards eating healthy. A quarter of your plate should be of starch food. Apart from this, chicken, fish, beans, etc. can be used in one-quarter of the remaining. Be very cautious with fried, deep-fried food or carbs such as pasta because they

can increase your blood sugar. **Exercise:-** It's time to get out of the house and burn some calories which will help you lose weight faster and you could feel better. Don't worry as you do not have to prepare for the marathon. You can lose weight by walking 30 minutes daily, five times a week. Making some workouts friends can also sometimes help you stay connected with it, so call a friend or join a gym and keep doing something new. **Here are some instances of physical exercise:** • Aerobic exercise that includes walking, swimming, dancing • weight lifting • pushups and pull-ups **Get Proper Sleep:-** Your sleeping time will help keep your blood sugar at a normal level. **If you have the following symptoms:** • difficulty while sleeping • wake up early • sleep less than 5 hours in the night then you are more likely to get diabetes. About 7 or 8 hours of sleep is considered mandatory at night. Do not drink alcohol or caffeine at night (before sleep). For better sleep fix a routine and sleep daily at the right (fix) time. Moreover, try to create an atmosphere of peace in your bedroom. **Quit Smoking And Alcohol:-** If you are addicted to smoking or drinking, then now is the time to quit it. Smokers are generally at risk of having type 2 diabetes, and the chances are 30 to 40 percent higher than non-smokers. If you have diabetes and you still smoke or drink then your condition can get worse and your blood sugar can get out of control.

We can't spell Success without 'u'

Innovus Pharmaceuticals Announces That Its Delta Prime Savings Club E-Commerce Marketplace Is On Track For Annual Sales Of Approximately \$3 Million In 2019

Innovus Pharmaceuticals, Inc. ("Innovus Pharma" or the "Company") (OTCQB Venture Market: INNV), an emerging commercial-stage pharmaceutical company that delivers safe, innovative and effective over-the-counter medicine and consumer care products to improve men's and women's health and respiratory diseases, today announced that its Delta Prime Savings Club™ E-commerce marketplace (the "DPSC") is on track for annual sales of approximately \$3 million. The DPSC, one of Innovus Pharma's main E-Commerce marketplaces, was purchased by the Company in early 2019 for approximately \$35,000 plus ~\$300,000 in inventory and specializes in selling many types of consumer products in addition to the Company's OTC ANDA and supplement products and other general consumer care products. "We are very pleased to announce the progress relating to our DPSC E-commerce marketplace," said Innovus Pharma CEO, Dr. Bassam Damaj. "We purchased the DPSC in early 2019 and are very happy with its progress to date. In addition, we are also looking forward to growing our other E-commerce marketplaces, namely Supplementhunt.com, our discounted supplement site, iCareSup.com, our Asian direct to consumer site expected to launch soon, and to grow our 11 Amazon® stores as well as our other e-commerce sites globally. We are continuously growing these sites in order to diversify our businesses across the world," he continued.

Goal Is To Make India A Global Model For 'Health For All': Harsh Vardhan

Dr. Harsh Vardhan began his second term as minister in the National Democratic Alliance – I government by cycling from home to the health and family welfare ministry in Nirman Bhavan to highlight the importance of physical activity for health and green transport for the environment. He had not even hopped off his bicycle when his staff informed him about a Nipah case being confirmed in Kerala, which was followed a week later by nationwide protests and strikes by doctors and health professionals after two junior doctors were assaulted at Nil Ratan Sircar Medical College in Kolkata. Dr Harsh Vardhan speaks to Sanchita Sharma on the firefighting his ministry has done over seven weeks and its plans for the next five years. Edited excerpts: **Your taking charge**

was immediately followed by one of India's biggest doctors' strikes. How can hospitals be made safer for doctors?

Doctors often work under stressful and difficult conditions and I strongly condemn assault against them. The violence in Kolkata that led to doctors' strikes across the country gravely affected healthcare services. The health ministry has set up a 10-member committee on violence against doctors with representation from the ministry, Indian Medical Association (IMA), Federation of Resident Doctors Association, Medical Council of India, AIIMS, and the Union ministry of home affairs and the law department. The first meeting was on July 10th, during which the home and law ministries concurred on the need for a central legislation. It was decided to have the first draft of the proposed Act readied within a week. I wrote to West Bengal chief minister Mamata Banerjee, urging her provide a secure working environment to doctors. I also requested all chief ministers to consider establishing specific state legislation or bring amendments in

Manoj Kumar ji

Jagdish Medical Hall

Kapoor Market, Ramraj Road
Distt- U.S. Nagar , Mob:- 9837006785

existing state legislative acts to ensure doctors and clinical establishments function without fear of violence. **What is the long-term solution to end violence against doctors?** Ensuring a safe environment for doctors and patients and involves multiple stakeholders. Apart from taking all possible preventive and deterrent measures, state governments need to investigate all cases of violence promptly and ensure that the criminals get prosecuted under the legal provisions available. The IMA's draft act, called The Protection of Medical Service Persons and Medical Service Institutions (Prevention of Violence and Damage or Loss of Property) Act, 2017, which includes clauses on penalty and recovery in case of loss or damage to property, has now been shared with the states for their consideration. Nipah was confirmed in Kerala the day you took charge even as Muzaffarpur was struggling to contain child deaths from acute encephalitis syndrome (AES). Kerala contained Nipah, but Bihar floundered. How can the Centre ensure containment and treatment protocols are followed across states? You see, health is a state subject. The Integrated Disease Surveillance Programme (IDSP) does surveillance to quickly detect and respond to disease outbreaks, providing additional manpower, training rapid response teams to investigate outbreaks, strengthening laboratories, strengthening ICT equipment for data entry, analysis and data transfer, and providing funds for operationalisation. The Centre also supports states in implementing communicable disease programmes, such as National Vector Borne Disease Control Programme that covers six vector-borne diseases, including Japanese encephalitis and AES, which is of unknown etiology. **So, what is causing the AES deaths in Muzaffarpur?** AES describes a disease with symptoms of fever and altered consciousness and has a very complex etiology. Studies were done on the possible association with litchi toxins in Muzaffarpur during 2013-14, but no definitive evidence linking AES to litchi toxins was conclusively established. In the present outbreak, Indian Council of Medical Research (ICMR) has done research studies covering various aspects of the disease and I am hopeful we will arrive at substantial findings soon. **Soon after taking charge, you requested all states that haven't joined the Ayushman Bharat-Pradhan Mantri Jan Arogya Yojana (AB-PMJAY) to launch the scheme. Rajasthan has announced merging the state healthcare scheme with AB-PMJAY. Did you hear from Delhi, Telangana, Odisha or West Bengal?** The implementation of AB-PMJAY across the country is undoubtedly the top priority. The scheme is going to be rolled out in Rajasthan and Punjab very soon. As a follow-up action, CEO, National Health Agency (NHA), visited Odisha and the state is positive about implementing AB-PMJAY. The NHA is working on the convergence plan. I expect other states to get on board sooner than later. **How many people have been treated under AB-PMJAY? Which are the best and worst performing states?** The budget for Ayushman Bharat went up 154.87% this year. Under the health protection scheme, there have been 32,07,000 hospitalisations and 8.9 crore cards issued till July 12. It is difficult to rate states as there are different parameters for performance, such as access, quality etc. Some states that are doing better are Chhattisgarh, Maharashtra, Jammu & Daman and Diu, Gujarat, Kerala, Himachal Pradesh etc. The NHA continually performs of all states on different parameters and issues guidelines to improve **How is primary health care, which can treat 80-90% illnesses, being ened?** As you know, delivering Comprehensive Primary Health Care (CPHC) and wellness centres (HWCs) is a key component of Ayushman Bharat, which programme being implemented to achieve the proposed goal of universal vision is to transform 150,000 sub-health centres (SHC) and primary health AB-HWCs in a phased manner. The target for 2018-19 was 15,000, and the get for 2019-20 is 40,000 and so on, till we achieve our goal by 2022. We are have at least 19,000 operational AB-HWCs. In addition to investments made and other programmes to strengthen PHCs/SHCs, central funds are being gal-outlay of Rs 1,200 crore was made as central share for 2018-19, and another for FY 2019-20. Till now, approvals for more than 52,000 AB-HWCs have been **technical capacity in resource-deficit regions?** Investments made by the ing primary health care teams at sub-health centres, posting new cadre of non-expanding the range of medicines and diagnostics so that HWC become the services related to maternal, newborn, child health and nutrition and some communicable diseases. AB-HWCs will also provide care for acute simple illnesses, screening, prevention and management of chronic diseases like hypertension, diabetes, mental health, and care for chronic communicable diseases like tuberculosis and leprosy, and elderly and palliative care. All these additions are, of course, incremental and the phasing will depend upon the states. Artificial intelligence (AI) is also being in public health, such as setting up an imaging bio-bank of cancer-related radiology and pathology images of more than 20,000 profiles of cancer patients with focus on the major cancers prevalent in India. AI is also being used for early detection of diabetic retinopathy, which is a side effect of uncontrolled diabetes that can cause blindness. **As health minister, which steps will you prioritise to ensure clean air?** This is a subject that involves different ministries and cooperation from various stakeholders, including state governments. During my tenure in the ministry of environment, forests and climate change, we launched the National Clean Air Programme to reduce air pollution through various measures. Cooperation from all stakeholders was sought to lower vehicular emissions, stop stubble burning etc., which adds to air pollution. Under the health ministry, the NCDC (National Centre for Disease Control) is collecting data on acute respiratory illnesses reporting to Emergency departments of six central government hospitals in Delhi. The data is being analysed monthly to track how spikes in AQI

What are your two biggest priorities as health minister? Preventing all illnesses and ensuring the population has the tools to stay healthy is a priority. One of the key priorities is stopping tuberculosis, which claims more lives than any other infectious disease, by 2025. Moving towards universal health care for each and every citizen of India is the prime minister's dream and we will work hard to make it a reality. The goal is to make India a global model for 'Health for All'.

What are your two biggest priorities as health minister? Preventing all illnesses and ensuring the population has the tools to stay healthy is a priority. Moving towards universal health care for each and every citizen of India is the prime minister's dream and we will work hard to make it a reality. The goal is to make India a global model for 'Health for All'.

What are your two biggest priorities as health minister? Preventing all illnesses and ensuring the population has the tools to stay healthy is a priority. One of the key priorities is stopping tuberculosis, which claims more lives than any other infectious disease, by 2025. Moving towards universal health care for each and every citizen of India is the prime minister's dream and we will work hard to make it a reality. The goal is to make India a global model for 'Health for All'.

“Indian Pharma Expo (IPE) 2019” Held On 16th, 17th & 18th July 2019 at Pragati Maidan, New Delhi (Post Event Coverage)

The Indian Pharma Expo 2019 was inaugurated on Tuesday 16th July at Pragati Maidan New Delhi by Shri. DC Sahu, Dy Director MSME DI Okhala, New Delhi M/O Micro, small & Medium Enterprise, Government of India with Dr. Monica Sood Bhatia MD CIMS Medica India & Middle East. With the Indian Pharmaceutical Industry growing leaps and bounds, this event has helped the industry overcome several challenges, by identifying cost-effective production techniques, procurement, logistics, etc. This year too, the IPE was an ideal platform for the companies to witness latest advancements in Manufacturing, Research and Development, Packaging Solutions, Supply Chain Management, Franchising, Distribution and many more domains. In addition, the Expo has provided eminent stakeholders in Pharmaceutical Industry as a chance to generate new business leads and to maximize revenue potential. The Business Excellence Awards in the presence of Chief Guest Shri. P Raghvendra Rao Secretary Ministry of Chemicals and Fertilizers; Government of India along with the Guest of Honor Shri. Vijay Kumar Addl Director MSME – Development Institute, New Delhi felicitated the achievers in the fields of Research and Development, Active Pharmaceutical Ingredients, Formulations, Manufacturing, Packaging, Distribution, Marketing, Franchising, Outsourcing, Supply chain and Logistic Management, and other Support Services. The Awards has also provided much needed recognition to proactive and innovative approaches to help improve the standards of pharmaceutical delivery. Hence the IPE, has added to the prestige and honor of the Business Excellence Awardees. Being a global event & total of 8500+ visitors attending also from countries like China, Southeast Asia, Latin America, Middle East & Africa the IPE and Business Excellence Awards, brought together eminent personalities from different sectors of Pharmaceutical, Non-pharmaceutical, and Allied-healthcare industries and provided them with an opportunity to exchange information, products, services, and ideas to help identify new business opportunities. The Industry have gained the most, from this one of a kind event by understanding the latest trends and innovations the market has to offer.

Lyme Disease Home Remedies: These Simple Tips Can Make Healing A Simple Process

As per a recent study by CDC, there has been an 80 per cent rise in the cases of Lyme disease from 2004 to 2016. In numbers, the figures increased to 36,429 from 19,804. Lyme disease is a bacterial infection caused due to a tick bite by Borrelia Burgdorferi. An infected tick can spread this disease in humans quickly, by directly affecting the human tissues. If left untreated, the bacterium spreads through the blood leading to several body parts and red rashes on the skin. It takes 6-7 days minimum for the rashes to appear. Following are some of the other symptoms of Lyme disease: ● Fever with shivering or hot flushes ● Constant headaches ● Pain in joint and muscles ● Loss of energy and continuous feeling of fatigue

Fasten Recovery With These Home Tips:- Following are some of the essential things one can do to fasten the recovery of Lyme disease: **Eat Whole Foods:-** Doctors recommend that Lyme disease patients should take a while food diet to fasten the recovery process. Eat a diet that agrees with your gut for a stronger immune system. It is required to have a comprehensive elimination diet where one should analyse which food type works well for their gut health. As per the diet plan by Functional Medicine, it is required to eliminate the allergens and inflammatory foods from the diet. Refrain from taking dairy, gluten, caffeine, sugar and alcohol.

Supplement Your Diet:- Recovery is faster if there are proper supplements and nutrients available in the body. For the same, Lyme disease patients should ensure to take proper nutrients and minerals required for faster recovery: **Multimineral** – Taking multimineral supplements enhances the detoxification process of the body. **Probiotics** – Probiotics are essential to supplement the healthy microbes present in the body. **Omega Acids** - 4:1 ratio of omega-3 to omega-6 fatty acids is essential to expedite the recovery process. **Vitamin D** – Sunlight is best required to reduce the rashes on the body. A minimum of 20 minutes of direct sunlight is essential for Lyme disease patients. **Detoxify The Body:-** Be it antibiotics or herbal treatments, Lyme microbes get killed with such a routine. Detoxify your body with these simple tips: ● Activated charcoal in the diet works well for Lyme patients ● Exercise or go for a sauna bath to sweat more than usual ● Poop daily without fail to restrict the chances of constipation ● Stay hydrated ● **Moderate Exercises:-** Minimal exercises are a must for Lyme disease patients as the flow of blood is essential to enhance the healing in the body. Exercising boosts the endorphin levels in the body. One should go for restorative exercises like yoga, stretching and swimming. **Sleep Is Important:-** Sleep is the most crucial aspect to fasten the recovery of Lyme disease. You could be following everything as per the list, but disturbed sleep patterns can spoil it all for you. Give your body the time to recover and detoxify. Let your sleep open on its own and not with an alarm. Get up only when you feel fresh. This tip primarily is for those who have insomnia. Whenever tired, get into the bed and try to take some sleep.

HIV होने के संकेत हैं गले में खराश, बुखार और जोड़ों में दर्द, जानें किन तरीकों से होती है एचआईवी की जाँच

विश्व स्वास्थ्य संगठन (WHO) के आंकड़ों के मुताबिक साल 2017 के अंत तक दुनियाभर में 36.9 मिलियन लोग एचआईवी (Human immunodeficiency virus Or HIV) के साथ जी रहे थे. ये आंकड़े हकीकत बयां करने के लिए काफी हैं. इसके साथ ही एचआईवी और इससे जुड़े मिथकों और गलत धारणाओं के बारे में बात करना बेहद जरूरी हो जाता है. खैर, एचआईवी एक वायरस है जो आपकी प्रतिरक्षा प्रणाली यानी इम्यून सिस्टम को टारगेट करते हुए उसकी इसकी कार्य प्रणाली को बदलने की क्षमता रखता है. एचआईवी या ह्यूमन इम्यूनोडेफिशिएंसी वायरस आपकी प्रतिरक्षा कोशिकाओं या 'टी' कोशिकाओं पर हमला करता है और आपके शरीर की अन्य बीमारियों से लड़ने की क्षमता को कम कर देता है. अगर आप इस वायरस से लंबे समय तक ग्रसित रहते हैं और इसका आवश्यक उपचार नहीं करते हैं तो यह एड्स (Acquired Immune Deficiency Syndrome) के रूप में विकसित हो सकते हैं, जो आपके जीवन के लिए एक खतरनाक स्थिति है. यह एचआईवी का एडवांस स्टेज है, जिसका अर्थ है कि आपकी प्रतिरक्षा प्रणाली पूरी तरह से क्षतिग्रस्त हो चुकी है, यहाँ तक कि आपके लिए अब छोटी स्वास्थ्य स्थिति भी घातक हो सकती है. एचआईवी वायरस रक्त, वीर्य, योनि स्राव, गुदा से निकलने वाले तरल पदार्थ, और ब्रेस्ट मिल्क के माध्यम से फैलता है. **एचआईवी के शुरुआती लक्षण- HIV Symptoms:-** एचआईवी संक्रमण के शुरुआती लक्षण निम्न लिखित हैं:- ● ठंड लगना ● बुखार ● कमजोरी ● गले में खराश ● जोड़ों में दर्द ● पसोना ● लाल चकत्ते और छाल **एचआईवी का निदान- HIV Diagnosis:-** जहाँ तक एचआईवी के निदान (diagnosis) का सवाल है, कुछ ऐसे परीक्षण हैं जो डॉक्टरों को आपकी स्थिति जानने और पुष्टि करने में मदद कर सकते हैं: **आरएनए परीक्षण- RNA test:-** इस परीक्षण में, डॉक्टर संक्रमण के संपर्क में आने के 10 दिनों के बाद आपके रक्त में एचआईवी वायरस की जाँच करते हैं. **एंटीजेन पी24 टेस्ट- Antigen p24 test:-** इस टेस्ट में, डॉक्टर आपके रक्त में p24 नामक एक प्रोटीन की तलाश करते हैं, जो वायरस का एक हिस्सा है **एंटीबॉडी विभेदन परीक्षण- Antibody differentiation test:-** यह परीक्षण विभिन्न प्रकार के एचआईवी संक्रमणों के बीच अंतर करने के लिए किया जाता है. **वेस्टर्न ब्लॉट टेस्ट- Western blot test:-** यह परीक्षण आपके रक्त प्रोटीन और एचआईवी एंटीबॉडी पर फोकस को अलग करता है जो एचआईवी संक्रमण का संकेत देते हैं.

अगस्त माह के त्यौहार

01.08.2019	श्रावण अमावस्या
02.08.2019	चन्द्र दर्शन
03.08.2019	हरियाली तीज, अन्दल जयन्ती, आदि पेरूक्क
04.08.2019	नाग पंचमी, श्रावण सोमवार व्रत, कल्की जयन्ती, स्कन्द षष्ठी
06.08.2019	मंगला गौरी व्रत
07.08.2019	तुलसीदास जयन्ती
08.08.2019	मासिक दुर्गाष्टमी
09.08.2019	वरलक्ष्मी व्रत
11.08.2019	श्रावण पुत्रदा एकादशी, दामोदर द्वादशी
12.08.2019	श्रावण सोमवार व्रत, प्रदोष व्रत
13.08.2019	मंगला गौरी व्रत
14.08.2019	ऋग्वेद उपाकर्म
15.08.2019	श्रावण पूर्णिमा, राखी, रक्षा बन्धन, गायत्री जयन्ती, नारली पूर्णिमा, पूर्णिमा उपवास, यजुर्वेद उपाकर्म, हयग्रीव जयन्ती, संस्कृत दिवस, स्वतंत्रता दिवस
16.08.2019	गायत्री जापम, भाद्रपद प्रारम्भ
17.08.2019	सिंह संक्रान्ति, मलयालम नव वर्ष
18.08.2019	कजरी तीज
19.08.2019	संकष्टी चतुर्थी, संकटहरा चतुर्थी
20.08.2019	नाग पञ्चम
21.08.2019	बलराम जयन्ती, राधेण छठ
22.08.2019	शीतला सातम कालाष्टमी, आद्याकाली जयन्ती, अष्टमी रोहिणी
24.08.2019	कृष्ण जन्माष्टमी, रोहिणी व्रत
25.08.2019	दही हाण्डी
26.08.2019	अजा एकादशी
27.08.2019	गौण अजा एकादशी, वैष्णव अजा एकादशी, पर्युषण परवारम्भ
28.08.2019	प्रदाष व्रत, मासिक शिवरात्रि
30.08.2019	भाद्रपद अमावस्या, दर्श अमावस्या, पिठोरी अमावस्या, पोला, वृषभोत्सव
31.08.2019	चन्द्र दर्शन

Dr. Reddy's Announces The Launch Of The Over-The-Counter Store Brand Equivalent Of Mucinex® D Extended Release Tablets In Two Strengths In The U.S. Market

Dr. Reddy's Laboratories Ltd. Mob:- 09305730890, 09058458612, 9368696718, 9305730890 (BSE: 500124, NSE: DRREDDY, NYSE: RDY, along with its subsidiaries together referred to as "Dr. Reddy's") today announced the launch of an over-the-counter (OTC) store-brand equivalent of Mucinex® D Extended Release Tablets in two strengths—Guaifenesin 600 mg and Pseudoephedrine HCl 60 mg, and Guaifenesin 1200 mg and Pseudoephedrine HCl 120 mg—in the United States market, as approved by the U.S. Food and Drug Administration (USFDA). Dr. Reddy's OTC Guaifenesin and Pseudoephedrine HCl is used to help loosen phlegm (mucus) and thin bronchial secretions to rid the bronchial passageways of bothersome mucus and make coughs more productive; temporarily relieve nasal congestion due to common cold, hay fever, and upper respiratory allergies; temporarily restore freer breathing through the nose; promote nasal and/or sinus drainage; and temporarily relieve sinus congestion and pressure. "We are excited to bring first to market the store-brand equivalent of Mucinex® D Maximum Strength Extended Release Tablets. These launches illustrate our continued commitment to the OTC business and our growing portfolio in the cough, cold and allergy category," says Milan Kalawadia, Senior Vice President and Head of US OTC and Specialty Rx Divisions, Dr. Reddy's Laboratories.

Get Your Visual-Aids Printed Thru OEMR Technology

Services Offered :

Family History Of Heart Disease Is A Significant Risk Factor In Acquiring Coronary Artery Disease (CAD)

More than 52% of deaths caused by heart diseases in the country are in people below 70 years of age. People with a family history are susceptible and therefore, the need of the hour is to raise awareness on following a healthy lifestyle and undergoing timely checkups. AD impacts the flow of oxygen-rich blood to the heart, which can, over time, put a person at an increased risk of a heart attack. Cardiac ailments can put a massive dent in the lives of people, especially those who are susceptible to it. While timely diagnosis and treatment are essential, it is also imperative for people to start making healthy changes to their lifestyle from a young age. Dr Manoj Kumar, Director and Head - Cardiac Cath Lab, Max Super Specialty Hospital, Patparganj, New Delhi, said, "People who have a family history of heart diseases are more likely to get CAD and have high build-ups of calcium in their arteries. It is thus important that they get their coronary artery calcium levels checked at regular intervals. When the arteries stop supplying blood to the heart, CAD strikes. In this case, the muscles in and around the heart start narrowing. This happens due to cholesterol and plaque build-up on the inner walls of the artery. As the build-up increases, supply of oxygen to heart is reduced, leading to angina or heart attack. Blockage in the arteries can develop from a young age. While some amount of it is common, wrong lifestyle choices can worsen the situation. If you have a parent or a sibling with a case of CAD, you must take precautions right from a young age to avert the risk." Adding further, Dr Manoj Kumar, said, "The tendency of premature CAD in Indians can be attributed to a genetic predisposition including high levels of low-density lipoprotein (LDL-C) or 'bad' cholesterol and metabolic syndrome. When combined with an unhealthy lifestyle, these can wreak havoc on the heart leading to early mortality and morbidity. It is, therefore, essential to cultivate healthy habits right at the outset to reduce the risk of acquiring CAD and other heart problems." **CAD Treatment:-** For CAD, angioplasty is one of the treatment options available. This is done to restore the flow of blood in the body. In this process, a drug-eluting stent is coated with time-release medicine. **Some tips to prevent CAD:-** • Eat a low fat, high-fibre diet (including plenty of fresh fruits, vegetables and whole grains). Limit your salt consumption to 6 grams a day. • Indulge in regular exercise to maintain a healthy weight. Exercise will also help strengthen the heart and increase blood circulation; reduce cholesterol levels, and keep blood pressure under check. • Smoking can cause CAD and must be avoided. It is also imperative to reduce your alcohol consumption. • Ensure that your BP and cholesterol levels are under control. • Limited consumption of alcohol is suggested. • Proper sleep is essential to recover from daily wear and tear in the body.

10 Medical Innovations For 2019

Alternative therapies for pain, the use of artificial intelligence in healthcare, an expanded window to treat stroke patients, are some of the innovations that will enhance healing and change healthcare in the coming year. **Alternative therapy for pain: fighting the opioid crisis:-** The opioid crisis has been declared a public health emergency. Today, chronic pain is the leading cause of opioid prescription. Though several clinically validated alternative therapies for chronic pain exist, none have curtailed the crisis. Now, innovation and potential for hope come by way of pharmacogenomic testing, which uses a patient's genetic makeup to predict an individual's metabolism of drugs, including some opiate-based drugs. Pharmacogenomic testing can be used to avoid adverse reactions and eliminate unnecessary and ineffective prescriptions, replacing them with more effective medications. Pharmacogenomics can also be used to predict who may get little or no pain relief from using some opiate-based analgesics. Such patients might otherwise finish their prescription quickly and return for a new prescription earlier than expected. Pharmacogenomics can provide the opportunity to tailor medication therapy. In 2019, with increased access to genetic testing, pharmacogenomics is poised to make significant inroads into precision medicine and potentially end the crisis. **The advent of artificial intel-**

ligence in healthcare: Once thought as a futuristic threat to humankind, artificial intelligence is now a part of everyday life. In healthcare, AI is changing the game with its applications in decision support, image analysis, and patient triage. Today, AI is helping physicians make smarter decisions at the point of care, taking the hassle and uncertainty out of viewing patient scans, and reducing physician burnout. For instance, machine learning algorithms have the ability to highlight problem areas on images, aiding in the screening process. Additionally, with their ability to reduce clinical variation and duplicative testing while ensuring patient safety, decision support systems quickly make sense

of the mountains of data within a physician's EMR system. patients has become a matter of working smarter, not hard. When it comes to stroke intervention, a timely response is cause irreversible destruction, often resulting in disability. deployed to save tissue. But until now, an intervention of a of time. Released this past year, new guidelines suggest frame is anticipated to lower the risk of disability and pro-future stroke patients. **Advances in immunotherapy** for therapy, is a technique that uses the body's own immune have existed for some time, the worldwide work toward a immunotherapeutic targets. Scientists are creating life-joint therapy and engineered T-cells. With the near-daily ers, it is the hope that effective therapies will soon exist for **with 3D printing:-** Utilizing 3D printing technology, medical a patient. Popular for their gaming applications, virtual and mixed reality, with their futuristic effect, never fail to dazzle audiences. But VR/MR technology is much more than a game. These reality systems have recently caught the eye of health-care professionals eager to sharpen their skills. Now popular for medical education, VR/MR programs provide simulation training that serves to enhance traditional medical schooling. With this immersive style of learning, VR/MR training appeals to all types of learners: audio, visual and kinesthetic. Education via simulation is a productive step toward the system's most adept and confident healthcare providers. **Visor for prehospital stroke diagnosis:-** Though less common than ischemic strokes, hemorrhagic strokes – during which blood escapes from a ruptured blood vessel in the brain – are responsible for nearly 40 percent of stroke deaths. Rapid diagnosis is necessary for effective treatment, as uncontrolled bleeding can lead to swelling of, and damage to, the brain. To speed diagnosis, healthcare professionals are using new, advanced technologies such as the hemorrhage scanning visor, which can detect bleeding in the brain. An efficient diagnostic tool, the visor for prehospital hemorrhage scanning serves to speed up diagnosis and the ever-important time to treatment. **Innovation in robotic surgery:-** Most surgeries performed today are the shortest and least invasive that science will allow. This adaptation in surgical methodology is brought about in part by the integration of robotics. Robots in the operating room provide surgeons with guidance for extreme precision in surgery. Today, surgical platforms are highly advanced and are being used anywhere from spine to endovascular procedures. Shortened recovery time and limited pain after surgery are just a few of the patient benefits seen with minimally invasive robotized surgery. Continued advancement in the field has led to more precise and effective surgeries with improved surgical outcomes. **Mitral and tricuspid valve percutaneous replacement and repair:-** Cardiac surgery today is less invasive and more routine and effective than its historic counterpart. Performed percutaneously – via a catheter through the skin – many cardiac procedures no longer require an open heart. Two such procedures performed this way include replacements and repair of both the mitral and tricuspid valves. Hot on the trail of aortic valve percutaneous intervention, recent percutaneous mitral and tricuspid valve intervention has yielded significant positive outcomes while filling a void in the field of heart surgery. The exploration of this technology in a greater patient population is ongoing, but with promising postop results, the innovation has significant implications for the future of cardiac care. **RNA-based therapies:-** Akin to DNA-based gene therapies, RNA-based therapies are the newest innovation in labs nationwide and have shown immense potential. Interfering with genetic data at the ribonucleic acid (RNA) level gives scientists the ability to intercept a patient's genetic abnormality before it is translated into functioning (or nonfunctioning) proteins. Today, the most popular and successful mechanisms of RNA therapy include antisense nucleotides and RNA interference. These new therapies are being explored in a variety of rare genetic diseases such as Huntington's disease, as well as in cancer and neurologic diseases, with the hope of treatment by way of alternate genetic data. These new mechanisms of action are opening windows for progress and innovation in therapeutics.

Cipla Eyes Chinese Respiratory Market Through JV With Jiangsu Acebright

Drugmaker **Cipla Mob:- 08868060741** a prominent name in the respiratory segment in India, is now eyeing the Chinese market through a manufacturing joint venture in the country with Shanghai-based Jiangsu Acebright Pharma to make respiratory drugs in China. Respiratory illnesses are a major cause of death in the country. Cipla (EU), a UK-based wholly owned subsidiary of Cipla, and Jiangsu Acebright Pharma will set up a JV in China, where the former would hold an 80 per cent stake and Acebright would hold the remaining for a combined investment of \$30 million. The JV will set up a manufacturing facility of respiratory products. The plant is expected to be commissioned in 2020. "While our core home markets remain our current growth anchors, we see China as a crucial part of our future road map. In May, we inaugurated our office in Shanghai. We have a long-standing relationship with Acebright, and this partnership to build a manufacturing facility in China is a significant step for us," said Umang Vohra, managing director and Global chief executive officer of Cipla. Cipla has already started clinical trials of a dry-powder inhaler (Fluticasone Propionate Salmeterol or FSPM) in China. It had launched FSPM in eight European countries and also in Australia. In an earlier interaction with Business Standard, Vohra had indicated that in two to four years, the company expects to see good traction from the Chinese market. "In two to four years, we will see good traction from the Chinese market. It is essentially a branded market and the size is huge. While it takes patience to enter the market, it does offer great potential," Vohra had said. In fact, after establishing a stronghold in the domestic market, Cipla is eyeing the next leg of growth in the segment to come from global markets. The company enjoys a 67 per cent share across the Indian subcontinent's respiratory market and sees potential for a 14-15 per cent growth as the market is under-penetrated. In India, respiratory constitutes a 31 per cent share in the overall revenue. Most of the respiratory products that Cipla has lined up for the international markets have a market size of around \$2 billion or so. The competition is expected from three to four players. It sees \$100-million revenue from each of the key products (generic Albuterol, FSPM, and generic Advair) depending on how many other players get approval. The \$100-bn Chinese market too has potential for respiratory drugs. Cipla thus sees a potential in the market which is largely dominated by multi-nationals like GlaxoSmithKline, Novartis, Boehringer Ingelheim among others. "We are keen to take our well-established expertise in the respiratory segment to patients in China. Simultaneously, we will explore various routes to build a portfolio of products in other therapeutic segments such as oncology," Vohra added. The company does not have significant exports to China at the moment "We do not have a significant export presence to China right now. The focus is broadly respiratory products through local manufacturing and other therapies through import and other potential routes. We are looking at the oncology segment for instance," said a Cipla spokesperson. Jiangsu Acebright Pharmaceuticals Co is a subsidiary of the Shanghai Acebright Pharmaceuticals Group. Acebright Group, established in 1996, is mainly engaged in anti-viral, oncology products and vitamin ingredients. It is a supplier of anti-viral and oncology active pharmaceutical ingredients (APIs) APIs for global market and a manufacturer of finished dosage products to meet HIV/AIDS and cancer patients' needs for China market. Shengping Xu, chairman of Acebright Group, said, "We have a long-standing partnership of more than 20 years with Cipla which shares our vision and approach towards patients. We....strongly believe the joint venture will bring more products to Chinese patients in the respiratory segment."

क्या आप भी घमौरियों से हैं परेशान? जानें इसके कारण, लक्षण और उपचार

घमौरियाँ एक ऐसी हैं, जिसमें त्वचा पर चुभन महसूस होती है। कई बार इसमें खुजली भी हो सकती है। यह वयस्कों और बच्चों को तब होता है जब आपकी त्वचा पर पसीने की वजह से नमी बरकरार रहती है। या कई बार बारिश में भीगने से भी ये हो सकता है। घमौरियों में आपके शरीर पर छोटे-छोटे लाल उभार हो जाते हैं, जिसे आमतौर पर लाल चकत्ते कहते हैं। यह सिर, पीठ, गर्दन, हाथों, बगल और जांघों में भी हो सकती है। घमौरियाँ ज्यादातर गर्म और नम स्थितियों की वजह से होती हैं। **घमौरियों के कारण:-** घमौरियाँ तब होती हैं जब पसीने वाले छिद्र बाधित हो जाते हैं। ऐसे में पसीना वाष्पित होने के बजाए त्वचा के नीचे ही रूक जाते हैं, जो त्वचा पर सूजन और दाने या लाल चकत्ते उत्पन्न करते हैं। हालाँकि, यह स्पष्ट तौर पर नहीं कहा जा सकता है कि पसीने वाले छिद्र क्यों बाधित हुए। हालाँकि इसके कुछ संभावित कारण हो सकते हैं, जैसे- नवजात शिशु में पसीने वाली नलिकाएँ या छिद्र विकसित नहीं होते हैं और वह आसानी से बंद हो सकते हैं, जिससे पसीना त्वचा के नीचे ही रूक जाता है और बच्चों में घमौरियों का कारण बनता है। इसके लिए गर्म मौसम भी जिम्मेदार होते हैं। गर्म व नम मौसम में भी घमौरियों की समस्या हो सकती है। इसके होने का एक और कारण शारीरिक गतिविधियाँ भी हैं। कई बार कठिन कसरत, कड़ी मेहनत करने से ज्यादा पसीना होने के कारण त्वचा पर लाल चकत्ते पड़ जाते हैं। इसके अलावा अधिक गर्मी या अत्यधिक तापमान के कारण भी घमौरियाँ हो सकती हैं। किसी बीमारी या आलस्य में लंबे समय तक गर्मी में विस्तर पर पड़े रहने की वजह से भी घमौरियाँ होने की संभावना रहती है। कई बार गर्म मौसम में रहने वाले लोगों में भी घमौरियाँ होने की संभावना अधिक होती है। कई ऐसे क्षेत्र हैं जहाँ हमेशा गर्मी रहती है। ऐसी जगहों पर रहने वाले लोगों को घमौरियाँ होने की संभावना भी अधिक रहती है। **घमौरियों से बचने के लिए क्या करें:-** घमौरियों से बचने के लिए सबसे पहले उसके कारणों को समझना होगा। जैसा कि हमने आपको बताया है कि घमौरियाँ क्यों होती हैं। ऐसे में इससे बचाव के लिए निम्नलिखित उपाय किए जा सकते हैं।

- घमौरियों से बचने के लिए आप हल्के, सफेद और कॉटन के कपड़े पहनें।
- ज्यादा देर गर्मी में न रहें। गर्मी से बचने के लिए कूलर, पंखे और एयरकंडीशन में रहें।
- ऐसे कार्य से बचें जिसमें ज्यादा पसीना आता हो। हालाँकि इसका मतलब यह बिल्कुल भी नहीं है कि एक्सरसाइज नहीं करना।
- रोजाना किसी अच्छे साबुन से नहाएँ, नहाते समय स्क्रबर का भी प्रयोग कर सकते हैं। इससे रोमछिद्र खुल जाएंगे।
- घमौरियों का उपचार:-** शुरूआती स्टेज में घमौरियों से बचने के लिए आप घमौरियों वाले पाउडर या कुछ घरेलू नुस्खों की मदद ले सकते हैं।
- इसके लिए आप एलोवेरा जेल का इस्तेमाल कर सकते हैं।
- आप चंदन का लेप लगाकर भी घमौरियों से निजात पा सकते हैं।
