### USFDA Finds several Violations In Aurobindo Sterile Injections Unit

**NEW DELHI:-** The US Food and Drug Administration has observed several violations and shortcomings in Aurobindo Pharma's sterile injections facility in Pashamylaram, Hyderabad, in yet another setback for the firm. FDA investigators have observed violations in sterilisation process to prevent microbial contamination and shortcomings in facility management procedures along with major protocol lapses in its sterile unit. The same unit had come under the FDA radar in March 2018. The inspection at Unit IV from November 4-13 found "procedures designed to prevent microbial contamination of drug products purporting to be sterile did not include adequate validation of the aseptic and sterilisation process ..," said the Form 483 'inspectional observation' report. ET has

seen a copy of the Form 483 issued to Aurobindo Pharma. It said the unit does not follow established test procedures, and that senior company managers confirmed to investigators that cleaning and sanitising is not done periodically. Form 483 listed 14 observations. Specifically, it found records of inspections of automatic, mechanical or electronic equipment, including computers or related system were not maintained. "The quality control unit lacks authority to review production records to assure that no errors have occurred and fully investigate errors that have," it said. ET first reported about the FDA inspections at the plant on November 5. Aurobindo did not respond to ET's emailed queries as of press time Friday. FDA investigators also found that the laboratory does not perform enough quality control check to ensure analysts are performing tests adequately on a consistent basis. "Laboratory records are deficient in that they do not include the initials and signatures of the person performing the tests and dates tests were performed," the report said. It also noted that employees are not given training in particular operations they perform, and observed lapses in the leachability studies and biocompatibility studies. The unit IV is Aurobindo's key injectable formulations plant, accounting for 9-10% of the firm's US sales and 50-60% of its total injectable sales in FY19. The plant also accounted for 8-9% of the company's overall operating profit during the period. Aurobindo will now have to respond to FDA with corrective measures to get the plant cleared within a stipulated time.

### चंडीगढ़ गई कॉल पर लुधियाना में होलसेलर पर छापा नशीली दवाएं जब्त

**लुधियाना:-** इग डिपार्टमेंट के अफसरों की एक टीम ने होलसेल दवाओं की मार्केट पिंडी गती में तीन दुकानों पर रेड की। इस दौरान होलसेलर फर्म पापुलर फार्म एजेंसी से भारी मात्रा में नशीली दवाएं बरामद हुई, जिनका नशे के तौर दुरुपयोग होता है। अफसरों ने दवाओं को जब्त कर लिया है। नशीली दवाओं की सूचनाएं देने के लिए इग्स विभाग ने स्टेट हैडक्वार्टर में एक नंबर जारी किया हुआ है। सूत्रों के मुताबिक इस नंबर पर पिंडी गती में नशीली दवाओं के कारोबार के संबंध में सूचना आई थी। इस पर लुधियाना में जोनल लाइसेंसिंग अथोरिटी कुलविंदर सिंह, इग इंस्पैक्टर रूपरिंदर कौर, रवि गुप्ता,, गुरप्रीत सिंह सेठी व सहायक राजकुमार की टीम ने पिंडी गती स्थित तीन दवा दुकानों पर रेड की। दो दुकानों से तो कुछ भी बरामद नहीं हुआ लेकिन पापुलर फार्म एजेंसी से ट्रामाडोल की 3362 गालियाँ व कैप्सूल, लोमास्टिल की सात सौ गालियाँ, कैरीसोमा की 250 गालियाँ, एलप्रैक्स की 1500 गालियाँ व पैंटोजोसीन के 30 इंजैक्शन बरामद हुए। अफसरों ने यह सभी दवाएं जब्त कर ली। उनके मुताबिक जब्त दवाओं की कीमत 48 हजार 725 रुपए बनती है। जब्त दवाएं कस्टडी आईर हासिल करने के लिए अदालत में पेश की जाएगी, जबकि दुकान के मालिक को नोटिस जारी कर जबाब मांगा जाएगा। रेड के बाद बंद रही दुकान, प्रधान बोले अब नहीं खोलने देंगे:- **लुधियाना (विपन) :-** रेड के बाद पापुलर फार्म एजेंसी पूरा दिन बंद रही। पंजाब के मिस्ट एसोसिएशन के महासचिव व लुधियाना डिस्ट्रिक्ट के मिस्ट एसोसिएशन के प्रधान जीएस चावला ने कहा कि मार्केट के दुकान अब यह दुकान नहीं खोलते देंगे, क्योंकि नशा पकड़ जाने पर पूरी मार्केट में अभी और भी आठ से दस लोग नशीली दवाओं के कारोबार में लिप्त हैं। वह दुकानों तो मार्केट में चला रहे हैं, लेकिन दवाओं का स्टॉक बाहर कही गोदामों में रखते हैं। ग्राहक आने पर फोन पर माल मांगाकर उसे मार्केट से बाहर कहीं सप्लाई दे देते हैं। इन दुकानदारों को चेतावनी दी गई थी कि या तो वह पिंडी गती छोड़ देया फिर यह नशीली दवाओं का कारोबार छोड़। चावला ने कहा कि रेड के बाद मिनी पिंडी स्ट्रीट में दुकानदारों के साथ मीटिंग भी की गई, जिसमें सभी दवा विक्रेताओं को नशीली दवाएं बेचने से बाज आने से पिंडी गती से अपना कारोबार समेटने की हितायत दी गई है। नशे की सूचना के लिए पिंडी गती में लागें कंप्लेंट बॉक्स:- नशा बेचने वालों का भांडाफोड़ करने के लिए पिंडी गती में कंप्लेंट बॉक्स लगाए जाएंगे। यदि किसी के पास भी पिंडी गती के किसी दुकानदार द्वारा नशा बेचने की सूचना है तो वह इस कंप्लेंट बॉक्स में सूचना लिखकर डाल सकता है। प्रधान जी एस. चावला ने बताया कि मीटिंग में यह फैसल लिया गया है। इसके तरह तीन कंप्लेंट बॉक्स पिंडी गती के तीन चौराहों पर लगाए जाएंगे। इन कंप्लेंट बॉक्स को नियमित तौर पर खोला जाएगा। इसमें जिस दुकानदार के बारे में भी सूचना मिलेगी, उसके बारे में वैरीफाई कर उसे समझाया जाएगा कि वह नशा बेचने से बाज आए। यदि फिर भी वह नहीं सुधार तो उसकी सूचना इग डिपार्टमेंट को दे दी जाएगी।

फल स्वास्थ्य के लिए काफी फायदेमंद होते हैं। फलों में विटामिन, एंटीऑक्सीडेंट, फाइबर, मिनरल, आयरन और अन्य पौष्टक तत्व पाए जाते हैं। ये फल बढ़ा सकते हैं ब्लड शुगर लेवल। ड्राइ फ्रूट में शुगर की मात्रा अधिक होती है जैसे किशमिश, काजू। इनमें पानी की मात्रा कम और शुगर की मात्रा अधिक होती है। इसलिए जरूरी है कि आप ड्राइ फ्रूट का सेवन सीमित मात्रा में करें यह इन्हें अधिक खाने से बचें। हाई कार्ब वाले फल:- ताजे फल खाने स्वास्थ्य के लिए काफी अच्छे होते हैं लेकिन कुछ फलों से दूर रहना स्वास्थ्य के लिए जरूरी हैं क्योंकि ये तुरंत ब्लड शुगर लेवल बढ़ा देते हैं। जैसे केले, आम, सेब अधिक मात्रा में नहीं खाने चाहिए। इसलिए अपने फलों का चुनाव करते समय उनके आकार का ध्यान रखना चाहिए। इसके साथ ही जरूरी है कि फलों में कार्ब की मात्रा पर ध्यान रखें। फलों का रस:- फलों का रस मरीजों को बिना डाक्टर के सलाह के बिना नहीं पीना चाहिए। जूस में शुगर की मात्रा अधिक होती है जो आपके शुगर को बढ़ा सकता है। इसलिए जूस की बजाए लोगों को ताजे फल की सलाह दी जाती है ताकि ब्लड शुगर को बढ़ने से रोका जा सके और अधिक से अधिक पौष्टक तत्व शरीर में जा सकें।

### Causes of Thyroid Cancer That You were Not Aware of

The exact cause of thyroid cancer is not known. Similar to how other cancer forms develop, changes in the DNA of cells is responsible for the development of thyroid cancer. These alterations could either be genetically inherited or occur over a period of time. But, it is well established that cancer is not contagious. **Thyroid Cancer Risk Factors:-** Exposure to radiation increases one's chances of getting thyroid cancer. A mere dental X-ray, however, does not increase the chances of developing thyroid cancer, but a radiation therapy to the head, neck or chest surely does. There has been significant amount of research to understand DNA changes that become cancerous. Most cancers are not inherited, which means that DNA gets damaged by the exposure to something in the environment such as radiation or smoke during the course of one's life. The cancer may also occur when unexpected changes take place inside a cell without a specific external cause. The following are the prominent risk factors for thyroid cancer: **Benign Thyroid Disease:-** Thyroid conditions i.e., either underactive or overactive thyroid are not related to the risk of thyroid cancer in any way, however, non-cancerous conditions such as nodules (adenomas), goitre (an enlarged thyroid) and thyroiditis (inflammation of the thyroid) increase thyroid cancer risk. **Radiation and Low Iodine Levels:-** Thyroid cancer is more likely to develop in individuals who have had radiotherapy treatments at a tender age, though the cancer usually develops years later. Survivors of atomic explosions or accidents are also at an increased risk of developing thyroid cancer. Individuals with low levels of iodine in their body are at more risk of thyroid cancer after any exposure to radiation. **Family History of Thyroid Cancer:-** Individuals with a family history of thyroid cancer are at a higher risk of developing thyroid cancer. **Bowel Condition FAP:-** Familial adenomatous polyposis (FAP), a condition caused by an inherited gene, increases the chances of developing thyroid cancer. **Breast Condition History:-** Women with non-cancerous breast conditions are at increased risk of thyroid cancer. **Cancer History:-** Individuals who have been treated for breast cancer, oesophageal cancer, testicular cancer or non-Hodgkin's lymphoma have high risk of developing thyroid cancer. These are the possible risk factors for thyroid cancer suggested by research reports over the years. Although thyroid cancer is a rare form of cancer, it is favourable to be aware about its symptoms and treatment options for better prognosis.

### Skin Care Tips For a Healthy And Glowing Skin In 30s

30s is the best time of your life. You have a stable career. Most probably stable-ish relationships, you have figured out almost everything in your life by the time you are 30 except for one thing, a great skin. Yes, a great skin is a tough nut to crack. If you are thirty, here are some skin care tips that might help you to get a beautiful skin. Take a look! • **A healthy lifestyle:-** This one is the trickiest yet the most important thing. However, it is quite a simple phenomenon. If you are not healthy, you won't shine. The glow, the beautiful skin that you long, the blemish free face, it all comes from within. If you are healthy, if you have a good working physical system, it will reflect as a natural glow. So, more or less, the beauty that people talk about is actually a healthy body. Give your body a good dose of natural antioxidants, Vitamins, detoxifiers, and so on. Have a good night's sleep, eat good, workout regularly. For the sake of a younger looking and beautiful skin, maintain a healthy lifestyle, no matter how difficult it is. • **Moisturise well:-** Some of the early signs of ageing include crow feet, wrinkle, and fine lines and so on. When we age, our skin tends to dry out and lose the elasticity with the lack of moisture. The mistake that we make as we age; we stop or hardly moisturise our skin, which ultimately dries out our skin and causes the early signs of ageing such as wrinkles. Just moisturise your skin well, after showers, every time you wash your face. Use moisturising creams and lotions or you can go for natural moisturisers such as honey and milk cream. • **Stay hydrated:-** Drink plenty of water to keep your naturally moisturised and hydrated. Deficiency of water can cause dry skin, drinking water daily can keep your skin moisturised along with hydrated; preventing signs of ageing such as fine lines and wrinkles. • **Protect your skin from dust and sun:-** You may not know but the harmful UV rays are cause of 80 percent of skin ageing. Exposure to sunlight causes pigmentation, one of the early signs of ageing. Researches show that the impact of UV rays on skin can increase with age. Use a good sun-block cream to protect your skin. • **Live a stress-free life:-** No matter how preachy it may sound but staying happy is the secret to stay beautiful and young. Stress and worry can cause you to age faster. Yes, whether you are a guy or a girl, stress has similar effect on you. You tend to have wrinkles faster. Smiling and staying away from stress is the key.

### वजन घटाने में बाधा पैदा करती है ये 5 पाचन संबंधी समस्याएं, तुरंत लें एक्सपर्ट की सलाह

अगर आप उन लोगों में से एक हैं, जो अपना वजन घटाने की कोशिश में जुटे हैं तो आपको यह पता होना चाहिए कि स्वस्थ भोजन व एक्सरसाइज इस प्रक्रिया के महत्वपूर्ण पहलू हैं। लेकिन इस बात से वाकिफ नहीं होंगे कि आपका पाचन स्वास्थ्य भी इस प्रक्रिया में एक अहम भूमिका निभाता है। आप अच्छा आकार पाने के लिए क्या कुछ नहीं करते लेकिन जब तक आपका पाचन स्वास्थ्य ठीक नहीं होगा तब तक आप एसे कर पाने में सफल नहीं हो पाएँगे। अधिकतर पाचन संबंधी समस्याएं खाने को पचाने की खारी प्रक्रिया होती है, जिसमें हमारी आंतों का स्वास्थ्य बजन बढ़ाने में योगदान देता है। हम आपको ऐसी पांच पाचन संबंधी बीमारियों के बारे में बताने का रह रहे हैं, जो कि आपके वजन घटाने के सफाने को तोड़ सकती हैं। **गैस्ट्रोएसोफेगल रिफ्लॅक्स डिजीज़:-** गैस्ट्रोएसोफेगल रिफ्लॅक्स डिजीज़ ऐसी स्थिति है, जिसमें सीने के निचले हिस्से में दर्द और जलन होती है, इसमें पित (खाना पचाने में मदद करने वाला लिंकिंड) खाने की नली की तरफ आने लगता है। इस समस्या से जूँझ रहे लोगों के लिए सहज खाद्य पदार्थ दर्द को कम करते सकते हैं। खाना खाने से उन्हें अस्थायी रूप से आराम मिलता है क्योंकि खाना व लार एसिड को कुछ देर तक सामान्य बनाए रखने में मदद करते हैं। लेकिन असली समस्या खाने को पचाने की प्रक्रिया के समाप्त होने के बाद शुरू होती है वह एसिड से फिर से उत्पादन करना शुरू कर देता है। इस कारण लाग जरूरत से ज्यादा खाने की आदत में फंस जाते हैं, जिसके कारण वजन बढ़ाता है। **छाले:-** अस्वज्ञ करने वाले छाले, पेट और छोटी आंत की अंदरूनी परत में विकसित होते हैं। आमतौर पर यह बहुत सा एसिड उत्पादित करते हैं। एसिड रिफ्लॅक्स की जरूरत से ज्यादा बढ़ाता है, जो छोटी देर के लिए आराम मिलता है क्योंकि परत को कवर कर लेते हैं और पेट के एसिड को एसामान्य बना देते हैं। अगर आप निरंतर अंतराल पर खाना खाने रहेंगे तो निश्चित ही आपका वजन बढ़ाना लाजमी है। **बैक्टीरिया का जरूरत से ज्यादा बढ़ाना:-** हमारी आंतों में अच्छे व बुरे दोनों तरह के बैक्टीरिया होते हैं। अच्छे बैक्टीरिया सूजन को कम करने में मदद करते हैं और आपके स्वास्थ्य को बनाए रखते हैं। समस्या उस वक्त बढ़ती है जब बैक्टीरिया की बढ़िया तेजी से बढ़ती है, जिसके कारण वजन बढ़ सकता है। दरअसल बैक्टीरिया मीथेन गैस के उत्पादन को बढ़ाता है, जो छोटी आंत की गतिविधियों को धीमा कर सकती है। इसके अलावा बैक्टीरिया की जरूरत से ज्यादा वृद्धि आपके मेयाबाल्जिम को धीमा कर सकती हैं और आपके इंसुलिन व लेटिन प्रतिरोध क्षमता को भी प्रभावित कर सकती हैं। यह भूख और सृति दोनों को ही नियंत्रित कर सकते हैं। इन सब के कारण आपको अधिक खाने और वजन बढ़ने की संभावना होती है। **इरिटेबल बोवेल सिंड्रोम:-** इरिटेबल बोवेल सिंड्रोम एक बहुत आम विकार है जो खाद्य संवेदनशीलता और अच्छे बैक्टीरिया के असंतुलन की आरे ले जा सकत है। इसके कारण कब्ज, दस्त, गैस, सूजन, पेट दर्द और क्रैम्पिंग हो सकती है। यह वजन बढ़ने का भी एक कारण हो सकता है। **पुरानी बीमारियाँ:-** लंबे असर से किसी बीमारियाँ से जूँझ रहे व्यक्ति का स्ट्रेंगर उपचार चल रहा होता है, जो कि आमतौर पर पहला कदम है। यह स्ट्रेंगर कार्बोहाइड्रेट की भूख को बढ़ा सकते हैं, जिसके परिणामस्वरूप आपको ज्यादा भूख लगानी और उससे वजन भी बढ़ सकता है।
